 **TIP:** Helpful hints or shortcuts.

Reinstallation tip: Reinstallation helpful hints, shortcuts, or considerations.

 **NOTE:** Information that explains a concept or how to complete a task.

 **IMPORTANT:** Information that help the user to avoid potential printer error conditions.

 **CAUTION:** Procedures that the user must follow to avoid losing data or damaging the printer.

 **WARNING!** Procedures that the user must follow to avoid personal injury, catastrophic loss of data, or extensive damage to the printer.

HP service and support

Learn about HP access to additional service and support information.

Additional service and support for channel partners

Channel partners, go to partner.hp.com, and then use the steps below to access the HP Web-based Interactive Search Engine (WISE).

Access WISE for Channel partners

1. Select **Services & Support** (near the top of the screen).
2. Under **Services Delivery**, select **Technical Support**.
3. Select **Technical Documentation**.

Find information about the following topics

- Service manuals
- Service advisories
- Up-to-date control panel message (CPMD) troubleshooting
- Solutions for printer issues and emerging issues
- Remove and replace part instructions and videos
- Install and configure
- Printer specifications
- Warranty and regulatory information

Additional service and support for HP internal personnel

HP internal personnel, go to one of the following Web-based Interactive Search Engine (WISE) sites:

Americas (AMS)

- [WISE - English](#)
- [WISE - Spanish](#)
- [WISE - Portuguese](#)
- [WISE - French](#)

Asia Pacific / Japan (APJ)

- [WISE - English](#)
- [WISE - Japanese](#)
- [WISE - Korean](#)
- [WISE - Chinese \(simplified\)](#)

- [WISE - Chinese \(traditional\)](#)
- [WISE - Thai](#)

Europe / Middle East / Africa (EMEA)

- [WISE - English](#)

Basic operation

The printer routes all high-level processes through the formatter, which stores font information, processes the print image, and communicates with the host computer.

The basic printer operation comprises the following systems:

- The engine-control system, which includes the high-voltage and low-voltage power supplies (HVPS and LVPS), fuser control circuits, and the DC controller printed circuit assembly (PCA)
- The laser/scanner system, which forms the latent image on the photosensitive drum
- The image-formation system, which transfers a toner image onto the paper
- The pickup, feed and delivery system, which uses a system of rollers and belts to transport the paper through the printer
- Optional accessories (paper feeder, paper decks, staple stacker multi-bin mailbox)

Figure 1-1 Relationship among the main printer systems

Sequence of operation

The DC controller PCA controls the operating sequence, as described in the following table:

Table 1-1 Sequence of operation

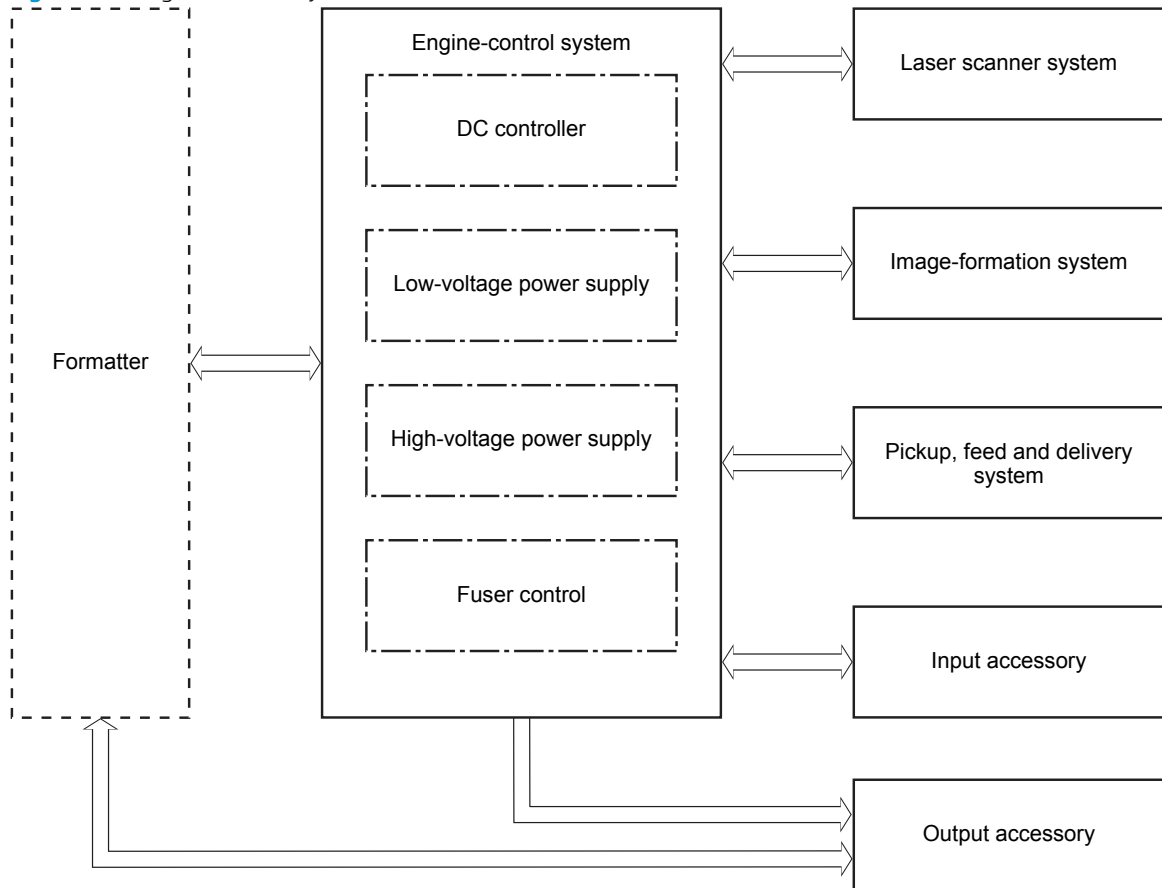

| Period | Duration | Description |
|------------------|---|--|
| Waiting | From the time the power is turned on, the door is closed, or when the printer exits Sleep mode until the printer is ready for printing. | <ul style="list-style-type: none">• Heats the fuser film in the fuser• Detects the toner cartridge• Rotates and stops each motor• Rotates and stops each fan• Cleans the transfer roller |
| Standby | From the end of the waiting sequence, the last rotation until the formatter receives a print command, or until the printer is turned off. | <ul style="list-style-type: none">• Is in the Ready state• Enters Sleep mode if the formatter sends the sleep command• Rotates and stops each fan |
| Initial rotation | From the time the formatter receives a print command until the paper enters the paper path. | <ul style="list-style-type: none">• Rotates each motor• Rotates each fan• Activates the high-voltage power supply (high-voltage bias)• Prepares the laser/scanner unit• Warms the fuser to the correct temperature |
| Printing | From the time the first sheet of paper enters the paper path until the last sheet has passed through the fuser. | <ul style="list-style-type: none">• Forms the image on the photosensitive drums• Transfers the toner to the paper• Fuses the toner image onto the paper |
| Last rotation | From the time the last sheet of paper exits the fuser until the motors stop rotating. | <ul style="list-style-type: none">• Stops each motor• Stops each fan• Stops the high-voltage power supply (high-voltage bias)• Stops the laser/scanner unit• Turns the fuser heater off• If another print command is received, the printer enters the initial rotation period when the last rotation is complete. |

Engine-control system

The engine-control system receives commands from the formatter and interacts with the other main systems to coordinate all printer functions. The engine-control system consists of the following components:

- DC controller
- Low-voltage power supply
- High-voltage power supply
- Fuser power supply

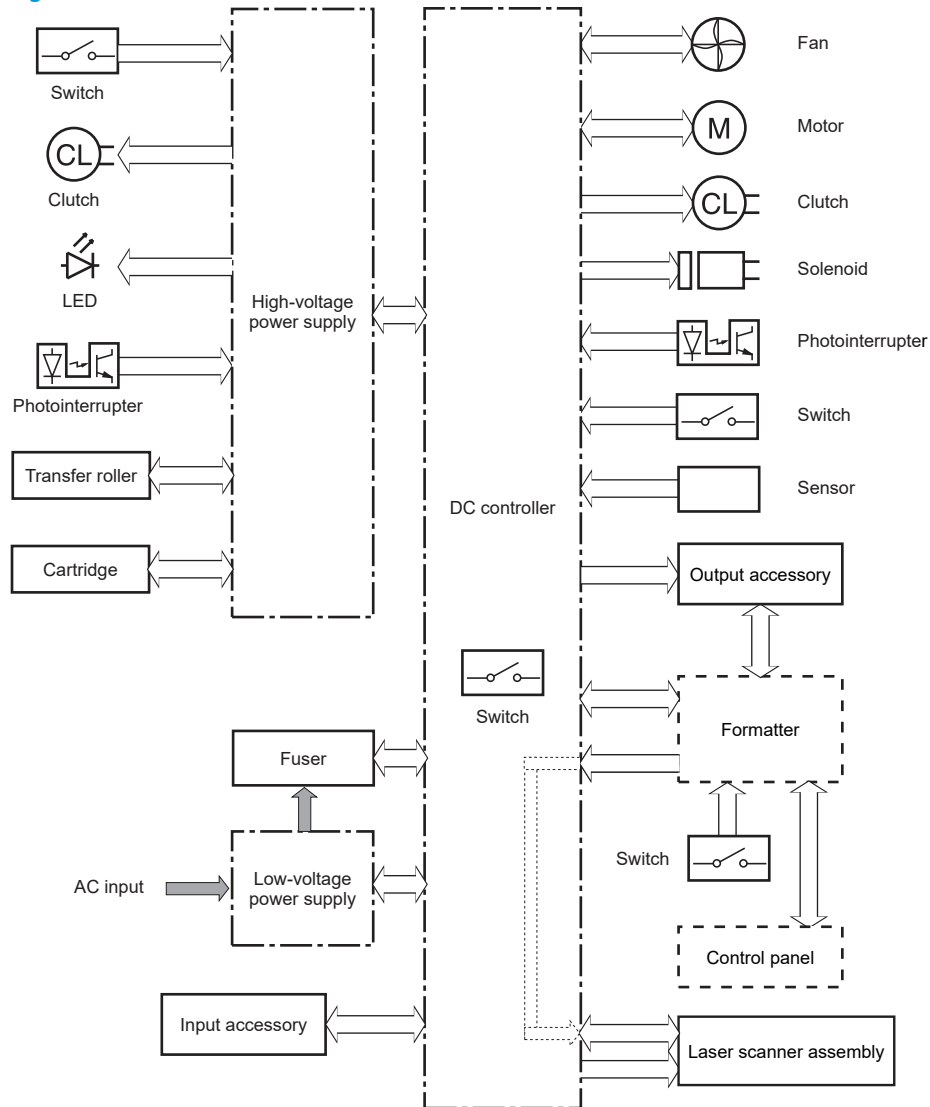

Figure 1-2 Engine-control system

DC controller

The DC controller controls the operation of the printer and its components. The DC controller starts the printer operation when the printer power is turned on and the power supply sends DC voltage to the DC controller. After the printer enters the standby period, the DC controller sends out various signals to operate motors, solenoids, and other printer components based on the print command and image data that the host computer sends.

Figure 1-3 DC controller

Motors

The printer has four motors. The motors drive the components in the paper-feed and image-formation systems.

The DC controller monitors the fuser motor and the drum motor to determine whether a motor has failed. It notifies the formatter when it encounters the following conditions:

- **Startup failure:** the motor does not reach a specified speed within a specified time from when the motor starts.
- **Rotational failure:** the rotational speed of the motor is not in the specified range for a specified time after the motor reaches a specified speed.

Table 1-2 Motors

| Abbreviation | Name | Purpose | Failure detection |
|--------------|---------------|---|-------------------|
| M1 | Fuser motor | Drives the pressure roller, fuser output roller, output roller, duplex switchback roller (duplex models) | Yes |
| M2 | Drum motor | Drives the photosensitive drum, primary charging roller, transfer roller, tray 1 pickup roller, tray 1 feed roller (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175 models), tray 2 pickup roller, tray 2 feed roller, registration roller, feed roller, duplex feed roller (duplex models), each roller for input accessory | Yes |
| M3 | Lifter motor | Drives the Tray 2 lifter | No |
| M4 | Scanner motor | Drives the scanner mirror | No |

Fans

The printer has four fans for preventing the temperature from rising in the printer and for cooling the printed pages.

The DC controller determines whether there is a fan failure and notifies the formatter if a fan locks for a specified time from when the fan starts.

Table 1-3 Fans

| Abbreviation | Name | Cooling area | Type | Speed |
|--------------|---------------------|--|--------|----------|
| FM1 | Scanner fan | Toner cartridge and laser scanner assembly | Intake | Full |
| FM2 | Duplex fan | Duplex feed area | Intake | Full |
| FM3 | Cartridge upper fan | Toner cartridge, laser scanner assembly, and around the low-voltage power supply | Intake | Full/Low |
| FM4 | Cartridge lower fan | Toner cartridge, laser scanner assembly, and around the low-voltage power supply | Intake | Full/Low |

| LED4950 | Pre-exposure LED |

Low-voltage power supply

The low-voltage power supply (LVPS) circuit converts the AC power from the wall receptacle into the DC voltage that the printer components use.

Figure 1-4 Low-voltage power supply circuits

Low-voltage power supply voltages description

The low-voltage power supply converts the AC power into two DC voltages, which it then subdivides, as described in the following table:

Table 1-10 Converted DC voltages

| Main DC voltage | Sub-voltage | Behavior |
|-----------------|-------------|---|
| +24V | +24VA0 | Stopped during active OFF or inactive OFF |
| | +24VA2 | Stopped during active OFF or inactive OFF |
| | +24VB | Stopped during active OFF or inactive OFF |
| | +24VC1 | Stopped during active OFF or inactive OFF |
| | +24VC2 | Stopped during active OFF or inactive OFF |
| | +24VF | Stopped during active OFF or inactive OFF |
| +5V | +5VA | Stopped during inactive OFF |
| | +5VB | Stopped during active OFF or inactive OFF |
| | +5VE | Stopped during inactive OFF |
| | +5LL | Stopped during active OFF or inactive OFF |
| +3.3V | +3.3VA | Stopped during inactive OFF |
| | +3.3VB2 | Stopped during inactive OFF |
| | | Supplied intermittently during active OFF |
| | +3.3VC | Stopped during active OFF or inactive OFF |
| | +3.3VF | Stopped during active OFF or inactive OFF |

Over-current/over-voltage protection

The low-voltage power supply automatically stops supplying the DC voltage to the printer components whenever it detects excessive current or abnormal voltage. The low-voltage power supply has a protective circuit against over-current and over-voltage to prevent failures in the power supply circuit.

 **CAUTION:** If DC voltage is not being supplied from the low-voltage power supply, the protective function might be running. In this case, turn the power switch off and unplug the power cord.

Do not turn the power switch on until the root cause is found and corrected.

If the protective function is active, the DC controller notifies the formatter of a low-voltage power supply failure. In addition, the low-voltage power supply has two fuses to protect against over-current. If over-current flows into the AC line, the fuse stops the AC power.

Safety

For personal safety, the printer interrupts +24VB and +24VC power when the cartridge door detection switch is turned off. This stops DC power supply to the high-voltage power supply (HVPS)

The printer also stops the +24VB power when the +24V interlock switch is turned off. This stops DC power supply to the following load:

- High-voltage power supply
- Drum motor
- Fuser motor
- Duplex switchback clutch (duplex models)

The remote switch control circuit turns on or off the printer power so that the AC power flows even when the power switch is turned off. Unplug the printer power cord before disassembling the printer.

Low-voltage power supply functions

The printer has the following low-voltage power supply functions:

Table 1-11 Low-voltage power supply functions

| Function | Behavior |
|-----------------------------|---|
| Inactive OFF | The power supply is off. |
| Active OFF (state of sleep) | The low-voltage power supply is output only to the formatter and DC controller. |

High-voltage power supply

The DC controller controls the high-voltage power supply (HVPS) to generate biases. The high-voltage power supply delivers the high-voltage biases to the following components used to transfer toner during the image-formation process:

- Primary charging roller (in the toner cartridge)
- Developing roller (in the toner cartridge)
- Transfer front guide
- Transfer roller
- Static charge eliminator
- Fuser film
- Pressure roller

High-voltage power supply circuits

The high-voltage power supply contains the following separate circuits:

Figure 1-5 High-voltage power supply circuits

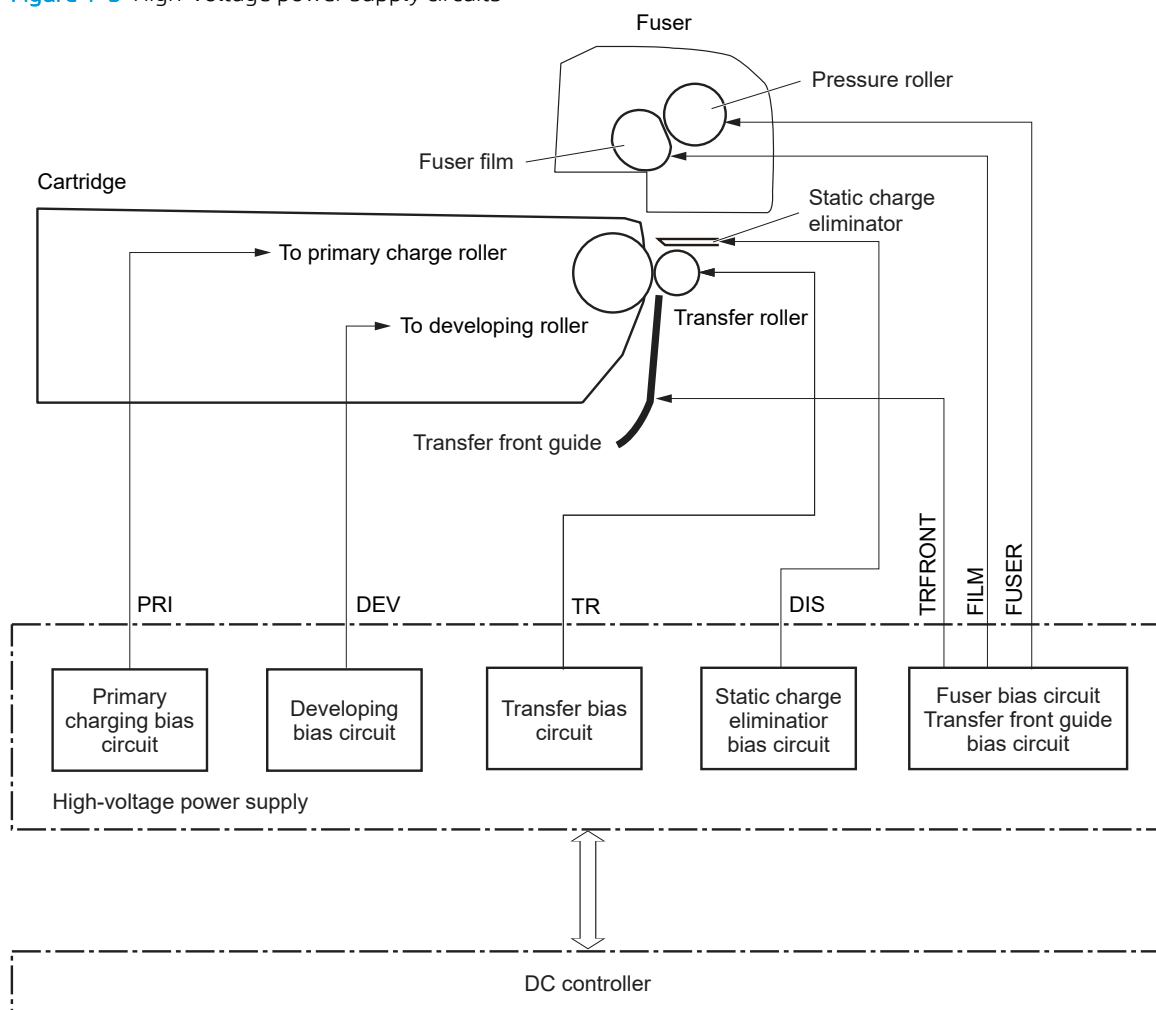

Table 1-12 High-voltage power supply circuits

| Circuit | Description |
|--|---|
| Primary-charging-bias generation | The primary charging bias negatively charges the surface of the photosensitive drum to prepare for image formation. |
| Developing-bias generation | The developing bias adheres toner to an electrostatic latent image formed on the photosensitive drum. |
| Transfer-bias generation | The primary transfer bias transfers the toner from the photosensitive drum onto the paper. |
| Static charge eliminator bias generation | The static charge eliminator bias eliminates the electric charge on the back side of the paper for stable paper feed and print quality. |
| Fuser bias generation | The printer uses instant-on fusing. The fuser bias is DC positive for improved print quality. The fuser bias circuit is located in the high-voltage power supply. |

Fuser control

The DC controller and components in the fuser perform the following functions related to fuser operation:

- Control fuser temperature
- Detect fuser failures
- Prevent excessive temperature rise
- Detect remaining life in the fuser
- Determine if the correct fuser is installed

Fuser circuits

The fuser heater control circuit and the fuser heater safety circuit control the fuser temperature according to commands from the DC controller. The fuser consists of the following major components:

Figure 1-6 Fuser components

Table 1-13 Fuser components

| Type of component | Abbreviation | Name | Function |
|-------------------------------|--------------|-----------------|--|
| Heaters | H1, H2 | Fuser heaters | Heats the center of the fuser film assembly |
| Thermistors (Contact type) | TH1 | Main thermistor | Detects the center temperature of the fuser heater |

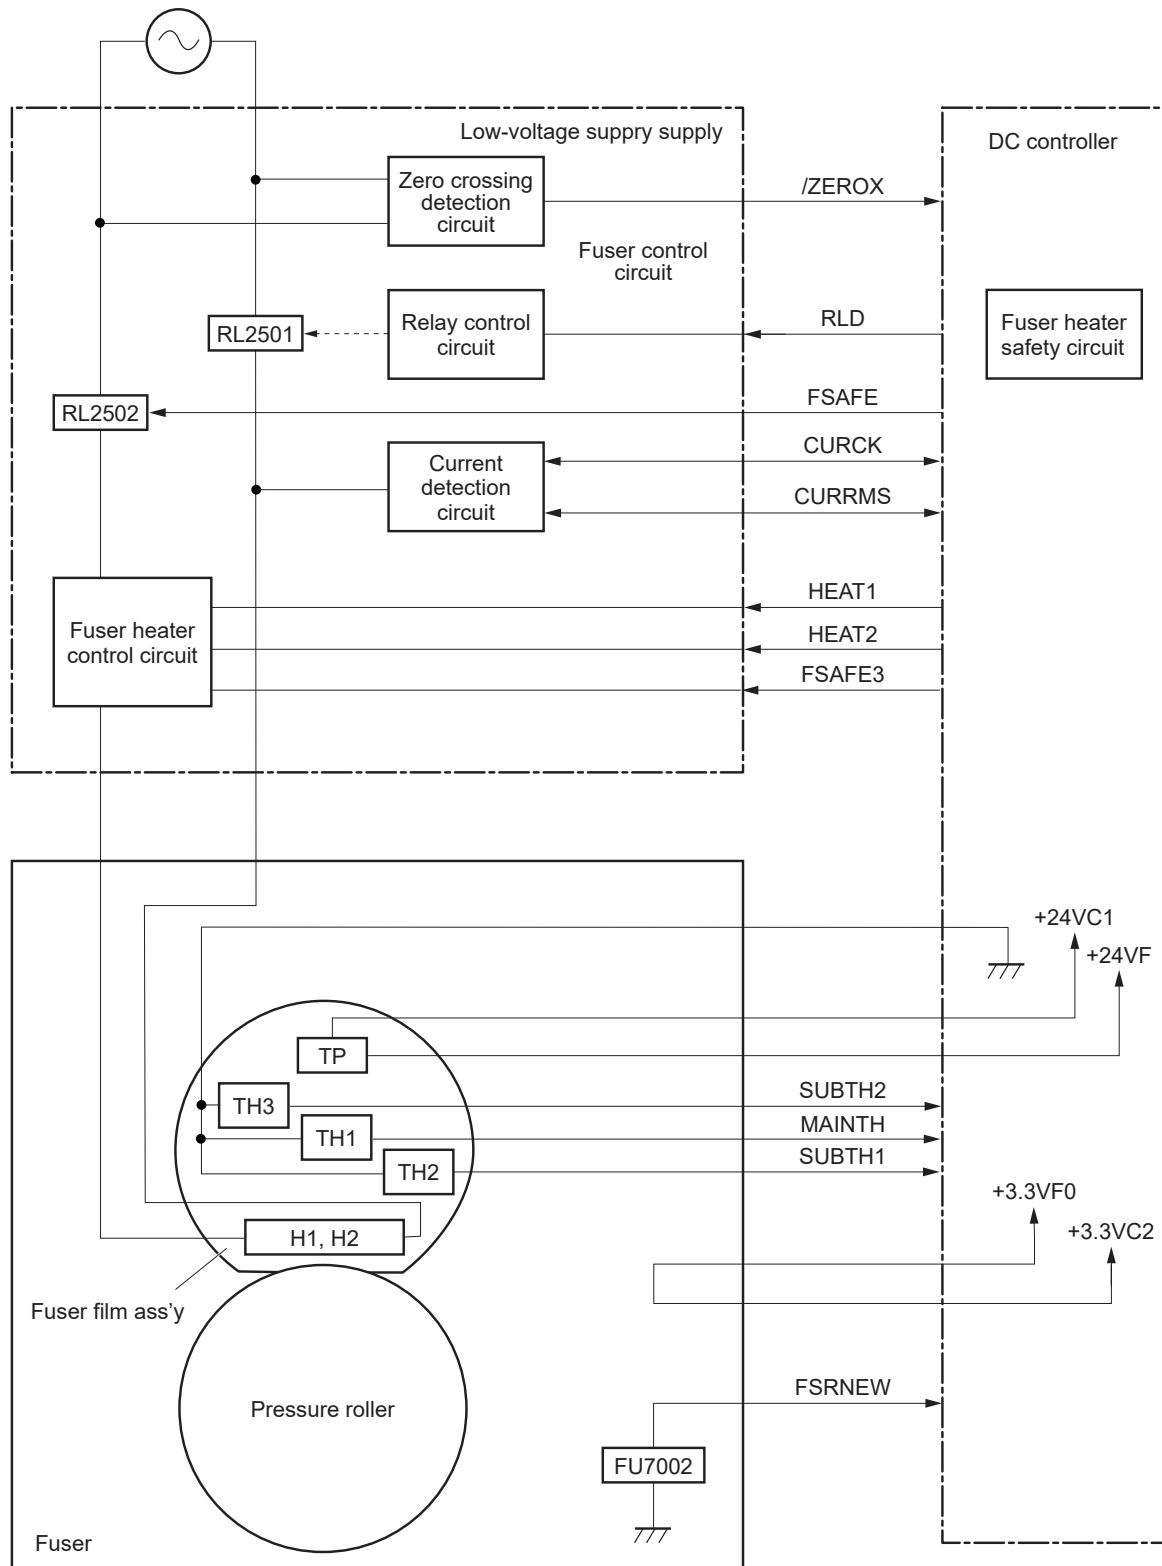

Table 1-13 Fuser components (continued)

| Type of component | Abbreviation | Name | Function |
|----------------------------------|--------------|-----------------|---|
| Thermistors (Contact type) | TH2, TH3 | Sum thermistors | Detects the edge temperature of the fuser heater. |
| Thermal switch (Contact type) | TP | Thermal fuse | Prevents an abnormal temperature rise in the fuser heater |

Fuser control functions

The following figure shows the fuser control functions

Figure 1-7 Fuser control
AC input

The printer has the following fuser-control functions:

Table 1-14 Fuser-control functions

| Failure detection function | Supported feature |
|--|-------------------|
| Fuser temperature control | Yes |
| Heat up error detection | Yes |
| Low temperature error detection | Yes |
| High temperature error detection | Yes |
| Breaking of a heater wire detection | No |
| Frequency detection circuit failure detection | Yes |
| Low-voltage power supply failure detection | Yes |
| Fuser pressure release mechanism failure detection | Yes |
| Brand new fuser detection | Yes |
| Fuser type discrepancy detection | Yes |
| Fuser type identification detection | Yes |
| Fuser presence detection | Yes |
| Fuser life detection | Yes |
| Fuser roller cleaning | Yes |

Fuser heater protection

Fuser heater protection is a feature that detects excessive temperatures in the fuser and interrupts the power supply to the fuser heater.

The following three protective components prevent the fuser heater from excessive rising temperature:

- **DC controller:** When a thermistor or sub-thermistor detects a temperature above a certain threshold, the DC controller interrupts power to the fuser heater.
- **Fuser-heater safety circuit:** The fuser heater safety circuit monitors the detected temperature of the thermistors and interrupts power to the fuser heater when it detects excessive temperature.
- **Temperature fuse:** When the fuser heater reaches a temperature above a certain threshold, the temperature fuse interrupts power to the fuser heater.

Laser scanner system

The laser/scanner system forms the latent electrostatic image on the photosensitive drum inside the toner cartridge.

The DC controller receives instructions from the formatter regarding the image of the page to be printed. The DC controller signals the lasers to emit light, and the laser beams pass through lenses and onto the scanner mirror, which rotates at a constant speed. The mirror reflects the beam onto the photosensitive drum in the pattern required for the image, exposing the surface of the drum so it can receive toner.

The laser/scanner system consists of the following main components:

- Laser assembly
- Scanner motor assembly
- Beam detect (BD) sensor
- Scanner mirror

Figure 1-8 Laser scanner

Laser/scanner failure detection

The DC controller determines an optical unit failure and notifies the formatter of the error status when any of the following occur:

- Laser scanner failure detection
- **Laser/scanner motor startup failure:** The scanner motor does not reach a specified rotation frequency within a specified period of time from when the laser/scanner starts up.
- **Laser/scanner motor abnormal rotation:** The laser/scanner motor does not reach a specified rotational frequency within a specified period of time during a print operation.

Safety

The laser/scanner assembly has a mechanical laser shutter. For the safety of users and service technicians, the laser shutter interrupts the optical path of the laser/scanner assembly when the following door is opened:

- Rear door (SW6, SW7) for M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175 models)
- Right door (SW6, SW7) for M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675 models)

Image formation system

The image-formation system creates the printed image on the paper. The system consists of the following components:

- Toner cartridge
- Transfer roller
- Fuser
- Laser/scanner
- High-voltage power supply

The DC controller controls the internal components of the image formation system (according to commands received from the formatter) to form the toner image on the photosensitive drum surface. The toner image is then transferred to the print media and fused.

Figure 1-9 Image formation system

The DC controller rotates the following motors to drive each component.

Drum Motor

- Photosensitive drum
- Developing roller
- Primary charging roller (follows the photosensitive drum)
- Transfer roller (follows the photosensitive drum)

Fuser motor

- NOTE:** The primary charging roller and developer roller are located in the toner cartridge.

The diagram illustrates the mechanical setup. A motor (M1) is connected to a lever arm (SL2) through a belt and pulley system. The lever arm is pivoted on a support structure. A DC controller is connected to both motors (M1 and M2) via a dashed line.

| Abbreviation | Component |
|--------------|-------------------------------|
| M1 | Fuser motor |
| M2 | Drum motor |
| SL2 | Developer alienation solenoid |

Figure 1-11 Sensors

Table 1-16 Sensors

| Abbreviation | Component name |
|--------------|-----------------------------|
| LED4950 | Pre-exposure LED |
| PS4850 | Developer alienation sensor |
| | Toner level sensor |

Image-formation process

The image-formation process consists of seven steps divided into five functional blocks.

Figure 1-12 Image formation process

Table 1-17 Image formation process

| Functional block | Steps | Description |
|------------------------|------------------------|---|
| Latent image formation | 1. Pre-exposure | An invisible latent image forms on the surface of the photosensitive drum. |
| | 2. Primary charging | |
| | 3. Laser-beam exposure | |
| Development | 4. Developing | Toner adheres to the electrostatic latent image on the photosensitive drum. |
| Transfer | 5. Transfer | The toner image transfers to the paper. |
| | 6. Separation | |
| Fusing | 7. Fusing | The toner fuses to the paper to make a permanent image. |
| Drum cleaning | 8. Drum cleaning | Residual toner is removed from the drum. |

Step 1: Pre-exposure

To prepare for primary charging, light from the pre-exposure LED strikes the surface of the photosensitive drum to remove any residual electrical charges from the drum surface.

Figure 1-13 Pre-exposure

Step 2: Primary charging

The primary-charging roller contacts the photosensitive drum and charges the drum with negative potential.

Figure 1-14 Primary charging

Step 3: Laser-beam exposure

The laser beam strikes the surface of the photosensitive drum in the areas where the image will form. The negative charge neutralizes in those areas, which are then ready to accept toner.

Figure 1-15 Laser-beam exposure

Step 4: Development

Toner acquires a negative charge as the developing cylinder contacts the developing blade. Because the negatively charged surface of the photosensitive drums has been neutralized where the drums have been struck by the laser beam, the toner adheres to those areas on the drums. The latent image becomes visible on the surface of each drum.

Figure 1-16 Developing

Step 5: Transfer

The toner image on the photosensitive drum transfers to the paper. Transfer bias applied to the transfer roller attracts the negatively-charged toner to the paper.

Figure 1-17 Transfer

Step 6: Separation

The elasticity of the paper and the curvature of the photosensitive drum cause the paper to separate from the photosensitive drum. The static-charge eliminator removes excess charge from the paper to make sure that the toner fuses correctly.

Figure 1-18 Separation

Step 7: Fusing

To create the permanent image, the paper passes through heated, pressurized rollers to melt the toner onto the page. Fusing bias is added to the pressure roller to improve the print quality.

Figure 1-19 Fusing

Step 8: Drum cleaning

The cleaning blade scrapes the residual toner off the surface of the photosensitive drum, and toner is deposited in the toner-collection portion of the cartridge.

Figure 1-20 Drum cleaning
Cleaning blade

Toner cartridge

The printer has one toner cartridge.

Design

The toner cartridge is filled with toner and consists of the following components:

- Photosensitive drum
- Developer roller
- Primary-charging roller
- E-label

The DC controller rotates the drum motor to drive the photosensitive drum, developer roller, and the primary-charging roller.

Figure 1-21 Toner cartridge components

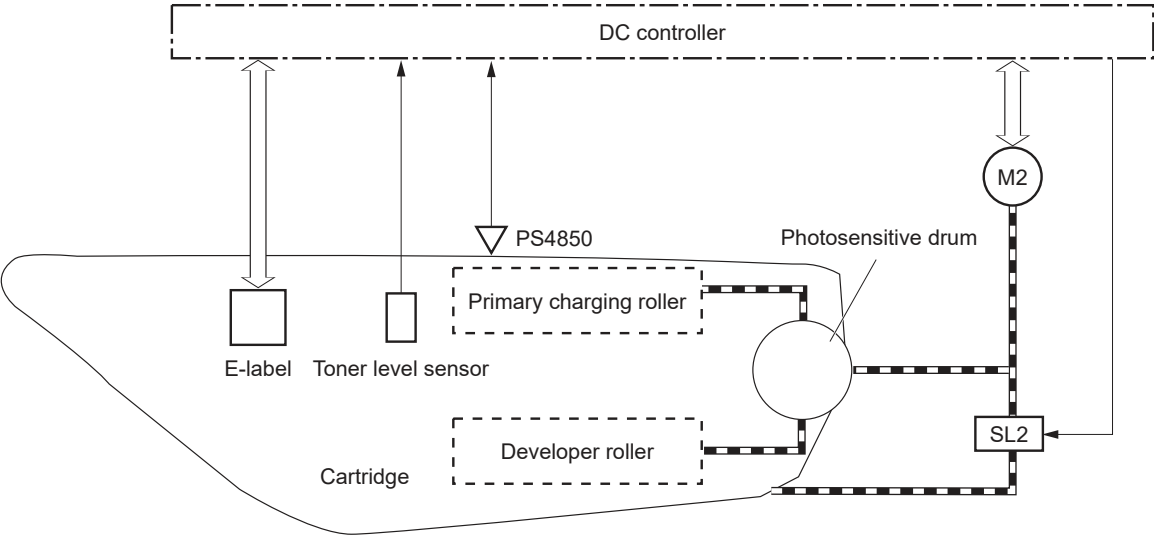

Table 1-18 Toner cartridge functions

| Function | Supported feature |
|--|-------------------|
| Toner cartridge presence detection | Yes |
| Toner level detection | Yes |
| Toner cartridge life detection | Yes |
| Toner cartridge mis-installation detection | No |
| Drum discharge | Yes |
| Developer alienation control | Yes |
| Toner level sensor mechanism malfunction | No |
| Transfer roller cleaning | Yes |
| Primary charging roller cleaning | No |

Memory chip

The memory chip is non-volatile memory that stores information about the usage of the toner cartridge and helps protect the customer from counterfeit cartridges. This chip is also used to detect the presence of a cartridge within the printer or when a cartridge is installed in the wrong slot. The printer reads and writes the data in the memory chip.

Dynamic security

Certain HP printers use cartridges that have security chips or electronic circuitry. Cartridges using a non-HP chip or modified or non-HP circuitry* might not work. And, those that work today might not work in the future.

As is standard in the printing business, HP has a process for authenticating cartridges. HP continues to use security measures to protect the quality of our customer experience, maintain the integrity of our printing systems, and protect our intellectual property. These measures include authentication methods that change periodically and might prevent some third-party supplies from working now or in the future. HP printers and original HP cartridges deliver the best quality, security and reliability. When cartridges are cloned or counterfeited, the customer is exposed to quality and potential security risks, compromising the printing experience.

* Non-HP chips and modified or non-HP electronic circuitry are not produced or validated by HP. HP cannot guarantee that these chips or circuitry will work in your printer now or in the future. If you are using a non-original HP cartridge, please check with your supplier to ensure your cartridge has an original HP security chip or unmodified HP electronic circuitry.

JetIntelligence

JetIntelligence supports two features for managing toner cartridges.

- The authentication feature allows customers to specify the use of only genuine HP toner cartridges in the printer.
- The anti-theft feature enables locking a cartridge to a specific printer or fleet of printers.

Authentication

The genuine HP authentication feature allows a customer to specify that only genuine HP supplies can be used in a printer. If a non-HP or used supply is installed, the printer will not print. This feature is disabled by default, and can be enabled or disabled from the control panel or the Embedded Web Server (EWS).

If a genuine HP toner cartridge from another printer is moved to a printer with this feature enabled, the toner cartridge will authenticate and print, unless the toner cartridge has passed the low state. If the toner cartridge has passed the low state, an **Unauthorized Cartridge** message displays on the control panel.

If a non-HP toner cartridge is used in a printer with this feature enabled, the message **Unauthorized Cartridge** appears on the control-panel display.

NOTE: If a customer suspects they have a counterfeit cartridge, they should report it by going to www.hp.com/go/anticounterfeit and selecting **Report now**.

Anti-theft

The toner cartridge anti-theft feature allows a customer to configure the printer to automatically lock genuine HP toner cartridges to a specific printer or fleet of printers when they are installed. A locked toner cartridge will only work in the specified printer or fleet of printers. This feature prevents toner cartridges from being stolen

and used in another printer, or from being moved from an authorized printer to an unauthorized printer. This feature is disabled by default, and can be enabled or disabled from the control panel, the Embedded Web Server (EWS), or Web Jetadmin.

When the anti-theft feature is enabled, the toner cartridge in a printer will only work in the specified printer or fleet of printers. If a locked toner cartridge is moved to another printer, the cartridge will not print and the message **Protected Cartridge** appears on the control-panel display.

NOTE: When a toner cartridge is locked to a specific printer or fleet of printers, it cannot be unlocked. This is a permanent operation.

Pickup, feed, and delivery system

The DC controller controls the pickup, feed, and delivery system according to commands from the formatter. The pickup, feed, and delivery system uses a series of rollers to move the paper through the printer.

The pickup, feed, and delivery system consists of the following three functional blocks. The DC controller controls each block to pick up, feed, and deliver the paper.

- **Pickup-and-feed block:** Controls the movement of the paper from each pickup source to the fuser inlet
- **Fuser-and-delivery block:** Controls the movement of the paper from the fuser to the delivery destination
- **Duplex block:** Controls the movement of the paper from the duplex switchback unit to the duplex re-pickup unit (duplex models)

The following figure shows the simplex and duplex paper path for the pickup, feed, and delivery system:

Figure 1-22 Pickup, feed, and delivery system

Table 1-19 Pickup, feed, and delivery functions

| Function | Supported feature |
|---|-------------------|
| Tray 2 media size detection | Yes |
| Tray 2 presence detection | Yes |
| Tray 2 media surface detection | Yes |
| Tray 2 media presence detection | Yes |
| Tray 2 media level detection | No |
| Tray 2 lift-up control | Yes |
| Tray 2 lift-down control | No |
| Tray 2 multiple-feed prevention mechanism | Yes |
| Tray 1 media presence detection | Yes |
| Tray 1 media width detection | No |
| Tray 1 last-media detection | No |
| Skew-feed prevention mechanism | Yes |
| Feed speed control (duplex models) | Yes |
| Loop control | Yes |
| Media detection | No |
| OHT detection | No |
| Image leading edge positioning | Yes |
| Media length detection | Yes |
| Media width detection | Yes |
| Pressure roller pressure release control | Yes |
| Output bin media-full detection | Yes |
| Automatic delivery | Yes |
| Duplex switchback control (duplex models) | Yes |
| Duplex feed control (duplex models) | Yes |
| Unit causing the jam notice | Yes |
| Brand new pickup roller detection | Yes |

Photo sensors and switches

The following figure shows the photo sensors and switches for the pickup, feed, and delivery system:

Figure 1-23 Photo sensors and switches

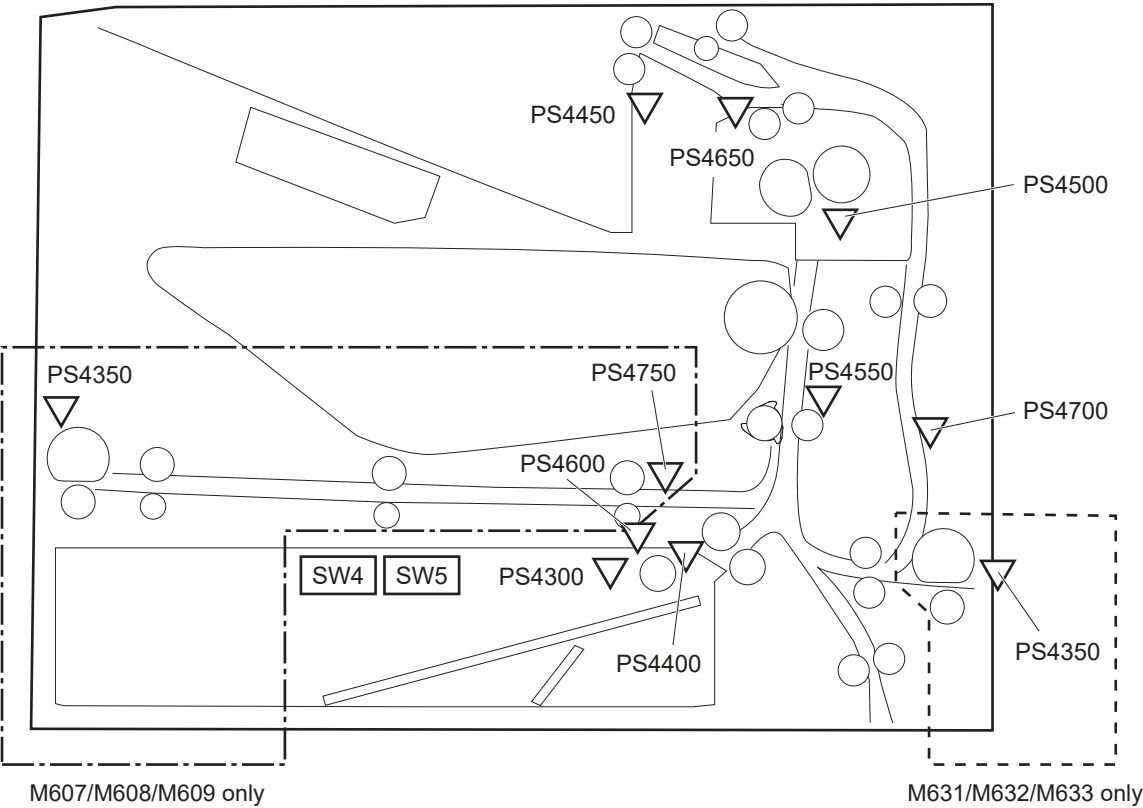

Table 1-20 Photo sensors and switches

| Abbreviation | Component |
|--------------|--|
| PS4300 | Tray 2 media out sensor |
| PS4350 | Tray 1 media out sensor |
| PS4400 | Tray 2 media surface sensor |
| PS4450 | FD1 media full sensor |
| PS4500 | Fuser loop sensor |
| PS4550 | Registration sensor |
| PS4600 | separation roller rotation sensor |
| PS4650 | Fusor output sensor |
| PS4700 | Duplex feed sensor (duplex models) |
| PS4750 | Tray 1 feed sensor (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175 models) |
| SW4 | Tray 2 media size switch 1 |
| SW5 | Tray 2 media size switch 2 |

Motors, clutches, and solenoids

The following figure shows the motors, clutches, and solenoids for the pickup, feed, and delivery system:

Figure 1-24 Motors, solenoids, and clutches for pickup, feed and delivery system

Table 1-21 Motors, solenoids, and clutches

| Abbreviation | Component |
|--------------|--|
| M1 | Fuser motor |
| M2 | Drum motor |
| M3 | Lifter motor |
| SL1 | Tray 1 pickup solenoid |
| CL1 | Tray 1 feed clutch (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175 models) |

Table 1-21 Motors, solenoids, and clutches (continued)

| Abbreviation | Component |
|--------------|--|
| CL2 | Duplex feed clutch (duplex models) |
| CL3 | Tray 2 pickup clutch |
| CL4 | Duplex switchback clutch (duplex models) |

Jam detection/prevention

The printer uses sensors to detect the paper as it moves through the paper path and to report to the DC controller if the paper has jammed.

The following figure shows the location of the sensors in the paper path:

Figure 1-25 Paper path and location of sensors

Table 1-22 Paper path sensors

| Abbreviation | Component |
|--------------|--|
| PS3401 | Paper deck tray 1 feed sensor/HCI feed sensor (1x550-sheet paper deck, 3x550-sheet paper deck, 2,550-sheet paper deck, and 2,100-sheet paper deck) |
| PS3601 | PF feed sensor (550-sheet paper feeder and envelope feeder) |
| PS4400 | Tray 2 media surface sensor |
| PS4450 | FD1 media full sensor |
| PS4500 | Fuser loop sensor |
| PS4501 | Paper deck Tray 2 feed sensor (3x550-sheet paper deck and 2,550-sheet paper deck) |
| PS4550 | Registration sensor |
| PS4650 | Fuser output sensor |
| PS4700 | Duplex feed sensor (duplex models) |
| PS4750 | Tray 1 feed sensor (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175 models) |
| PS5601 | Paper deck Tray 3 feed sensor (3x550-sheet paper deck) |

The printer determines that a jam has occurred if one of the sensors detects paper at an inappropriate time. The DC controller stops the print operation and notifies the formatter.

Table 1-23 Jams that the printer detects

| Jam |
|--|
| No pick jam 1 |
| No pick jam 2 |
| No pick jam 3 |
| Pickup stay jam1 |
| Fuser delivery delay jam 1 |
| Fuser deliver stay jam 1 |
| Residual paper jam 1 |
| Residual paper jam 2 |
| Door open jam 1 |
| Fuser wrap jam 1 |
| Duplex re-pickup jam 1 |
| Delivery delay jam 1 |
| Duplex feed delay jam 1 |
| Inappropriate to the delivery path jam 2 |

Input accessories

Optional input accessories are available for the printer:

| Models | Accessories |
|--|------------------------------|
| M607/M608/M609/E60055/E60065/ E60075/E60155/E60165/E60175 | 550-sheet paper feeder |
| | Envelope feeder |
| | 2,100-sheet paper deck (HCI) |
| M631/M632/M633/E62555/E62565/ E62575/E62655/E62665/E62675 | 550-sheet paper feeder |
| | Envelope feeder |
| | 1x550-sheet paper deck |
| | 3x550-sheet paper deck |
| | 2,550-sheet paper deck |

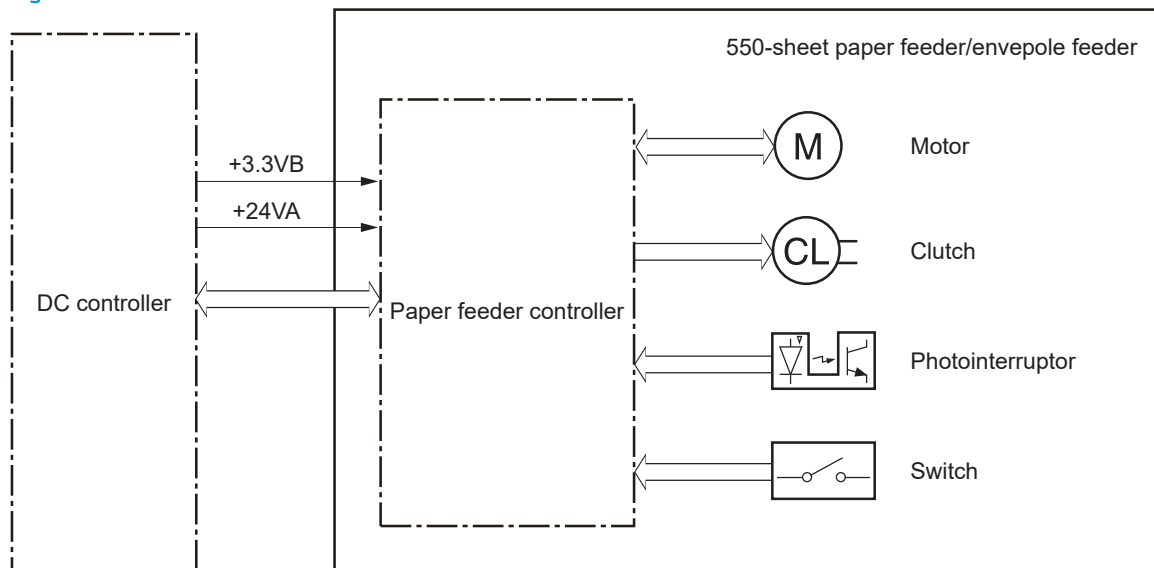

550-sheet paper feeder (PF)

The 550-sheet paper feeder (PF) is installed under the printer. It picks up paper and feeds it into the printer.

Controller

The paper feeder controller controls the operational sequence of the paper feeder.

Figure 1-26 Controller for the 550-sheet PF

Paper path

The following figure shows the paper path when the 550-sheet paper feeder is installed:

Figure 1-27 Paper path for the 550-sheet PF

Pickup and feed components

The 550-sheet paper feeder has one motor for lifting the tray and feeding paper.

Figure 1-28 Pickup and feed components for the 550-sheet PF

Table 1-24 Pickup and feed components for the 550-sheet PF

| Component type | Abbreviation | Component name |
|----------------|--------------------|--------------------------------------|
| Motors | M2 | Drum motor (included in the printer) |
| | M3601 ¹ | PF lifter motor (lifts the tray) |
| Clutches | CL3601 | PF pickup clutch |
| | CL3602 | PF feed clutch |
| Switches | SW3601 | PF media size switch 1 |
| | SW3602 | PF media size switch 2 |

| Tray media out detection | Yes |
| Tray media level detection | No |
| Multiple-feed prevention | Yes |
| Automatic delivery | Yes |

Jam detection

The printer DC controller detects jams during pickup or feed from the 550-sheet paper feeder.

2,100-sheet paper deck (HCI)

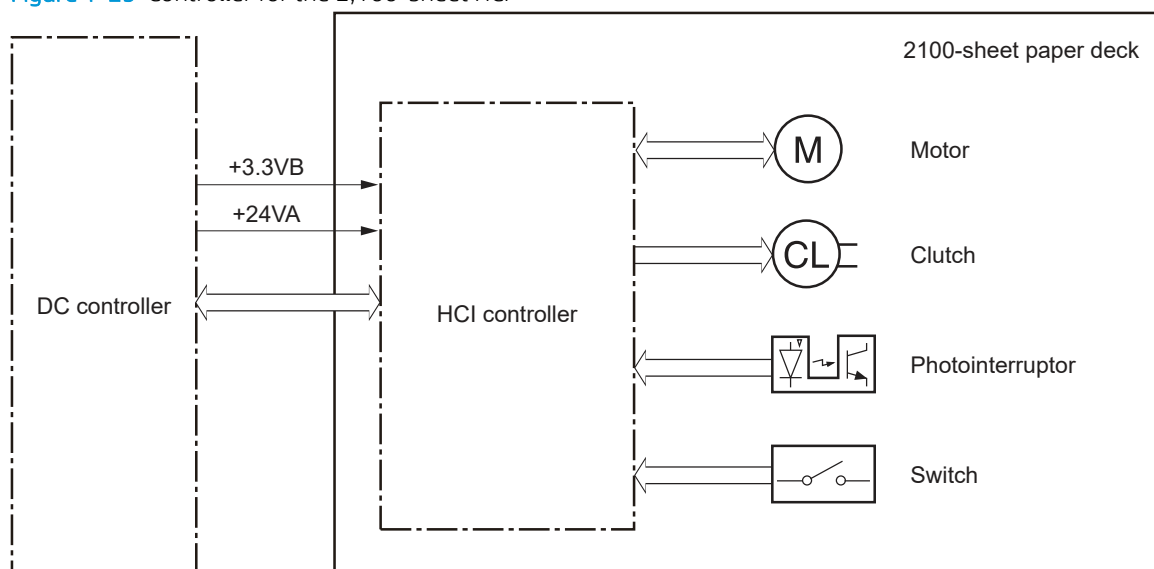

The 2,100-sheet HCI (high capacity input) paper deck is an optional accessory for the M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175 models

The HCI paper deck is installed under the printer. It picks up paper and feeds it into the printer.

Controller

The HCI controller controls the operational sequence of the HCI.

Figure 1-29 Controller for the 2,100-sheet HCI

Paper path

The following figure shows the paper path when the 2,100-sheet HCI is installed:

Figure 1-30 Paper path for the 2,100-sheet HCI

Pickup and feed components

The HCI paper deck has one motor for lifting the tray and feeding paper.

Figure 1-31 Pickup and feed components for the 2,100-sheet HCI

| Automatic delivery | Yes |

Jam detection

The printer DC controller detects jams during pickup or feed from the HCI paper deck.

1x550, 3x550, 2,550-sheet paper decks (PD)

The 1x550, 3x550, and 2,100-sheet paper decks are optional accessories for the M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675 models

The paper deck is installed under the printer. It picks up paper and feeds it into the printer.

Controller

The paper deck controller controls the operational sequence of the paper deck.

Figure 1-32 Controller for the 1x550, 3x550, and 2,550 paper decks

Paper path

The following figures show the paper path for the 1x550, 3x550, and 2,550 paper decks:

Paper deck jam detection

The printer DC controller detects jams during pickup or feed from the paper deck.

Output accessories

An optional 2-bin or 5-bin staple stacker multi bin mailbox (SSMBM) is available for the printer.

| Models | Supported SSMBM |
|--|-----------------|
| M631/M632/M633/E62555/E62565/E62575/E62655/E62665/ E62675 | 2-bin SSMBM |
| M607/M608/M609/E60055/E60065/E60075/E60155/E60165/ E60175 | 5-bin SSMBM |

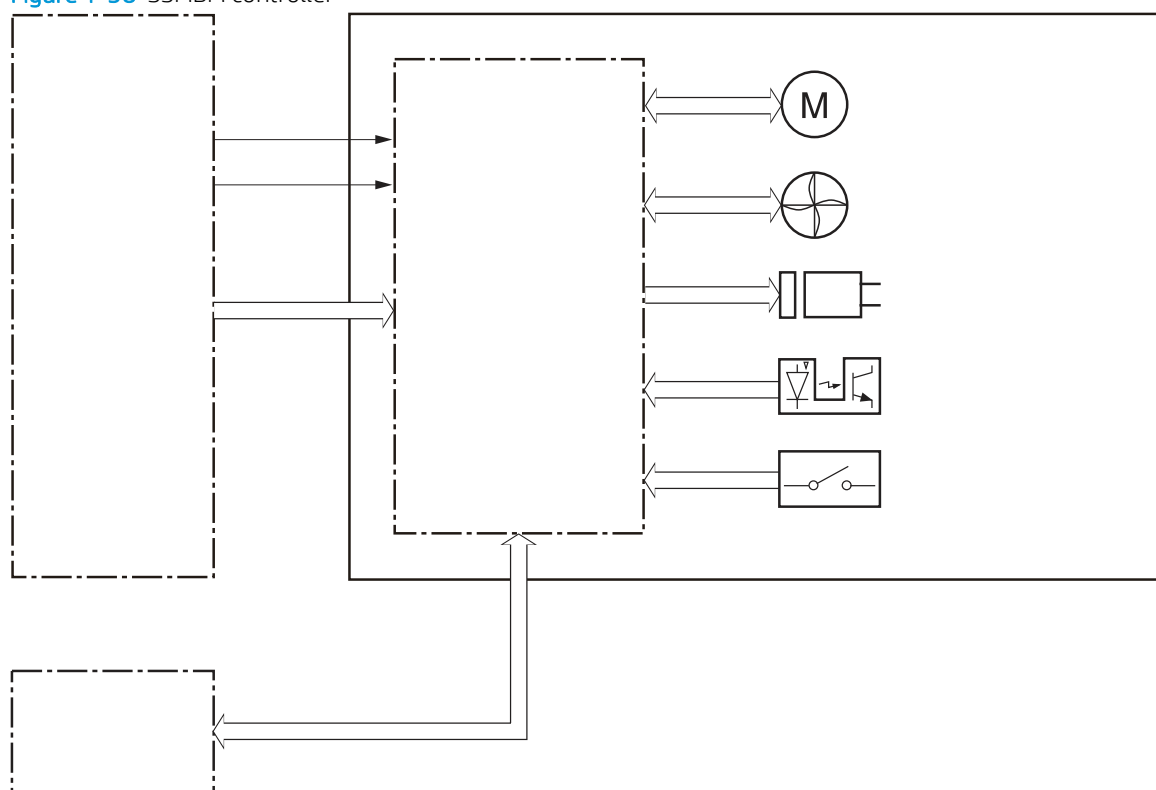

2-bin staple stacker multi-bin mailbox (SSMBM)

The 2-bin (SSMBM) is available for the M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675 models. It is installed above the output bin and delivers the paper to the output bin after stapling.

Controller

The SSMBM controller controls the operation sequence of the SSMBM.

Figure 1-38 SSMBM controller

Paper path

The following figure shows the paper path for the 2-bin SSMBM:

Figure 1-39 Paper path for the 2-bin SSMBM

Motors

The 2-bin SSMBM has six motors for the paper feed, paper alignment, and stapling.

Table 1-31 Motors for the 2-bin SSMBM

| Component | | Components driven |
|-----------|-------------------|---|
| M11 | SS output motor | Output bin 1 delivery roller, exit feed roller |
| M12 | SS feed motor | Output bin 2 delivery roller, inlet feed roller |
| M14 | Jogger motor | Jogger guide |
| M15 | Y alignment motor | Alignment roller Engages/disengages the output in 1 delivery order |
| M16 | Staple motor | Staple |
| M17 | Lifter motor | Lift up the output bin 1 |

NOTE: The SSMBM does not detect motor failures.

Fan

The SSMBM has a fan that prevents the temperature from rising in the SSMBM. The SSMBM controller detects fan failure.

Table 1-32 Fan for the 2-bin SSMBM

| Component | | Cooling area | Type | Speed |
|-----------|---------|------------------|--------|----------|

| SW11 | Staple door switch |

Jam detection

The SSMBM detects the following types of jams:

- Residual paper jam
- Feed delay jam
- Feed stay jam

The 2-bin SSMBM uses the following sensors to detect the presence of the paper and to check whether the paper is being fed correctly.

- SS exit sensor (PS102)
- Staple inlet sensor (PS103)
- SS inlet sensor (PS110)

Figure 1-42 Paper path and location of sensors for the 2-bin SSMBM

5-bin staple stacker multi bin mailbox (SSMBM)

The 5-bin (SSMBM) is available for the M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175 models. It is installed above the printer and delivers the paper to the output tray after stapling.

Controller

The SSMBM controller controls the operation sequence of the SSMBM.

Figure 1-43 SSMBM controller

Paper path

The following figure shows the paper path for the 5-bin SSMBM

Figure 1-44 Paper path for the 5-bin SSMBM

Motors

The 5-bin SSMBM has six motors for the paper feed, paper alignment, and stapling.

Table 1-36 Motors for the 5-bin SSMBM

| Component | | Components driven |
|-----------|-------------------|---|
| M11 | SS output motor | Output bin 1 delivery roller, exit feed roller |
| M12 | SS feed motor | Output bin 2 delivery roller, inlet feed roller |
| M13 | MBM feed motor | Output bin 3 delivery roller, output bin 4 delivery roller, output bin 5 delivery roller, feed roller |
| M14 | Jogger motor | Jogger guide |
| M15 | Y alignment motor | Alignment roller Engages/disengages the output in 1 delivery order |
| M16 | Staple motor | Staple |
| M17 | Lifter motor | Lift up the output bin 1 |

NOTE: The SSMBM does not detect motor failures.

Fan

The SSMBM has a fan that prevents the temperature from rising in the SSMBM. The SSMBM controller detects fan failure

Jam detection

The SSMBM detects the following types of jams:

- Residual paper jam
- Feed delay jam
- Feed stay jam

The 5-bin SSMBM uses the following sensors to detect the presence of the paper and to check whether the paper is being fed correctly.

- SS exit sensor (PS102)
- Staple inlet sensor (PS103)
- SS inlet sensor (PS110)
- MBM inlet sensor (PS119)

Figure 1-47 Paper path and location of sensors for the 5-bin SSMBM

Scanning and image capture system (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

NOTE: This section is for the M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675 printers only.

The scanner is a carriage-type platen scanner which includes the frame, glass, scan module, and a scan control board (SCB). The scanner has a sensor to detect legal-sized media and a switch to indicate when the document feeder is opened.

The document feeder and control panel are attached to the scanner. If the scanner fails, it can be replaced as a whole unit. The scanner replacement part does not include the document feeder, control panel, or SCB.

Document feeder system (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

NOTE: This section is for the M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675 printers only.

Document feed system

This section describes the following:

- Sensors in the document feeder
- Document feeder paper path
- Simplex single-pass scanning
- Electronic duplexing (e-duplex) single-pass scanning
- Deskew operation
- Document feeder hinges

The printer supports single-pass electronic duplexing (e-duplex) copy jobs. Two separate scan modules scan the front-side and back-side of an e-duplex copy job page in a single pass through the document feeder.

For the WF class, this ADF supports a smart background which auto-crops and adjusts the image extents.

Sensors in the document feeder

The document feeder contains the following sensors:

- **ADF paper present sensor:** Detects whether a document is present in the document feeder. If paper is present in the document feeder when copies are made, the printer scans the document using the document feeder. If no paper is present when copies are made, the printer scans the document using the scanner glass.
- **ADF Y (length) sensor:** Detects whether a legal-size original is present in the document feeder.
- **ADF jam cover sensor:** Detects whether the document feeder cover is open or closed.
- **ADF paper path deskew sensor:** Detects the top of the page as it enters the deskew rollers.
- **ADF paper path pick success sensor:** Detects a successful one page feed from the document feeder tray.

NOTE: This sensor uses ultrasonic sound to detect a multi-page paper feed.

- **Paper path sensor 1:** Detects the top of the page as it approaches the front-side scan module (document feeder glass).

Figure 1-48 Document feeder sensors

Table 1-41 Document feeder sensors

| Item | Description |
|---|--|
| 1 | ADF Y (length) sensor |
| 2 | ADF paper present sensor |
| 3 | ADF deskew sensor |
| 4 | Paper path sensor 1 |
| NOTE: For an e-duplex copy job, this sensor is used to activate the front-side scan module (in the scanner base) and the front-side background selector (in the document feeder), if needed. | |
| 5 | ADF jam cover sensor (open the jam access cover and insert a folded piece of paper to activate the flag) |

Document feeder paper path

Figure 1-49 Document feeder paper path

Table 1-42 Document feeder paper path

| Item | Description | Item | Description |
|------|-----------------|------|------------------------|
| 1 | Input tray | 7 | Front-side scan module |
| 2 | Pre-pick roller | 8 | Back-side scan module |

NOTE: This scan module (document feeder glass) is located in the scanner base.

Table 1-42 Document feeder paper path (continued)

| Item | Description | Item | Description |
|------|---------------------------|------|------------------------------|
| 3 | Pick roller | 9 | ADF pick success transmitter |
| 4 | ADF pick success receiver | 10 | Separator roller |
| 5 | Deskew drive roller | 11 | Exit drive roller |
| 6 | Prescan drive roller | 12 | Lift plate |

Document feeder simplex operation

Following is the basic sequence of operation for a document feeder simplex job.

1. The ADF jam cover sensor detects when the cover door is in the closed position.
2. The ADF paper present sensor activates when paper is loaded onto the input tray.
3. The feed motor rotates to raise the lift plate and starts to pick the loaded paper.
4. The ADF multi-pick (ultrasonic) sensor activates when the leading edge of the media is driven past the sensor. The printer firmware registers a successful pick operation.
5. The ADF paper path deskew activates when the leading edge of the paper passes it. The printer firmware registers the leading edge of the paper position.
6. The leading edge of the paper drives into the nip point of the deskew drive roller and the deskew pinch rollers. This creates a buckle of paper by the nip point for pick-skew correction.
7. The deskew motor rotates the deskew drive roller to pull the paper into the prescan drive roller.
8. The pick motor stops turning and allows both the pick and feed roller to turn freely while the paper is pulled in by the deskew drive roller.
9. The feed motor rotates to drive the paper into the prescan front-side sensor. The firmware registers the leading edge position of the paper as the multi-pick sensor activates.
10. The feed motor continues to rotate and drive the leading edge of the paper through the preset distance from the multi-pick sensor to the front-side scan zone. The scanner begins the scanning and data retrieval process.
11. The ADF multi-pick (ultrasonic) sensor deactivates when the trailing edge of the paper passes the sensor. The firmware registers the trailing edge of the paper position.
12. The feed motor continues to rotate and drive the trailing edge of the paper through the preset distance from the ADF multi-pick (ultrasonic) sensor to the front-side scan zone. The scanner ends the scanning and data retrieval process.
13. The feed motor continues to rotate and ejects the trailing edge of the paper into the output bin.
14. One of the following occurs:
 - If the copy job is complete, the ADF paper present sensor deactivates. The feed motor reverses rotation to raise the pick roller.
 - If the copy job is not complete, the ADF paper present sensor is active. The printer firmware detects additional pages in the input tray and the process repeats.

Document feeder e-duplex operation

Following is the basic sequence of operation for a document feeder simplex job.

NOTE: For an e-duplex copy job, the background scan operation begins immediately after the simplex sequence of operation ends.

1. The feed motor continues to drive the paper until the leading edge activates the prescan back-side sensor. The printer firmware registers the position of the leading edge of the paper.
2. The feed motor continues to rotate to drive the leading edge of the paper through the preset distance from prescan back-side sensor to the back-side background selector scan zone. The back-side background scan module begins scanning and retrieval of the data.
3. The prescan back-side sensor deactivates when the trailing edge of the paper passes it. The printer firmware registers the trailing edge of the paper position.
4. The feed motor continues to rotate to drive the trailing edge of the paper edge past the back-side background selector scan zone.
5. The feed motor continues to rotate and ejects the trailing edge of the paper into the output bin.
6. One of the following occurs:
 - If the copy job is complete, the ADF paper present sensor deactivates. The feed motor reverses rotation to raise the pick roller.
 - If the copy job is not complete, the ADF paper present sensor is active. The printer firmware detects additional pages in the input tray and the process repeats.

Deskew operation

Sliding side guides on the input tray make sure that the paper stack is correctly aligned at the center of the input tray when paper is loaded in the tray. The correct position of the loaded paper is parallel with the direction of travel into the document feeder paper path.

The document feeder further reduces paper skew due to improper loading of paper in the input tray by buckling the paper to create a paper buffer.

The document feeder aligns the leading edge of the paper parallel with the deskew drive rollers before it is driven further into the document feeder paper path.

 **NOTE:** If the page to be copied is smaller than the minimal sliding guide setting, do not use the document feeder for the copy job. Attempting to copy too small of a page using the document feeder can result in document feeder jams and/or damage to the original page. Instead, use the flatbed glass to copy the page.

Figure 1-50 Deskew operation

Document feeder hinges

The document feeder hinges allow positioning the assembly vertically above the scanner glass to accommodate the placement of books and other objects up to 25 mm (1.0 in) in height on the scanner glass. The document feeder still closes (the bottom of the ADF is kept parallel to the scanner glass) and allows the printer to operate.

The document feeder hinges provide height adjustment of 25 mm (1.0 in) when a maximum downward force of 4.5 kg (10 lb) is applied at the front edge of the assembly, with the fulcrum (such as the spine of a book) centered on the scanner glass and parallel to its long axis.

The document feeder will withstand a downward force of about 4.5 kg (10 lb) applied at the front edge center of the assembly—when the fulcrum (such as the spine of a book) is located anywhere on the scanner glass and parallel to its long axis—without breaking, deforming, detaching or experiencing performance degradation.

The document feeder hinges support the assembly in the open position and prevent the document feeder from suddenly closing in a damaging or loud manner.

The hinges can hold the document feeder static in all positions higher than 100 mm (3.93 in); measured at the front of the assembly. Less than 2.3 kg (5 lb) of force is required to open or close the document feeder.

The hinges allow the document feeder to open to an angle of between 60° and 80° from the horizontal position (this angle will not allow the printer to tip over).

Figure 1-51 Document feeder open (book mode)

Figure 1-52 Document feeder open (60° to 80°)

Manually unlock the front door (E60155/E60165/E60175 models)

If there is an issue with the front door lock, use the following procedure to manually disengage it.

- ▲ Open Tray 1 (callout 1), locate the door lock hole (callout 2), insert a small flat blade screwdriver (callout 3) into the hole, and then move the screwdriver left or right to release the lock to open the front door (callout 4).

Figure 2-1 Unlock the front door

Manually unlock the left door (E62655/E62665/E62675 models)

If there is an issue with the left door lock, use the following procedure to manually disengage it.

- ▲ Locate the left door lock hole (callout 1), insert a small flat blade screwdriver (callout 2) into the hole, and then move the screwdriver left or right to release the lock to open the left door (callout 3).

- [Pre-boot menu options](#)

Solve problems checklist

If the printer is not correctly functioning, complete the steps (in the order given) in the following checklist. If the printer fails a checklist step, follow the corresponding troubleshooting suggestions for that step. If a checklist step resolves the problem, skip the remaining checklist items.

1. If the control panel is blank or black, check the following before proceeding:
 - ☐ Check to make sure that the printer is not in Sleep mode (tap the touchscreen control panel or press a button on the LCD control panel).
 - ☐ Check the power switch button (it should be blinking). Tap the power button to bring the printer out of Sleep mode.
 - ☐ Check the power cable.
 - ☐ Check that the power is turned on.
 - ☐ Make sure that the line voltage is correct for the printer power configuration. (See the label that is on the back of the printer for voltage requirements.) If a power strip is in use, and its voltage is not within specifications, connect the printer directly into the electrical outlet. If it is already connected into the outlet, try a different outlet.

If the control panel is not responding to touch (touchscreen models), or if it appears black or blank, try the following:

 **NOTE:** The following conditions indicate that the printer has frozen while in Sleep mode. Opening a door, tapping the control panel (touchscreen control panels), or pressing a control-panel button (LCD control panels) causes the printer to wake up from Sleep mode.

- The control-panel home button LED is illuminated.
 - The power-switch LED flashes once every three to five seconds.
- a. Turn the printer power off, and then on again.
 - b. Verify that the control panel is correctly functioning by accessing the control panel diagnostics. See the Control-panel checks section of the printer *Troubleshooting Manual*.

 **TIP:** The LED on the formatter blinks if the control panel is not detected or the cables are not properly seated.

If the control panel does not respond to the diagnostic button, try the following:

- Try printing from a host computer. Does the printer print a test page?
 - Is the printer HP Embedded Web Server (EWS) accessible?
 - Turn the power off.
 - Reseat the cable connections on the bottom of the control-panel assembly and the control-panel connectors at the formatter.
 - Turn the printer power on, and then check for functionality of the control-panel by tapping the touchscreen or pressing a button on the LCD control panel.
- c. Try upgrading the firmware. If the firmware upgrade fails to resolve the problem, and the printer still freezes while in Sleep mode, elevate the case after collecting the following info:
- Try printing to the printer from a host computer. Does the printer print a page?
 - Is the printer HP Embedded Web Server (EWS) accessible?
 - Turn the printer power off, and then on again. Save the printer diagnostic file (see instructions further down in this section).
 - Try printing to the printer from a host computer. Does the printer print a page?
 - Is the printer HP Embedded Web Server (EWS) accessible?
 - Turn the printer power off, and then on again. Save the printer diagnostic file.

To save diagnostic files from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) button.
2. Open the following menus:
 - [Troubleshooting](#)
 - [Retrieve Diagnostic Data](#)
3. Follow the prompts on the control-panel display to save the data.

NOTE: The exported data might contain personally (customer) identifiable information.

To save diagnostic files from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to and select the [Support Tools](#) menu, and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to and select the [Troubleshooting](#) menu, and then press the [OK](#) button.
4. Use the down arrow ▼ button to scroll to and select the [Retrieve Diagnostic Data](#) item, and then press the [OK](#) button.
5. Follow the prompts on the control-panel display to save the data.

NOTE: The exported data might contain personally (customer) identifiable information.

- d. If the error persists, replace the control-panel assembly.
2. The control panel should indicate a [Ready](#), [Paused](#), or [Sleep mode on](#) status. If an error message displays, resolve the error.
 - Try using the Power-on checks section in the printer *Troubleshooting Manual* to solve the problem.
3. For network connection errors, check the cables.
 - a. Check the network cable connections between the printer and the computer or network port. Make sure that the connections are secure.

NOTE: The network LEDs should be illuminated and flashing.

- b. Make sure that the cables are not faulty by trying different cables, if possible.
 - c. Check the network connection. Verify that the port is active.
4. Print a configuration page. If the printer is connected to a network, an HP Jetdirect page also prints.

Print a configuration page from a touchscreen control panel

- a. From the Home screen on the printer control panel, swipe (right), and then touch the [Reports](#) button.
- b. Touch the [Configuration/Status Pages](#) item
- c. Touch [Configuration Page](#) to select it.

TIP: Multiple report pages can be selected, and then printed together.

- d. Touch the [Print](#) button to print the pages.

Print a configuration page from a LCD control panel

- a. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
- b. Use the right arrow ► button to scroll to [Reports](#), and then press the [OK](#) button.
- c. Use the down arrow ▼ button to scroll to [Configuration/Status Pages](#), and then press the [OK](#) button.
- d. Use the down arrow ▼ or ▲ buttons to scroll to [Configuration Page](#), and then press the [OK](#) button to select it.
- e. Use the down arrow ▼ and right arrow ► buttons to scroll to [Print](#), and then press the [OK](#) button to print the pages.

TIP: Multiple report pages can be selected, and then printed together.

- If the pages do not print, check that at least one tray contains paper.

TIP: Make sure that the selected paper size and type meet HP specifications. Also open the **Trays** menu on the printer control panel and verify that the tray is configured correctly for the paper type and size.

- If the page jams in the printer, follow the instructions on the control panel to clear the jam.

- If the page does not print correctly, the problem is with the printer hardware.
- If the page prints correctly, the printer hardware is working. The problem is with the host computer, with the print driver, or with the program.

5. Print a supplies status page and then check that the maintenance items below are not at their end-of-life.

 **TIP:** If a maintenance item needs to be replaced, order the part number provided below.

Print a supplies status page from a touchscreen control panel

- From the Home screen on the printer control panel, swipe (right), and then touch the [Reports](#) button.
- Touch the [Configuration/Status Pages](#) item
- Touch [Supplies Status Page](#) to select it.

 **TIP:** Multiple report pages can be selected, and then printed together.

- Touch the [Print](#) button to print the pages.

Print a supplies status page from a LCD control panel

- From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
- Use the right arrow ► button to scroll to [Reports](#), and then press the [OK](#) button.
- Use the down arrow ▼ button to scroll to [Configuration/Status Pages](#), and then press the [OK](#) button.
- Use the down arrow ▼ or ▲ buttons to scroll to [Supplies Status Page](#), and then press the [OK](#) button to select it.
- Use the down arrow ▼ and right arrow ► buttons to scroll to [Print](#), and then press the [OK](#) button to print the pages.

 **TIP:** Multiple report pages can be selected, and then printed together.

 **NOTE:** HP long-life consumables and maintenance kit life specifications are estimations. Actual individual life/yield during normal use varies depending on usage, environment, media, and other factors. Estimated life is not an implied guarantee or warrantable.

- Maintenance kit 110V/220V (includes the fuser, pickup and feed rollers, and secondary transfer roller); estimated life: 225,000 pages
 - J8J87A (110V)
 - J8J88A (220V)
- Fuser kit
 - J8J87-67901 (110V; new)
 - RM2-1256-020CN (110V; service)
 - J8J87-67901 (220V; new)
 - RM2-1257-020CN (220V; service)

- Toner cartridge
 - W1470-67901
 - W1470-67902
 - W1470-67903

 - CF327-67901 (service)
 - CF237X (new)
 - CF237-67902 (service)
 - CF237Y (new)
 - CF237-67904 (service)
 - CF237YC (new)
 - CF237-67905 (service)
 - W9004MC (new)
 - W9004-67901 (service)
 - CF237G (new)
 - CF237-67903 (service)
 - J8J96A (new)
 - J7Z09-67933 (service)
 - Document feeder roller kit; estimated life: 150,000 pages
 - J8J95A (new)
 - 5851-7202 (service)
6. Verify that the correct print driver for this printer is installed. Check the program to make sure that the print driver for this printer is used. The print driver can be downloaded from the following Web sites:
www.hp.com/support/ljM607, www.hp.com/support/ljM608, www.hp.com/support/ljM609, www.hp.com/support/ljM610, www.hp.com/support/ljM611, www.hp.com/support/ljM612, www.hp.com/support/ljE60055, www.hp.com/support/ljE60065, www.hp.com/support/ljE60075, www.hp.com/support/ljE60155, www.hp.com/support/ljE60165, www.hp.com/support/ljE60175, www.hp.com/support/ljM631MFP, www.hp.com/support/ljM632MFP, www.hp.com/support/ljM633MFP, www.hp.com/support/ljM634MFP, www.hp.com/support/ljM635MFP, www.hp.com/support/ljM636MFP, www.hp.com/support/ljE62555MFP, www.hp.com/support/ljE62565MFP, www.hp.com/support/ljE62575MFP, www.hp.com/support/ljE62655MFP, www.hp.com/support/ljE62665MFP, www.hp.com/support/ljE62675MFP.
 7. Print a short document from a different program that has worked in the past. If this solution works, the problem is with the program. If this solution does not work (the document does not print), complete these steps:

- a. Try printing the job from another computer that has the printer software installed.
- b. If the printer is connected to the network, connect the printer directly to a host computer with a USB cable. Redirect the printer to the correct port, or reinstall the software (make sure to select the new connection type).

Print menu map

To more easily navigate individual settings, print a report of the complete [Administration](#) menu.

Print the settings menu map from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Reports](#) button.
2. Touch the [Configuration/Status Pages](#) item
3. Touch [Settings Menu Map](#) to select it.

 **TIP:** Multiple report pages can be selected, and then printed together.

4. Touch the [Print](#) button to print the pages.

Print the settings menu map from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to [Reports](#), and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to [Configuration/Status Pages](#), and then press the [OK](#) button.
4. Use the down arrow ▼ or ▲ buttons to scroll to [Settings Menu Map](#), and then press the [OK](#) button to select it.
5. Use the down arrow ▼ and right arrow ► buttons to scroll to [Print](#), and then press the [OK](#) button to print the pages.

 **TIP:** Multiple report pages can be selected, and then printed together.

Print current settings pages

Printing the current settings page provides a map of the user configurable settings that might be helpful in the troubleshooting process.

Print the current settings page from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Reports](#) button.
2. Touch the [Configuration/Status Pages](#) item
3. Touch [Current Settings](#) to select it.

 **TIP:** Multiple report pages can be selected, and then printed together.

4. Touch the [Print](#) button to print the pages.

Print the current settings page from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to [Reports](#), and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to [Configuration/Status Pages](#), and then press the [OK](#) button.

4. Use the down arrow ▼ or ▲ buttons to scroll to [Current Settings](#), and then press the [OK](#) button to select it.
5. Use the down arrow ▼ and right arrow ► buttons to scroll to [Print](#), and then press the [OK](#) button to print the pages.

 **TIP:** Multiple report pages can be selected, and then printed together.

View, print and clear the event log

- [View or print the event log from the Troubleshooting menu](#)
- [View, print, or clear the event log from the Service menu](#)

Printing the event log might be helpful in the troubleshooting process. For more information, see the Interpret control-panel messages and event log entries section in the printer troubleshooting manual.

View or print the event log from the Troubleshooting menu

View or print the event log from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) button.
2. Open the following menus:
 - [Troubleshooting](#)
 - [Event log](#)
3. The event log displays on the screen. Touch the [Print](#) button to print the log.

 **NOTE:** Touch the [Done](#) button to return to the [Troubleshooting](#) menu.

View or print the event log from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to and select the [Support Tools](#) menu, and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to and select the [Troubleshooting](#) menu, and then press the [OK](#) button.
4. Use the down arrow ▼ button to scroll to and select the [Event log](#) menu, and then press the [OK](#) button.
5. The event log displays on the screen. Use the left arrow ◀ or right arrow ► buttons to select the [Print](#) item, and then press the [OK](#) button.

 **NOTE:** Select the [Done](#) item to return to the [Troubleshooting](#) menu.

View, print, or clear the event log from the Service menu

View, print, or clear the event log from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) button.
2. Touch the [Service](#) button to display the sign on screen.

 **NOTE:** Make sure that [Service Access Code](#) displays in the access type area.

3. Type in the following service access personal identification number (PIN) for the printer:
 - 05060717 (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)
 - 05063117 (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)
4. Touch [Event log](#) to display log. Touch the [Print](#) button to print the log.
5. Touch one of the following:
 - [Clear](#) (removes all log entries)
 - [Print](#) (prints the log)
 - [Done](#) (return to the [Service](#) menu)

View, print, or clear the event log from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to and select the [Support Tools](#) menu, and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to and select the [Service](#) menu, and then press the [OK](#) button.
4. On the sign-in screen, enter the following service access code for the printer (use the printer keypad):

NOTE: Make sure that [Service Access Code](#) displays in the access type area.

- 05060717 (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)
 - 05063117 (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)
5. After the PIN is entered press the [OK](#) button.
 6. Use the down arrow ▼ button to scroll to [Event Code](#), and then press the [OK](#) button.
 7. Use the left arrow ◀ or right arrow ► buttons to select from the following:

NOTE: Press the [OK](#) button after selecting an option.

- [Clear](#) (removes all log entries)
- [Print](#) (prints the log)
- [Done](#) (return to the [Service](#) menu)

Pre-boot menu options

The **Pre-boot** menus are available prior to the printer initializing.

CAUTION: The **Format Disk** option (printers with a hard-disk drive only) performs a disk initialization for the entire disk. The operating system, firmware files, and third party files (among other files) will be completely lost. HP does not recommend this action.

TIP: The Pre-boot menu can be remotely accessed by using a telnet network protocol to establish an administration connection to the printer. See [Remote Admin on page 103](#).

Open the Pre-boot menu from a touchscreen control panel

1. Touch the middle of the control-panel display when you see the 1/8 under the logo.

Figure 2-3 Open the Pre-boot menu

2. On the [Pre-boot](#) menu screen, use the following buttons to navigate the tests.

Figure 2-4 Pre-boot menu

Use this button to see more information about a selected item.

Use this button to scroll up through menu items.

Use this button to select a highlighted menu item.

Use this button to scroll down through menu items.

Use this button to go back to the previous menu.

Not used.

Use this button to exit a diagnostic test.

3. Use the arrow buttons on the touchscreen to navigate the [Pre-boot](#) menu.
4. Touch the [OK](#) button to select a menu item.

Open the Pre-boot menu from a LCD control panel

1. Press the [Cancel](#) button when you see the [1/8](#) under the logo.
2. Use the arrow buttons on the control panel to navigate the [Pre-boot](#) menu.
3. Press the [OK](#) button to select a menu item.

Cold reset using the Pre-boot menu from a touchscreen control panel

CAUTION: This procedure resets all printer configurations and settings to factory defaults (customer configurations and settings are lost).

1. Touch the middle of the control-panel display when you see the [1/8](#) under the logo.

Figure 2-5 Open the Pre-boot menu

2. Use the ▼ button to highlight the [+3:Administrator](#) item, and then touch the [OK](#) button.
3. Use the ▼ button to highlight the [+8:Startup Options](#) item, and then touch the [OK](#) button.
4. Use the ▼ button to highlight the [2 Cold Reset](#) item, and then touch the [OK](#) button to select it.
5. Touch the Home button to return to the main [Pre-boot](#) menu and highlight the [1:Continue](#) item, and then touch the [OK](#) button.

NOTE: The printer will initialize.

Cold reset using the Pre-boot menu from a LCD control panel

CAUTION: This procedure resets all printer configurations and settings to factory defaults (customer configurations and settings are lost).

1. Press the [Cancel](#) button when you see the [1/8](#) under the logo.
2. Use the down arrow ▼ button to highlight the [+3:Administrator](#) item, and then press the [OK](#) button.
3. Use the down arrow ▼ button to highlight the [+8:Startup Options](#) item, and then press the [OK](#) button.
4. Use the down arrow ▼ button to highlight the [2 Cold Reset](#) item, and then press the [OK](#) button to select it.
5. Touch the Home button to return to the main [Pre-boot](#) menu and highlight the [1:Continue](#) item, and then touch the [OK](#) button.

NOTE: The printer will initialize.

NOTE: Some of the pre-boot options in the following tables are not supported by the current version of the printer firmware and are included for information only. Future versions of firmware will support these options.

Table 2-1 Pre-boot menu options (1 of 7)

| Menu option | First level | Second level | Third level | Description |
|---------------|---------------|----------------|-------------|--|
| Continue | | | | <p>Selecting the Continue item exits the Pre-boot menu and continues the normal boot process.</p> <p>If a selection is not made in the initial menu within 30 seconds, the printer returns to a normal boot (the same as selecting Continue).</p> <p>If the user navigates to another menu, the timeout does not apply.</p> |
| Sign In | | | | Enter the administrator PIN or service PIN if one is required to open the Pre-boot menu. |
| Administrator | | | | <p>This item navigates to the Administrator submenus.</p> <p>If authentication is required (and the user is not already signed in) the Sign In prompt displays. The user is required to sign in.</p> |
| | Download | Network | | <p>This item initiates a Pre-boot firmware download process. A USB Thumbdrive option will work on all FutureSmart printers. USB or Network connections are not currently supported.</p> |
| | | USB | | |
| | | USB Thumbdrive | | |
| | Format Disk | | | <p>This item reinitializes the disk and cleans all disk partitions.</p> <p>CAUTION: Selecting the Format Disk item removes all data.</p> <p>A delete confirmation prompt is not provided.</p> <p>The system is not bootable after this action and a 99.09.67 error displays on the control panel. A firmware download must be performed to return the system to a bootable state.</p> |
| | Partial Clean | | | <p>This item reinitializes the disk (removing all data except the firmware repository where the master firmware bundle is downloaded and saved).</p> <p>CAUTION: Selecting the Partial Clean item removes all data except the firmware repository. A delete confirmation prompt is not provided.</p> <p>CAUTION: This procedure resets all printer configurations and settings to factory defaults (customer configurations and settings are lost).</p> <p>This allows a user to reformat the disk by removing the firmware image from the active directory without having to download new firmware code (printer remains bootable).</p> |

Table 2-1 Pre-boot menu options (1 of 7) (continued)

| Menu option | First level | Second level | Third level | Description |
|-------------|-----------------|--------------|-------------|---|
| | Change Password | | | Select this item to set or change the administrator password. |
| | Clear Password | | | <p>Select the Clear Password item to remove a password from the Administrator menu. Before the password is actually cleared, a message will be shown asking to confirm that the password should be cleared. Press the OK button to confirm the action.</p> <p>When the confirmation prompt displays, press the OK button to clear the password.</p> |

Table 2-2 Pre-boot menu options (2 of 7)

| Menu option | First level | Second level | Third level | Description |
|------------------------------|-------------|-----------------|--------------|--|
| Administrator (continued) | Manage Disk | Clear disk | | Select the Clear disk item to enable using an external device for job storage. Job storage is normally enabled only for the Boot device. This will be grayed out unless the 99.09.68 error is displayed. |
| | | Lock Disk | | <p>Select the Lock Disk item to lock (mate) a new secure disk to this printer.</p> <p>The secure disk already locked to this printer will remain accessible to this printer. Use this function to have more than one encrypted disk accessible by the printer when using them interchangeably.</p> <p>The data stored on the secure disk locked to this printer always remains accessible to this printer.</p> |
| | | Leave Unlocked | | <p>Select the Leave Unlocked item to use a new secure disk in an unlocked mode for a single service event. The secure disk that is already locked to this printer will remain accessible to this printer and uses the old disk's encryption password with the new disk.</p> <p>The secure disk that is already locked to this printer remains accessible to this printer.</p> |
| | | Clear Disk Pwd | | <p>Select the Clear Disk Pwd item to continue using the non-secure disk and clear the password associated with the yet-to-be installed secure disk.</p> <p>CAUTION: Data on the missing secure disk will be permanently inaccessible.</p> |
| | | Retain Password | | Select the Retain Password item to use the non-secure disk for this session only, and then search for the missing secure disk in future sessions. |
| | | Boot Device | Secure Erase | <p>Select the Secure Erase item to erase all of the data on the disk and unlock it if required.</p> <p>This might take a long time.</p> <p>NOTE: The system will be unusable until the system files are reinstalled. The ATA secure-erase command is a one-pass overwrite, which erases the entire disk including firmware. The disk remains an encrypted disk.</p> |

Table 2-2 Pre-boot menu options (2 of 7) (continued)

| Menu option | First level | Second level | Third level | Description |
|-------------|-------------|--------------|--------------|---|
| | | | Erase/Unlock | Select the Erase/Unlock item to cryptographically erase all data on the disk and unlock the disk to allow a user to gain access to it from any printer. NOTE: The system will be unusable until the system files are reinstalled. It erases the encryption key. The encryption key is erased, so the disk becomes a non-encrypted disk. |
| | | | Get Status | This item provides disk status information if any is available. |

Table 2-3 Pre-boot menu options (3 of 7)

| Menu option | First level | Second level | Third level | Description |
|---------------|-------------|-----------------|--------------|--|
| Administrator | Manage Disk | Internal Device | | Select the Internal Device item to erase the internal device or get a status about the internal device. |
| (continued) | (continued) | | Secure Erase | Select the Secure Erase item to erase all of the data on the disk and unlock it if required. This might take a long time. NOTE: The system will be unusable until the system files are reinstalled. The ATA secure-erase command erases the entire disk, including firmware. The disk remains an encrypted disk. |
| | | | Erase/Unlock | Select the Erase/Unlock item to cryptographically erase all of the data on disk and unlock the disk to allow the user to gain access to it from any printer. NOTE: The system will be unusable until the system files are reinstalled. The HP High Performance Secure Hard Disk is erased. |
| | | | Get Status | This item provides disk status information if any is available. |
| | | External Device | | Select the External Device item to erase the external device or get status about the external device. |
| | | | Secure Erase | Select the Secure Erase item to erase all of the data on the disk and unlock it if required. This might take a long time. NOTE: The system will be unusable until the system files are reinstalled. The ATA secure-erase command erases the entire disk, including firmware. The disk remains an encrypted disk. |
| | | | Erase/Unlock | Select the Erase/Unlock item to cryptographically erase all of the data on disk and unlock the disk to allow a user to gain access to it from any printer. NOTE: The system will be unusable until the system files are reinstalled. The encryption key is erased, so the disk becomes a non-encrypted disk. |
| | | | Get Status | This item provides disk status information if any is available. |

Table 2-4 Pre-boot menu options (4 of 7)

| Menu option | First level | Second level | Third level | Description |
|----------------------------------|---|------------------|-----------------|---|
| Administrator (continued) | Configure LAN NOTE: This configuration is only active when the Pre-boot menu is open. | IP Mode [DHCP] | | The network can be configured to obtain the network settings from a DHCP server or as static. |
| | | | | Use this item for automatic IP address acquisition from the DHCP server. |
| | | IP Mode [STATIC] | | Use this item to manually assign the network addresses. |
| | | | IP Address | Use this item to manually enter the IP addresses. |
| | | | Subnet Mask | Use this item to manually enter the subnet mask. |
| | | | Default Gateway | Use this item to manually enter the default gateway. |
| | | | Save | Select the Save item to save the manual settings. |

Table 2-5 Pre-boot menu options (5 of 7)

| Menu option | First level | Second level | Third level | Description |
|----------------------------------|-----------------|----------------|-------------|---|
| Administrator (continued) | Startup Options | | | Select the Startup Options item to specify options that can be set for the next time the printer is turned on and initializes to the Ready state. |
| | | Show Revision | | Not currently functional: Select the Show Revision item to allow the printer to initialize and show the firmware version when the printer reaches the Ready state. Once the printer power is turned on the next time, the Show Revision item is unchecked so that the firmware revision is not shown. |
| | | Cold Reset | | Select the Cold Reset item to clear the IP address and all customer settings. (This item also returns all settings to factory defaults.) NOTE: Items in the Service menu are not reset. |
| | | Skip Disk Load | | Select the Skip Disk Load item to disable installed third-party applications. |
| | | Skip Cal | | Select the Skip Cal item to skip the printer calibration for the very next power-initialization cycle only. |
| | | Lock Service | | CAUTION: Select the Lock Service item to lock the Service menu access (both in the Pre-boot menu and the Device Maintenance menu). Service personnel must have the administrator remove the Lock Service setting before they can open the Service menu. |
| | | Skip FSCK | | Select the Skip FSCK item to disable Chkdisk/ScanVolume during startup. |

Table 2-5 Pre-boot menu options (5 of 7) (continued)

| Menu option | First level | Second level | Third level | Description |
|------------------------------|--------------------------------|------------------------|-------------|---|
| Administrator (continued) | Startup Options (continued) | First Power | | <p>Not currently functional: This item allows the printer to initialize as if it is the first time it has been turned on.</p> <p>For example, the user is prompted to configure first-time settings like date/time, language, and other settings.</p> <p>Select this item so that it is enabled for the next time the printer power is turned on.</p> <p>When the printer power is turned on the next time, this item is unchecked so that the pre-configured settings are used during configuration, and the first-time setting prompt is not used.</p> |
| | | Embedded Jetdirect Off | | <p>Select the Embedded Jetdirect Off item to disable the embedded HP Jetdirect.</p> <p>By default this item is unchecked so that HP Jetdirect is always enabled.</p> |
| | | WiFi Accessory | | <p>Select the WiFi Accessory item to enable the wireless accessory.</p> |
| | | | | |

Table 2-6 Pre-boot menu options (6 of 7)

| Menu option | First level | Second level | Third level | Description |
|------------------------------|-------------|--------------|-------------|--|
| Administrator (continued) | Diagnostics | | | <p>Diagnostic items are useful to diagnose hardware components and their interface connections. Use these items to troubleshoot specific hardware components, and the interface between them and other components.</p> |
| | | Memory | Do Not Run | <p>Use the Do Not Run item to exclude the Memory diagnostic when executing multiple diagnostics.</p> |
| | | | Short | <p>Use the Short item to select a brief memory test.</p> <p>NOTE: This test requires about four minutes to execute.</p> |
| | | | Long | <p>Use the Long item to select an extended memory test.</p> <p>NOTE: This test requires about twenty minutes to execute.</p> |
| | | Disk | Do Not Run | <p>Use the Do Not Run item to exclude the Disk diagnostic when executing multiple diagnostics.</p> |
| | | | Short | <p>Use the Short item to select a brief firmware self-test.</p> <p>NOTE: This test requires about two or three minutes to execute.</p> |
| | | | | |
| | | | | |

Table 2-6 Pre-boot menu options (6 of 7) (continued)

| Menu option | First level | Second level | Third level | Description |
|-------------|-------------|--------------|-------------|---|
| | | | Long | Use the Long item to select an extended firmware self-test. NOTE: This test requires about sixty minutes to execute. |
| | | | Optimized | Use the Optimized item to select a test that checks the active sectors on the disk. NOTE: This test requires about thirty minutes to execute. |
| | | | Raw | Use the Raw item to select a test that checks every sector on the disk. NOTE: This test requires about fifty minutes to execute. |
| | | | Smart | Use the Smart item to select a very brief test that checks the drive self-monitoring analysis and reporting technology (SMART) status—the drive detects and reports reliability indicators to help anticipate disk failures (SMART status). |
| | | CPB | | Use the CPB item to verify the integrity of the copy processor board (CPB) and the formatter PCA connections. |
| | | Interconnect | | Use the Interconnect item to verify the integrity of the interconnect PCA (ICB) and its connections. |
| | | Run Selected | | Select the Run Selected item to execute a selected test. NOTE: If more than one test is selected, they are executed in sequence. |

Table 2-7 Pre-boot menu options (7 of 7)

| Menu option | First level | Second level | Third level | Description |
|------------------------------|--------------|--------------|-------------|---|
| Administrator (continued) | Remote Admin | Start Telnet | | The Remote Admin item allows a service technician to access to the printer Pre-boot menu remotely, and to navigate the menu selections from a remote location. IMPORTANT: A Remote Admin connection must be initiated by a person that is physically present at the printer. This person will also need to provide a randomly generated PIN to the remote service technician. NOTE: For more information about using the Remote Admin function, see Remote Admin on page 103 . |
| | | Stop Telnet | | |
| | | Refresh IP | | |

Table 2-7 Pre-boot menu options (7 of 7) (continued)

| Menu option | First level | Second level | Third level | Description |
|-----------------|----------------|--------------|-------------|---|
| | System Triage | Copy Logs | | <p>If the device will not boot to the Ready state, or the diagnostic log feature found in the Troubleshooting menu is not accessible, then use the System Triage item to copy the diagnostic logs to a USB flash drive at the next printer start up.</p> <p>The files can then be sent to HP to help diagnose the problem.</p> |
| | Change Svc PWD | | | Use this item to change the Service menu personal identification number (PIN). |
| | Reset Svc PWD | | | If the Service menu personal identification number (PIN) has been changed. Use this item to reset it to the original PIN. |
| Service Tools | Reset Password | | | Use this item to reset the Pre-boot administrator password. |
| | Subsystems | | | For manufacturing use only. Do not change these values. |
| Developer Tools | Netexec | | | |

Remote Admin

The Remote Admin feature allows remote access the printer Pre-boot menu (BIOS environment). The printer functions as a telnet server which uses the telnet networking protocol to transmit text data. Any computer (with telnet installed and enabled) can function as the telnet client to remotely display and interact with the Pre-boot menu.

IMPORTANT: While the Remote Admin function allows remote access the Pre-boot menu, for security reasons the Remote Admin connection must be initiated by a person that is physically present at the printer.

This section describes the following Remote Admin items.

- [Required software and network connection](#)
- [Connect a remote connection](#)
- [Disconnect a remote connection](#)

Required software and network connection

Before using the Remote Admin feature, make sure that the telnet network protocol is installed, and enabled, on the remote telnet client computer.

NOTE: This section describes enabling and configuring the telnet feature for computers using a Windows® operating system.

HP recommends that the telnet client computer be a Windows based system, however, there are other operating systems that support the telnet network protocol. For information about enabling and configuring the telnet network protocol for other operating systems, see the owner's manual for that operating system.

Telnet client

Enable the Windows telnet client

All computers using the Windows operating system have the telnet client installed, however, the telnet client function might not be enabled by default.

 **NOTE:** The figures and menus in this section are for the Windows 7 Enterprise® operating system. Screens and menu selections might vary slightly for other operating systems.

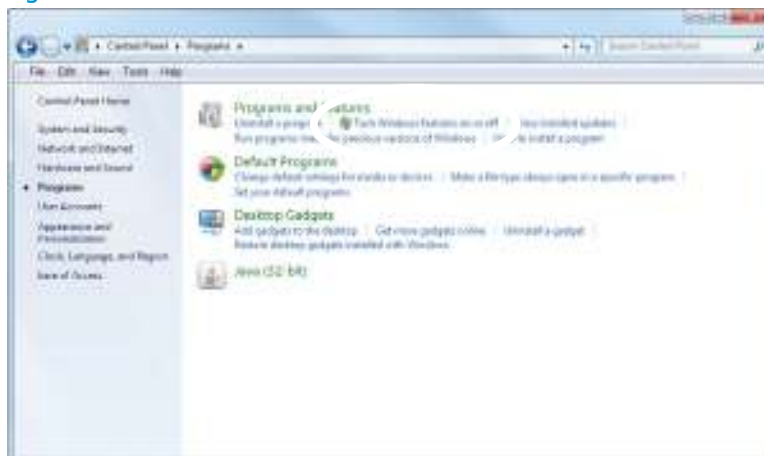

1. Use the **Start** menu to open the **Control Panel**, and then click the **Programs** item to select it.

Figure 2-6 Open the Control Panel

2. Click the **Turn Windows features on or off** item to select it.

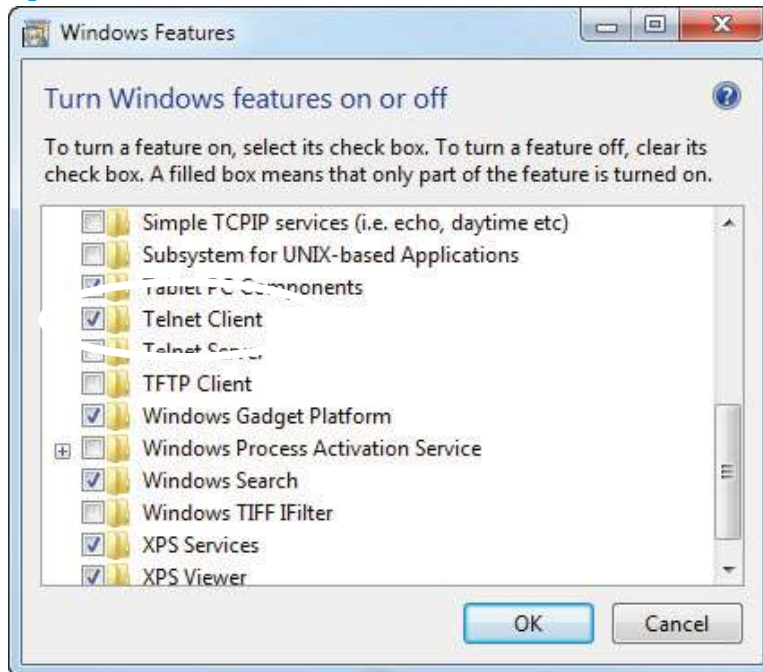

Figure 2-7 Turn Windows features on or off

3. In the **Windows Features** box, scroll down to **Telnet Client**. If the check box is not checked, click the box to select it, and then click the **OK** button.

 **TIP:** If the check box is already checked then the telnet client function is already enabled. Click the **Cancel** button.

Figure 2-8 Enable the telnet client feature

Network connection

The remote telnet client computer must have direct network access to the printer for the Remote Admin function to operate. This means that the telnet client computer must be on the same network as the printer. The Remote Admin function cannot be accessed through a network firewall or other remote access network security programs.

If a private network is not accessible, ask the network administrator to set up a virtual private network (VPN) connection to the network.

Connect a remote connection

Start the telnet server function at the printer

For security reasons the Remote Admin feature must be initiated by a person that is physically present at the printer. The following steps must be performed by a person that is physically present at the printer.

 **NOTE:** This person might need to sign in with an administrator or service password depending on how the printer is configured.

1. Turn the printer on.
2. The HP logo displays on the printer control panel. When a "1/8" with an underscore displays, touch the middle of the screen to open the **Pre-boot** menu.

3. Use the arrow buttons on the touchscreen to scroll down and highlight the **+3:Administrator** item, and then touch the **OK** button to select it.

Figure 2-9 Select the +3:Administrator item

4. Use the arrow buttons on the touchscreen to scroll down and highlight the **+A:Remote Admin** item, and then touch the **OK** button to select it.

Figure 2-10 Select the +A:Remote Admin item

5. Use the arrow buttons on the touchscreen to scroll down and highlight the **1:Start Telnet** item, and then touch the **OK** button to select it.

Figure 2-11 Select the 1:Start Telnet item

6. Do one of the following
 - If a connecting message displays briefly, go to step [7](#).

Figure 2-12 Telnet connecting message

- If an error message displays, use the steps below to identify the problem.

Figure 2-13 Telnet error message

- a. The printer network cable is not correctly connected.
 - b. The BIOS LAN settings are incorrect.
 - o The printer should be configured to use a static IP address, but is configured to use DHCP instead.
 - o The printer is configured to use a static IP address, but the IP address is incorrect.
 - c. The printer is correctly configured to use DHCP, but the DHCP server is not turned on or is malfunctioning.
7. When the printer telnet server function is initialized, the following screen appears. Use the information on this screen to connect the remote telnet client computer to the printer.

NOTE: The printer is now ready to receive remote telnet client commands.

- **IP:** The static or dynamically allocated IP address for the printer.
- **Port:** The standard telnet port (23).
- **Pin:** A randomly generated 4-digit personal identification number (PIN).

Figure 2-14 Telnet server function initialized

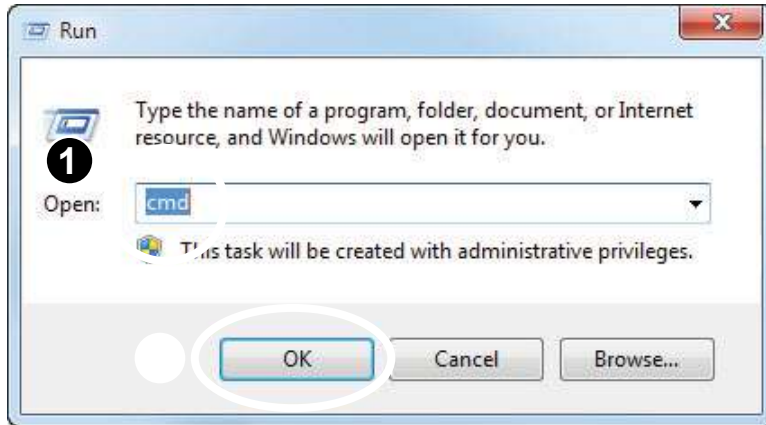

Start the telnet client function at the remote computer

The following steps establish a Remote Admin connection from a remote computer to the printer.

1. From the **Start** menu click **Run** to open a dialog box, type `cmd` in the **Open** field, and then click the **OK** button to open a Windows command window.

Figure 2-15 Open a command window

2. From any displayed directory, type `telnet` at the prompt, and then press the **Enter** key.

Figure 2-16 Start a telnet session

3. Type `<IP ADDRESS>` at the telnet prompt, and then press the **Enter** key.

 **NOTE:** For `<IP ADDRESS>`, substitute the IP address that was displayed in step [7](#) in [Start the telnet server function at the printer on page 105](#).

 **TIP:** If the telnet connection fails to establish a connection, the printer is probably behind a firewall or on a different network than the remote telnet client computer. See [Network connection on page 105](#).

Figure 2-17 Establish a telnet connection

4. Type the PIN that was displayed in step 7 in [Start the telnet server function at the printer on page 105](#) at the prompt, and then press the **Enter** key.

 **IMPORTANT:** Make sure to type the PIN correctly. After five incorrect PIN entries, the printer terminates the Remote Admin connection. The Remote Admin feature must be re-initiated at the printer. See [Start the telnet server function at the printer on page 105](#).

Figure 2-18 Enter the PIN

5. The following screen displays when the correct PIN is entered and the Remote Admin connection is successful. For information about the Pre-boot menu and options, see [Pre-boot menu options on page 93](#).

 **NOTE:** Because a Remote Admin connection is an unsecure telnet network protocol connection, the following Pre-boot menu items are disabled for the remote telnet client computer.

- The +3:Administrator menu 4:Change Password item.
- The +3:Administrator menu 5:Clear Password item.
- The +3:Administrator menu 6:Disk Manage item.

Figure 2-19 Remote Admin window

Disconnect a remote connection

The Remote Admin connection can be terminated from the printer control panel or the remote telnet client computer.

 **NOTE:** The following procedure describes terminating a Remote Admin connection from the remote telnet client computer.

1. From the Pre-boot main menu, use the arrow buttons on the keyboard to scroll down to the **+3:Administrator** item, and then press the **Enter** key.

Figure 2-20 Access the administrator menu

2. Use the arrow buttons on the keyboard to scroll down to the **+A:Remote Admin** item, and then press the **Enter** key.

Figure 2-21 Access the remote admin menu

3. Use the arrow buttons on the keyboard to scroll down to the **2:Stop Telnet** item, and then press the **Enter** key. The Remote Admin connection between the printer and the remote telnet client computer terminates.

 **IMPORTANT:** The printer remains in the Pre-boot menu. Have the person that is physically present at the printer do the following:

- Touch the **Home** button to return to the main Pre-boot menu and highlight the **1:Continue** item, and then touch the **OK** button. The printer will continue to initialize.

Figure 2-22 Terminate the telnet connection

Troubleshooting process

- [Determine the problem source](#)
- [Power subsystem](#)
- [Control panel checks \(touchscreen models\)](#)

Determine the problem source

When the printer malfunctions or encounters an unexpected situation, the printer control panel alerts the user to the situation. This section contains a pre-troubleshooting checklist and a troubleshooting flow chart to filter out many possible causes of the problem. Use the pre-troubleshooting checklist to gather information about the problem from the customer. Use the troubleshooting flowchart to help diagnose the root cause of the problem. The remainder of this chapter provides steps for correcting problems.

- Use the pre-troubleshooting check list to gather information about the problem from the customer. See [Pre-troubleshooting checklist on page 112](#).
- Use the troubleshooting flowchart to pinpoint the root cause of hardware malfunctions. The flowchart provides guides to the section of this chapter that contain steps to correct the malfunction. See [Troubleshooting flowchart on page 113](#).

Before beginning any troubleshooting procedure, check the following issues:

- Are supply items within their rated life?
- Does the configuration page reveal any configuration errors?

NOTE: The customer is responsible for checking supplies and for using supplies that are in good condition.

Pre-troubleshooting checklist

The following table includes basic questions to ask the customer to quickly help define the problem(s).

| General topic | Questions |
|---------------|---|
| Environment | <ul style="list-style-type: none">• Is the printer installed on a solid, level surface (+/- 1°)?• Is the power-supply voltage within ± 10 volts of the specified power source?• Is the power-supply plug inserted in the printer and the wall outlet (not a surge protector)?• Is the operating environment within the specified parameters?• Is the printer exposed to ammonia gas, such as that produced by diazo copiers or office cleaning materials? NOTE: Diazo copiers produce ammonia gas as part of the copying processes. Ammonia gas (from cleaning supplies or a diazo copier) can have an adverse effect on some printer components (for example, the toner cartridge or cartridges OPC).• Is the printer exposed to direct sunlight?• Is the printer exposed to an air conditioning or heating vent that can cause temperature fluctuations? |

| General topic | Questions |
|-------------------------|---|
| Media | <ul style="list-style-type: none"> Does the customer use only supported media? Is the media in good condition (no curls, folds, or distortion)? Is the media stored correctly and within environmental limits? |
| Input trays | <ul style="list-style-type: none"> Is the amount of media in the tray within specifications? Is the media correctly placed in the tray? Are the paper guides aligned with the stack (no gaps in the stack or excessive pressure causing the stack to bow)? Is the tray (or trays) correctly installed in the printer? |
| Toner cartridge | <ul style="list-style-type: none"> Is the toner cartridge (or cartridges) installed correctly? |
| Transfer unit and fuser | <ul style="list-style-type: none"> Are the transfer unit and fuser installed correctly? <p>NOTE: For printers with an intermediate transfer belt (ITB), is the ITB installed correctly and fully seated. If a replacement ITB was installed, was all of the packing materials removed?</p> |
| Covers | <ul style="list-style-type: none"> Is the toner cartridge door closed? |
| Condensation | <ul style="list-style-type: none"> Does condensation occur following a temperature change (particularly in winter following cold storage)? If so, wipe affected parts dry or leave the printer on for 10 to 20 minutes. Was a toner cartridge (or cartridges) opened soon after being moved from a cold to a warm room? If so, allow the toner cartridge (or cartridges) to sit at room temperature for 1 to 2 hours. |
| Miscellaneous | <ul style="list-style-type: none"> Check for and remove any non-HP components (toner cartridges, memory modules, and EIO cards) from the printer. Remove the printer from the network and ensure that the failure is associated with the printer before beginning troubleshooting. For any color print-quality issues (color printers only), calibrate the printer, and then print a diagnostics page to verify print quality. |

Troubleshooting flowchart

This flowchart highlights the general processes to follow to quickly isolate and solve printer hardware problems.

Each row depicts a major troubleshooting step. Follow a “yes” answer to a question to proceed to the next major step. A “no” answer indicates that more testing is needed. Go to the appropriate section in this chapter, and follow the instructions there. After completing the instructions, go to the next major step in this troubleshooting flowchart.

Table 2-8 Troubleshooting flowchart

| | | | |
|-----------------------------|--|------|---|
| 1 Power on | Is the printer on and does a readable message display? | | Follow the power-on troubleshooting checks. See Power subsystem on page 114 . After the control panel display is functional, see step 2. |
| | Yes ↓ | No → | |
| 2 Control panel messages | Does an error message appear on control-panel display? | | After the errors have been corrected, go to step 3. |

Table 2-8 Troubleshooting flowchart (continued)

| | No ↓ | Yes → | |
|-------------------------------|---|-------|--|
| 3 Event log | Open the Troubleshooting menu and view or print an event log to see the history of errors with this printer. Does the event log print? | | If the event log does not print, check for error messages. If paper jams inside the printer, see the jams section of the printer service manual. If error messages display on the control panel when trying to print an event log, see the control panel message document (CPMD) for this printer. NOTE: The CPMD is not provided in this service manual. The CPMD for this printer is available on the HP Service Access Workbench (SAW) Web site. Go to http://h41302.www4.hp.com/km/saw/home.do . After successfully printing and evaluating the event log, see step 4. |
| | Yes ↓ | No → | |
| 4 Information pages | Open the Reports menu and print the configuration pages to verify that all the accessories are installed. Are all the accessories installed? | | If accessories that are installed are not listed on the configuration page, remove the accessory and reinstall it. After evaluating the configuration pages, see step 5. |
| | Yes ↓ | No → | |
| 5 Print quality | Does the print quality meet the customer's requirements? | | Compare the images with the sample defects in the print quality troubleshooting guide. See the printer specific image defects section in the printer troubleshooting service manual. After the print quality is acceptable, see step 6. |
| | Yes ↓ | No → | |
| 6 Interface | Can the customer print successfully from the host computer? | | Verify that all I/O cables are connected correctly and that a valid IP address is listed on the HP Jetdirect configuration page. If error messages display on the control panel when trying to print an event log, see the control-panel message section of the printer troubleshooting service manual. When the customer can print from the host computer, this is the end of the troubleshooting process. |
| | Yes. This is the end of the troubleshooting process. | No → | |

Power subsystem

Power-on checks

The basic printer functions should start when the printer is connected into an electrical outlet and the power switch is pushed to the *on* position. If the printer does not start, use the information in this section to isolate and solve the problem.

If the control panel display remains blank, random patterns display, or asterisks remain on the control panel display, perform power-on checks to find the cause of the problem.

NOTE: For touchscreen control panel models, also try the control panel checks in the printer *Troubleshooting Manual*.

Power-on troubleshooting overview

Startup sounds are heard when the printer power is turned and is operating correctly. If these sounds are heard, the dc side of the power supply is functioning.

If startup sounds are heard, the next troubleshooting step is to isolate print engine, formatter, and control panel problems. Perform an engine test. If the formatter is damaged, it might interfere with the engine test. If the engine-test page does not print, try removing the formatter, and then performing the engine test again. If the engine test is then successful, the problem is almost certainly with the formatter, the control panel, or the cable that connects them.

 **NOTE:** Depressing, and holding down, the test-page switch causes the printer to continually print test pages. Releasing the switch stops the test page continuous printing.

Troubleshooting power on problems

1. Verify that power is available to the printer. If the printer is plugged into a surge protector or uninterruptible power supply (UPS), remove it, and then plug the printer directly into a known operating wall receptacle (make sure that the wall receptacle provides the correct voltage and current for the printer).

Unplug any other devices on the same circuit that the printer is using.

2. Try another known operating wall receptacle and a different power cord.
3. Listen for startup noises (for example, fans or motors) and look for illuminated lights on the control panel and formatter LEDs.

 **NOTE:** Operational fans, motors, and control-panel lights indicate the following:

- AC power is present at the printer.
 - The power supply is providing either or both 24 Vdc and 5 Vdc voltages.
 - The DC controller microprocessor is functioning.
-

4. Check the following:
 - a. Turn the printer on, and then listen for startup noises. If normal startup noises are heard, go to step c below.
 - b. If normal startup noises are not heard, turn the printer off, and then remove any installed accessories (for example, envelope feeders, paper feeders, or output accessories).

Turn the printer on, and then listen for startup noises. If normal startup noises are heard, the problem might be with one of the accessories.
 - c. Turn the printer off and then remove the power connector from the formatter. Turn the printer on, and then use a small pointed object (like a paper clip) to depress the engine test-page switch located on the rear or right side (depending on printer model) of the printer (near the formatter).

 **NOTE:** The test page can only use Tray 2 as the paper source, so make sure that paper is loaded in Tray 2.

- d. If the engine test page prints, the print engine is operating normally. Replace the formatter.

 **NOTE:** **M631dn only:** If the engine test page does not print, turn the printer off, remove the embedded MultiMedia Card (eMMC), and then try the engine test again. If the page prints, the problem might be the eMMC.

- e. If after replacing the formatter normal startup noises are still not heard, replace the DC controller.

 **NOTE:** If the error persists after replacing these assemblies, elevate using the Standard Support process.

Troubleshooting a blank control panel

A blank control panel display can be caused by one or more of the following:

- No power to the printer.
 - Power supply has tripped (over-current/over-voltage/temperature issue).
 - Check the cables and connections on the formatter and at the control panel.
 - Faulty components installed on the formatter (for example, memory DIMM or disk drive).
 - Faulty control panel.
 - **M631dn only:** Make sure that the embedded MultiMedia Card (eMMC) PCA is fully seated.
 - For touchscreen models, use the control panel checks section in the printer *Troubleshooting Manual* to troubleshoot the control panel
-
1. Verify that power is available to the printer. If the printer is plugged into a surge protector or uninterruptible power supply (UPS), remove it, and then plug the printer directly into a known operating wall receptacle (make sure that the wall receptacle provides the correct voltage and current for the printer).
 2. Make sure that the power switch is in the *on* position.
 3. Make sure that startup noises are heard, which indicates that the power supply is operational.
 4. Make sure that the control-panel display wire harness is connected (at both ends).
 5. Make sure that the formatter connectors are fully seated. Make sure the power switch is in the on position, and then verify that the heartbeat LED is blinking.
 6. Remove any external solutions, and then try to turn the printer on again.
 7. If the control panel display is blank, but startup sounds are heard after the printer power is turned on, try printing an engine-test page to determine whether the problem is with the control-panel display, formatter, or other printer assemblies.

- a. Remove the formatter.
- b. Use a small pointed object to depress the test-page switch located on the rear of the printer.

NOTE: The test page can only use Tray 2 as the paper source, so make sure that paper is loaded in Tray 2.

- c. If the engine test page prints, the print engine is operating normally (a failed engine test print page does not necessarily indicate that the print engine or DC controller is defective).
- d. Use the control-panel diagnostics to test the control panel. See the control panel checks section in the printer *Troubleshooting Manual*. If the error persists, proceed to step [8](#).
8. If the print engine appears to be correctly operating (the engine test page successfully printed) and the control panel is still blank, replace the power supply.
9. If after replacing the power supply normal startup noises and lights are still not present, replace the DC controller.

NOTE: If the error persists after replacing these assemblies, elevate using the Standard Support process.

Control panel checks (touchscreen models)

NOTE: The printer includes a diagnostic test mode for the touchscreen control panels. Diagnostic tests are not available for the LCD control panel.

- [Control-panel diagnostics \(touchscreen models\)](#)
- [Control panel diagnostic flowcharts \(touchscreen models\)](#)

Control-panel diagnostics (touchscreen models)

- [Touchscreen diagnostic mode \(touchscreen models\)](#)
- [Control-panel system diagnostics \(touchscreen models\)](#)

Touchscreen diagnostic mode (touchscreen models)

Use the diagnostics in this section to test the control-panel hardware and embedded firmware. These tests are useful for checking control-panel functionality independent of the printer control-panel system diagnostics. To test the control panel using the system diagnostics, see [Control-panel system diagnostics \(touchscreen models\) on page 125](#).

1. **Small touchscreen only:** Locate the diagnostic-tests access button on the back of the control panel.

Figure 2-23 Diagnostic-tests access button (small touchscreen)

2. **Small touchscreen only:** Press the diagnostics-access button. Repeatedly pressing the button cycles through the available diagnostics.

NOTE: A pen, pencil, or other small blunt object is needed to press the button.

TIP: When pressed, the button illuminates green.

Figure 2-24 Press the diagnostics-access button (small touchscreen)

3. **Large touchscreen only:** Locate the diagnostic-tests access button on the back of the control panel.

Figure 2-25 Diagnostic-tests access button (large touchscreen)

4. **Large touchscreen7 only:** Press the diagnostics-access button. Repeatedly pressing the button cycles through the available diagnostics.

Figure 2-26 Press the diagnostics-access button (large touchscreen)

5. A yellow screen appears (after the first press of the button) indicating that the control-panel firmware is version A (a magenta screen indicates version B firmware).

 **NOTE:** If a different color appears on the screen, elevate using the Standard Support process to determine the firmware version.

 **TIP:** After 4 seconds of inactivity, the diagnostic mode times out and is exited.

Figure 2-27 Control-panel version A yellow screen

6. Touch the screen to cycle the screen through the following:
 - A red screen.

- A green screen.

- A blue screen.

- Five brightness levels of a white screen.

- A final black screen.

💡 **TIP:** When the final black screen displays, press the Home button to cycle through the diagnostic screens and test its functionality.

7. Pressing the diagnostic-tests button with the black screen displayed, exits the diagnostic mode.

Control-panel system diagnostics (touchscreen models)

Use the diagnostics in this section to test the control-panel hardware and display using the printer firmware system diagnostics.

- [Open the control-panel system diagnostic tests](#)
- [Screen test](#)
- [Touch test](#)
- [SoftKey test](#)
- [Backlight test](#)
- [Sound test](#)
- [Keyboard test \(M632z/633z only\)](#)
- [Version](#)

Open the control-panel system diagnostic tests

Open the control-panel system diagnostic tests from a touchscreen control panel

1. Turn the printer power off, and then on again.
2. Touch the middle of the control-panel display when you see the 1/8 under the logo.

Figure 2-28 Open the Pre-boot menu

3. On the [Pre-boot](#) menu screen, use the following buttons to navigate the tests.

Figure 2-29 Pre-boot menu

Use this button to see more information about a selected item.

Use this button to scroll up through menu items.

Use this button to select a highlighted menu item.

Use this button to scroll down through menu items.

Use this button to go back to the previous menu.

Not used.

Use this button to exit a diagnostic test.

4. Use the [down arrow ▼](#) button to scroll to [+3 Administration](#), and then press the [OK](#) button to select it.

Figure 2-30 Access the administration menu

5. Use the [down arrow ▼](#) button to scroll to [+E CP Diagnostics](#), and then press the [OK](#) button to select it.

 **NOTE:** An administrator password might be required to continue.

Figure 2-31 Access the diagnostics menu

Screen test

1. Open the control-panel system diagnostic tests. See [Open the control-panel system diagnostic tests on page 125](#).
2. With 1 Screen Test highlighted, press the OK button to select it.

Figure 2-32 Open the screen test

3. The blue vertical gradient screen appears.

Figure 2-33 Blue vertical gradient screen

4. Touch the touchscreen to scroll though the remaining touchscreen test screens.

 **NOTE:** Touch the Home button to exit the test.

Green vertical gradient

Red vertical gradient

Blue horizontal gradient

Green with black horizontal interlaced

Red with black horizontal interlaced

Blue with black vertical interlaced

Green with black vertical interlaced

Red with black vertical interlaced

Black with white center

White with black center

Checkerboard

Multicolor stripes

Blue green grid meshing

Touch test

1. Open the control-panel system diagnostic tests. See [Open the control-panel system diagnostic tests on page 125](#).
2. Use the [down arrow ▼](#) button to scroll to [2 Touch Test](#), and then press the [OK](#) button to select it.

Figure 2-34 Open the touch test

3. Use your finger to touch the white grid on the display.

Figure 2-35 Touch the white grid

4. A mark appears on the grid where it was touched.

 **NOTE:** Touch the Home button to exit the test.

Figure 2-36 Verify the mark

SoftKey test

1. Open the control-panel system diagnostic tests. See [Open the control-panel system diagnostic tests on page 125](#).
2. Use the [down arrow ▼](#) button to scroll to [3 SoftKey Test](#), and then press the [OK](#) button to select it.

Figure 2-37 Open the softkey test

3. When prompted, touch the Home button.

Figure 2-38 Touch the Home button

4. If the test is successful, the following screen appears on the display.

 **NOTE:** Touch the screen to exit the test.

Figure 2-39 Successful test

Backlight test

1. Open the control-panel system diagnostic tests. See [Open the control-panel system diagnostic tests on page 125](#).
 2. Use the [down arrow ▼](#) button to scroll to [4 Backlight Test](#), and then press the [OK](#) button to select it.
- After selecting the [4 Backlight Test](#), the screen automatically dims, and then returns to full brightness.

 **NOTE:** Touch any key to exit the test.

Figure 2-40 Open the backlight test

Sound test

1. Open the control-panel system diagnostic tests. See [Open the control-panel system diagnostic tests on page 125](#).
2. Use the [down arrow ▼](#) button to scroll to [5 Sound Test](#), and then press the [OK](#) button to select it.

After selecting the [5 Sound Test](#), the printer emits a series of audible tones.

NOTE: Touch any key to exit the test.

Figure 2-41 Open the sound test

Keyboard test (M632z/633z only)

 **IMPORTANT:** The control-panel system diagnostic tests include a [6 Keyboard Test](#) item. This test is **not** valid for printers that do not have a pull out keyboard installed, even though this option is present in the control-panel system diagnostic tests menu.

If the [6 Keyboard Test](#) is opened on the M632z or 633z printers, the printer power must be turned off to exit the test.

HP does not recommend turning the printer power off during the control-panel system diagnostic tests.

1. Open the control-panel system diagnostic tests. See [Open the control-panel system diagnostic tests on page 125](#).
2. Use the [down arrow ▼](#) button to scroll to [6 Keyboard Test](#), and then press the [OK](#) button to select it.

Figure 2-42 Do not open the keyboard test

3. When prompted, touch the H key on the keyboard or the Home button to exit the test.

Version

1. Open the control-panel system diagnostic tests. See [Open the control-panel system diagnostic tests on page 125](#).
2. Use the [down arrow ▼](#) button to scroll to [7 Version](#), and then press the [OK](#) button to select it.

 **NOTE:** Touch any key to exit the test.

Select [7 Version](#) to view the following types of information:

 **NOTE:** The following types of information are for the control panel only, not the printer.

- Panel ID
- Hardware (version)
- Firmware (version)
- KB Hw (version)
- KB Firm (version)
- LCD Vendor
- Touch Controller Version

Figure 2-43 Open the sound test

Control panel diagnostic flowcharts (touchscreen models)

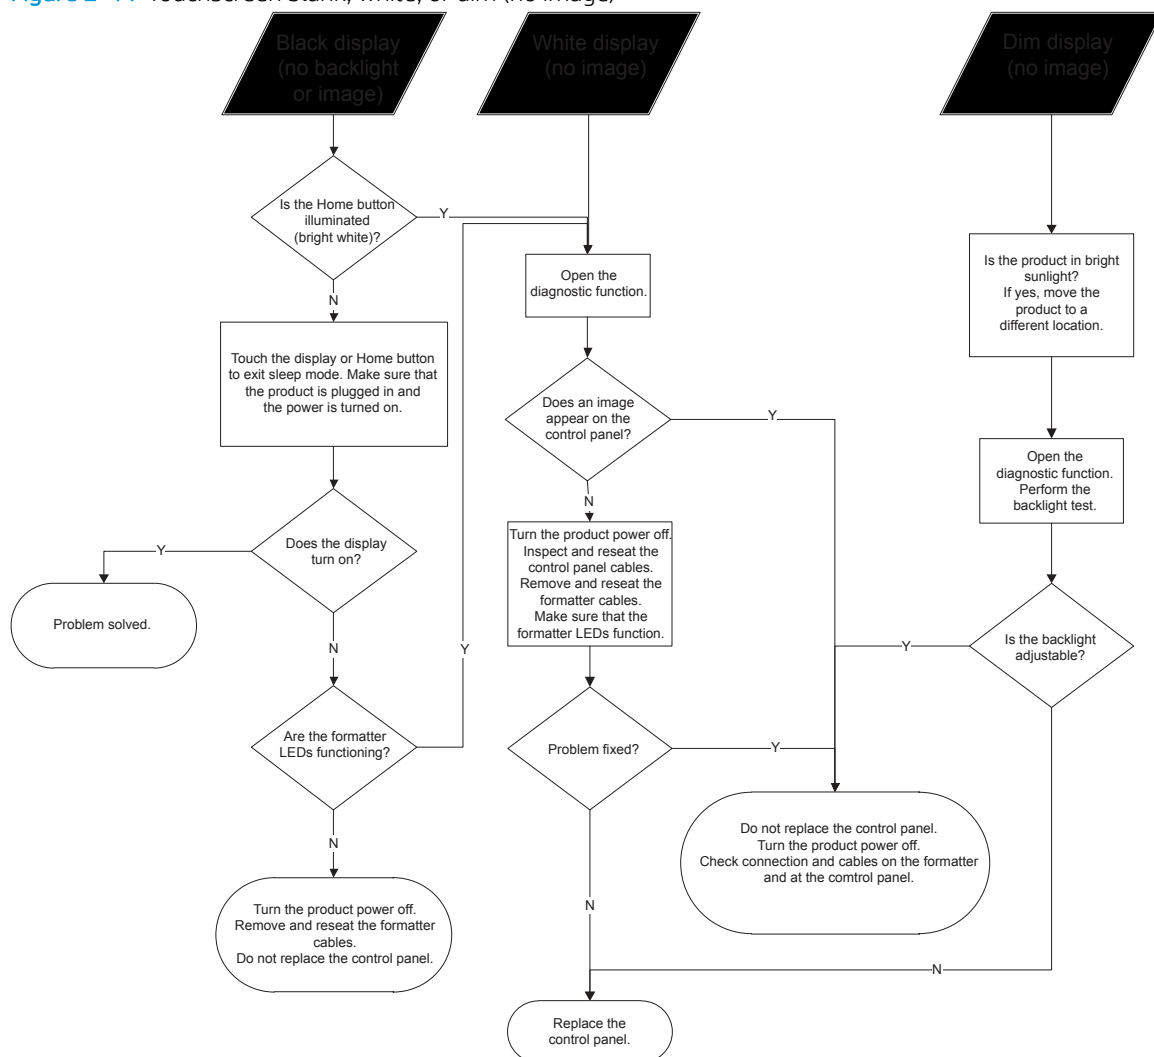

Use the flowcharts in this section to troubleshoot the following control panel problems.

- Touchscreen is blank, white, or dim (no image).
- Touchscreen is slow to respond or requires multiple presses to respond.
- Touchscreen has an unresponsive zone.
- No control panel sound.
- [Home](#) button is unresponsive.
- Hardware integration pocket (HIP) is not functioning (control panel functional).

Touchscreen black, white, or dim (no image)

 **NOTE:** To open the diagnostic function, press the button on the back of the control panel.

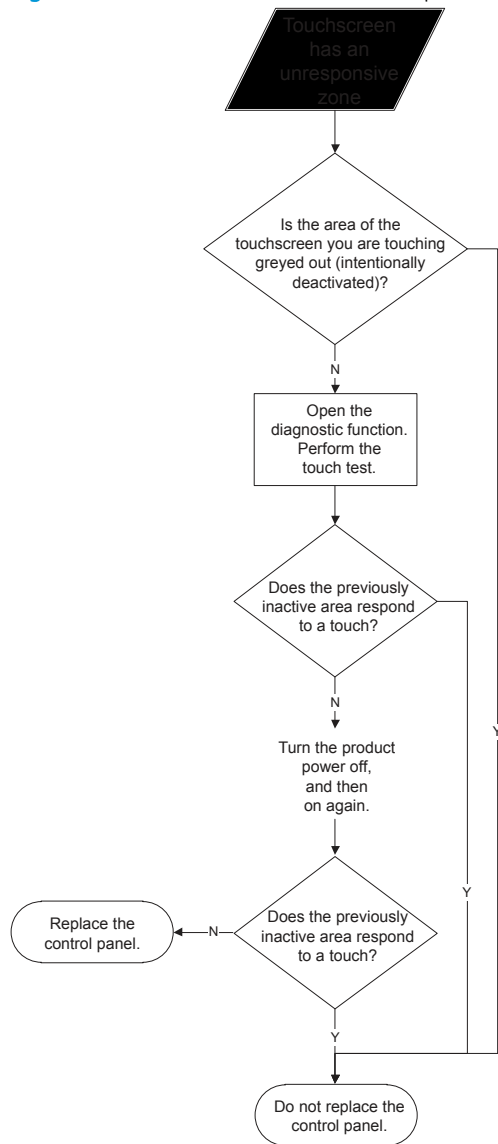

Figure 2-44 Touchscreen blank, white, or dim (no image)

Touchscreen has an unresponsive zone

 **NOTE:** To open the diagnostic function, press the button on the back of the control panel.

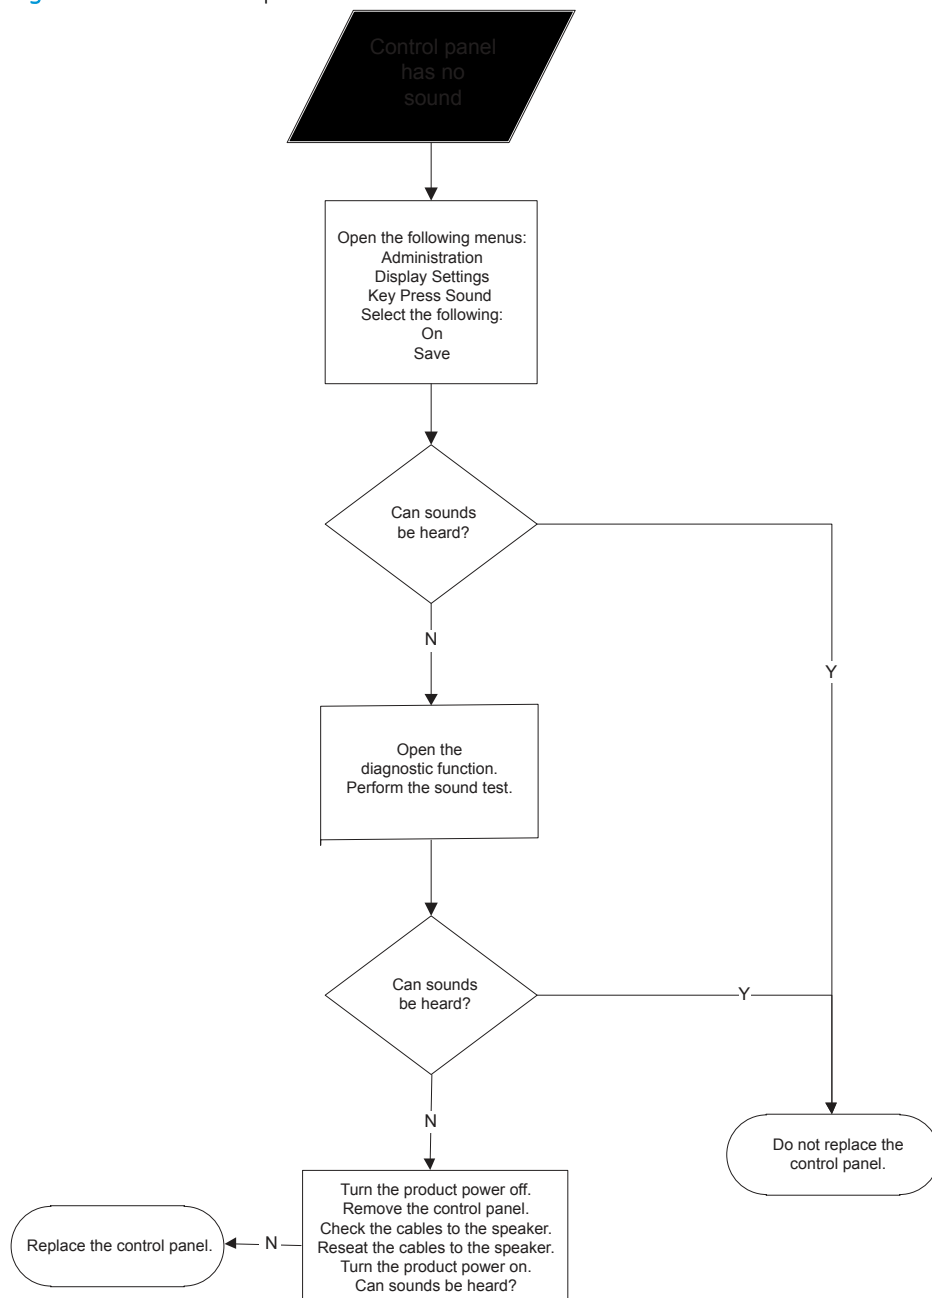

Figure 2-45 Touchscreen has an unresponsive zone

No control panel sound

 **NOTE:** To open the diagnostic function, press the button on the back of the control panel.

Figure 2-46 No control panel sound

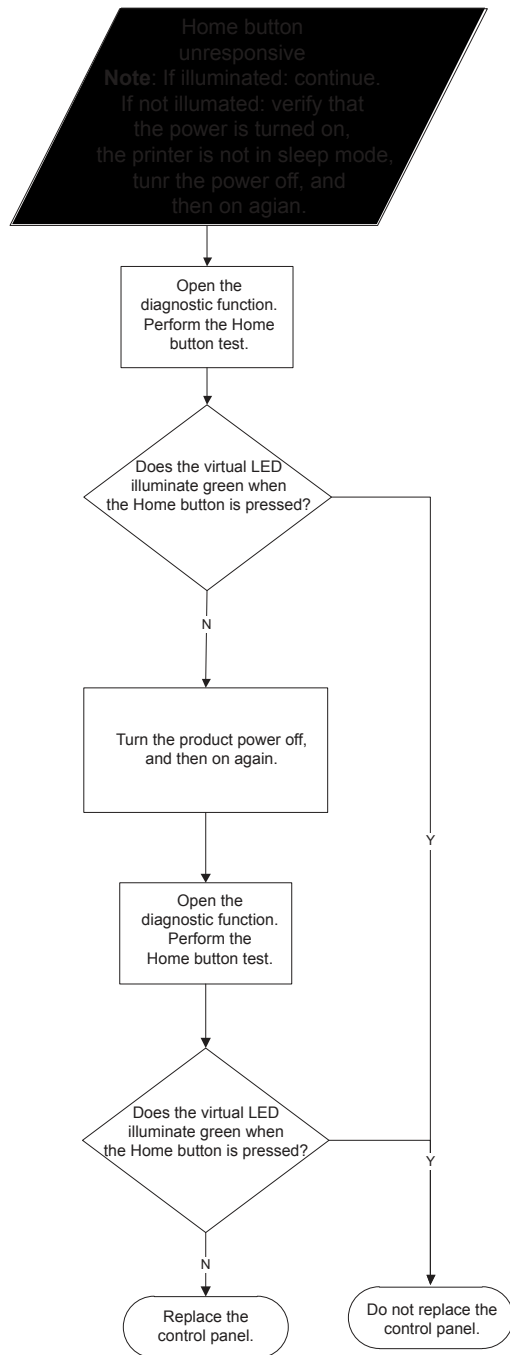

Home button is unresponsive

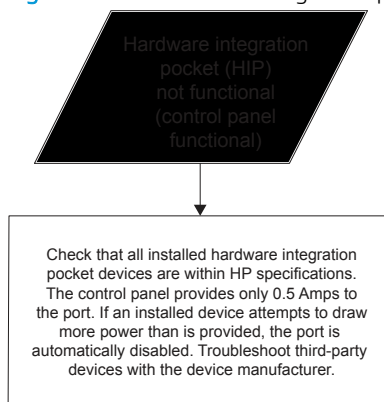

NOTE: To open the diagnostic function, press the button on the back of the control panel.

Figure 2-47 Home button is unresponsive

Hardware integration pocket (HIP) is not functioning (control panel functional)

Figure 2-48 Hardware integration pocket (HIP) is not functioning (control panel functional)

Tools for troubleshooting

NOTE: This section describes tools that can help to solve printer problems.

- [Individual component diagnostics](#)
- [Diagrams](#)
- [Internal test and information pages](#)
- [Control-panel menus](#)
- [Control panel message document \(CPMD\)](#)

Individual component diagnostics

Tools for troubleshooting: LED diagnostics

LED, engine, and individual diagnostics can identify and troubleshoot printer problems.

Understand lights on the formatter

Three LEDs on the formatter indicate that the printer is functioning correctly.

- | | |
|---|-------------------|
| 1 | Heartbeat LED |
| 2 | HP Jetdirect LEDs |

Heartbeat LED

The heartbeat LED indicates that the formatter is functioning correctly. While the printer is initializing after it is turned on, the LED blinks rapidly, and then turns off. When the printer has finished the initialization sequence, the heartbeat LED pulses on and off.

The following list describes the heartbeat LED operation while the printer is executing the firmware boot process.

If after initialization, the heartbeat LED is not solid green, see [Table 2-9 Heartbeat LED, printer operational on page 148](#).

- Green
 - Blinking: The printer is correctly functioning.
 - Solid: The FW has not yet booted.
- Amber

- Blinking: The control panel is not detected.
- Solid: The FFC between the formatter and DC controller is not connected or is damaged.
- Red
 - Solid: Valid SPI code; there is a problem releasing ASIC and running the BIOS
 - Solid: BIOS initiates PROSAC to change the LED from red to green.
 - Solid: PROSAC is not running (No ROM or SPI code).
 - Blinking: Valid SPI code not found.
- Off: No 5V or 3.3V PROSAC power.

The following table describes the heartbeat LED operation when the printer completes the firmware boot process and is in the **Ready** state.

Table 2-9 Heartbeat LED, printer operational

| LED color | Description |
|-----------|---|
| Green | <ul style="list-style-type: none"> • Normal operation <ul style="list-style-type: none"> – Formatter is operating normally – Firmware is operating normally – Control panel is connected |
| Yellow | <ul style="list-style-type: none"> • Formatter cannot connect to the control panel <ul style="list-style-type: none"> – Check control panel connections – Verify control panel functionality |
| Red | <ul style="list-style-type: none"> • Formatter error or failure <ul style="list-style-type: none"> – Serial peripheral interface (SPI) flash memory boot error – Power on self-test (formatter) failed – Diagnostic (formatter) failed |
| Off | <p>TIP: The heartbeat LED is off if the power cable is disconnected, the printer power switch is in the off position, or the printer is in Sleep Mode.</p> <ul style="list-style-type: none"> • Firmware or system freeze <ul style="list-style-type: none"> – Check control panel for an error message – Control panel failure <p>NOTE: This condition is not usually caused by a formatter failure. Turn the power off, and then on again. If the error persists, perform a firmware upgrade.</p> |

HP Jetdirect LEDs

The embedded HP Jetdirect print server has two LEDs. The yellow LED indicates network activity, and the green LED indicates the link status. A blinking yellow LED indicates network traffic. If the green LED is off, a link has failed.

For link failures, check all the network cable connections. In addition, try to manually configure the link settings on the embedded print server by using the printer control-panel menus.

1. From the [Home](#) screen on the printer control panel, scroll to and touch the [Administration](#) button.
2. Open the following menus:
 - [Network Settings](#)
 - [Embedded Jetdirect Menu](#)
 - [Link Speed](#)
3. Select the appropriate link speed, and then touch the [OK](#) button.

Tools for troubleshooting: Engine diagnostics

The printer contains extensive internal engine diagnostics that help in troubleshooting print quality, paper path, noise, assembly, and timing issues.

Engine test button

To verify that the printer engine is functioning, print an engine test page. Use a small pointed object to depress the test-page switch located on the rear side of the printer. The test page should have a series of lines that are parallel to the short end of the page. The test page can use only Tray 2 as the paper source, so make sure that paper is loaded in Tray 2.

 **NOTE:** Depressing, and holding down, the test-page switch causes the printer to continually print test pages. Releasing the switch stops the test page continuous printing.

 **TIP:** Depending on the printer model, the engine test button is located on the right side or rear side of the printer.

Figure 2-49 Engine test button (1 of 2)

Figure 2-50 Engine test button (2 of 2)

Defeating interlocks

Different tests can be used to isolate different types of issues. For assembly or noise isolation, run the diagnostic test when the toner cartridge door or rear door is open.

Defeating the door interlocks allows observation of the paper pick operation (and view the page enter registration).

⚠ WARNING! Be careful when performing printer diagnostics to avoid risk of injury. Only trained service personnel should open and run the diagnostics with a door open. Never touch any of the power supplies when the printer is turned on.

Defeat the toner cartridge door interlocks

1. Open the toner cartridge door.

2. Insert a folded piece of paper into the slots.

 **TIP:** Fold a stiff piece of paper, for example a business card or index card, into two 10 mm (.375 in) strips, and insert the strips into the slots for the cartridge door logic switches.

Figure 2-51 Defeat the toner cartridge door interlocks

Defeat the right or rear door interlock

 **NOTE:** For the M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675 printers, this is the rear door.

1. Open the right or rear door.

2. Insert a folded piece of paper into the slot.

 **TIP:** Fold a stiff piece of paper, for example a business card or index card, into two 10 mm (.375 in) strips, and insert the strips into the slot for the cartridge door logic switches.

Figure 2-52 Defeat the right or rear door interlock

Disable cartridge check

Use this diagnostic test to print internal pages or send an external job to the printer when the toner cartridge is removed or exchanged. Supply errors are ignored while the printer is in this mode. When the printer is in this mode, access the troubleshooting menus and print internal pages (the print quality pages will be the most useful). This test can be used to isolate problems, such as noise, and to isolate print-quality problems that are related to the toner cartridge.

NOTE: Do not remove or exchange the toner cartridge until after beginning the disable cartridge check diagnostic.

Disable cartridge check from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) button.
2. Open the following menus:
 - [Troubleshooting](#)
 - [Diagnostic Tests](#)
 - [Disable Cartridge Check](#)
3. Follow the prompts to perform a [Disable Cartridge Check](#).

Disable cartridge check from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to and select the [Support Tools](#) menu, and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to and select the [Troubleshooting](#) menu, and then press the [OK](#) button.
4. Use the down arrow ▼ button to scroll to and select the [Diagnostic Test](#) menu, and then press the [OK](#) button.
5. Use the down arrow ▼ button to scroll to and select [Disable Cartridge Check](#), and then press the [OK](#) button.
6. Follow the prompts to perform a [Disable Cartridge Check](#).

Tools for troubleshooting: Paper path and sensor diagnostic tests

- [Paper path page](#)
- [Paper path sensors test](#)
- [Manual sensor tests](#)

Paper path page

This page contains the following type of information:

- Paper path usage
- Scanner usage (MFP printers)
- Paper type usage
- Print mode usage (sides)

View or print the paper path page from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) item.
2. Open the following menus:
 - [Troubleshooting](#)
 - [Paper Path Page](#)

NOTE: The paper path page can only be viewed on the large touchscreen printers. For small touchscreen printers, print the pages.

3. Touch [Print](#) to print the pages, or touch [Cancel](#) to return to the [Troubleshooting](#) menu.

Print the paper path page from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to and select the [Support Tools](#) menu, and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to and select the [Troubleshooting](#) menu, and then press the [OK](#) button.
4. Use the down arrow ▼ button to scroll to and select the [Paper Path Page](#) item, and then press the [OK](#) button.
5. Use the left arrow ◀ or right arrow ► buttons to select the [Print](#) item, and then press the [OK](#) button.

NOTE: Touch the [Cancel](#) button to return to the [Troubleshooting](#) menu.

Paper path sensors test

This test displays the status of each paper-path sensor and allows viewing of sensor status while printing an internal test page.

Access the paper path sensors test from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) button.
2. Open the following menus:
 - [Troubleshooting](#)
 - [Diagnostic Tests](#)
 - [Paper Path Sensor Test](#)
3. Select from the following:
 - [Options](#) (configure the [Paper Path Sensor Test](#))

NOTE: Depending on the printer model, not all options are available.

- [Number of copies](#)
- [Paper tray](#) (source to print from)
- [Output Sides](#) (simplex or duplex testing)

- Staple (model dependant)
- Output bin (model dependant)
- Done (return to the Troubleshooting menu)
- Start (begins the test)

Access the paper path sensors test from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the Print menu.
2. Use the right arrow ► button to scroll to and select the Support Tools menu, and then press the OK button.
3. Use the down arrow ▼ button to scroll to and select the Troubleshooting menu, and then press the OK button.
4. Use the down arrow ▼ button to scroll to and select the Diagnostic Test menu, and then press the OK button.
5. Use the down arrow ▼ button to scroll to and select Paper path Sensor Test, and then press the OK button.
6. Use the left arrow ◀ or right arrow ► buttons to select from the following:
 - Options (configure the Paper Path Sensor Test)

NOTE: Depending on the printer model, not all options are available.

- Number of copies
- Paper tray (source to print from)
- Output Sides (simplex or duplex testing)
- Staple (model dependant)
- Output bin (model dependant)
- Done (return to the Troubleshooting menu)
- Start (begins the test)

Manual sensor tests

The [Manual Sensor Test](#) screen shows the sensor number, sensor name, sensor state (active or inactive), and the number of times the sensor has been toggled (activated).

Access the manual sensor test from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) button.
2. Open the following menus:
 - [Troubleshooting](#)
 - [Diagnostic Tests](#)
 - [Manual Sensor Test](#)
3. Select from the following:
 - [All sensors](#) (choose the group of sensors to test)
 - [Input tray sensors](#)
 - [Output bin sensors](#)
 - [Engine sensors](#)
 - [Done](#) (return to the [Troubleshooting](#) menu)
 - [Reset](#) (reset the selected sensor's state)

Access the manual sensor test from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to and select the [Support Tools](#) menu, and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to and select the [Troubleshooting](#) menu, and then press the [OK](#) button.
4. Use the down arrow ▼ button to scroll to and select the [Diagnostic Test](#) menu, and then press the [OK](#) button.
5. Use the down arrow ▼ button to scroll to and select [Manual Sensor Test](#), and then press the [OK](#) button.
6. Use the left arrow ◀ or right arrow ► buttons to select from the following:
 - [Options](#) (configure the [Paper Path Sensor Test](#))
 - [All sensors](#) (choose the group of sensors to test)

- [Input tray sensors](#)
 - [Output bin sensors](#)
 - [Engine sensors](#)
- [Done](#) (return to the [Troubleshooting](#) menu)
- [Reset](#) (reset the selected sensor's state)
- [Done](#) (return to the [Troubleshooting](#) menu)
- [Start](#) (begins the test)

Tools for troubleshooting: Print/stop test

Use this diagnostic test to isolate the cause of problems such as image-formation defects and jams within the engine. During this test, stop the paper anywhere along the printer paper path. The test can be programmed to stop printing internal pages or an external print job when the paper reaches a certain position. The test can also be programmed to stop from 0 to 60,000 ms.

Access the print/stop test from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) button.
2. Open the following menus:
 - [Troubleshooting](#)
 - [Diagnostic Tests](#)
 - [Print/Stop Test](#)
3. Touch the [Stop next print job](#) check box to enable the [Print/Stop Test](#).
4. Touch the [Delay ms \(0 to 60000\)](#) box (a 10-key keypad appears), and then enter the time to stop printing delay (in milliseconds).
5. To perform the test, send a print job (the job will stop at the specified time).

NOTE: Touch the [Done](#) button to return to the [Troubleshooting](#) menu.

Access the print/stop test from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to and select the [Support Tools](#) menu, and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to and select the [Troubleshooting](#) menu, and then press the [OK](#) button.
4. Use the down arrow ▼ button to scroll to and select the [Diagnostic Test](#) menu, and then press the [OK](#) button.
5. Use the down arrow ▼ button to scroll to and select [Print/Stop Test](#), and then press the [OK](#) button.
6. Use the up arrow ▲ or down arrow ▼ buttons to scroll to the [Stop next print job](#) item, and then press the [OK](#) button to select the checkbox (enables the test).
7. Use the down arrow ▼ button to scroll to the [Delay ms \(0 to 60000\)](#) item, and then use the printer 10-key keypad to enter the time to stop printing delay (in milliseconds).
8. To perform the test, send a print job (the job will stop at the specified time).

NOTE: Use the arrow buttons to scroll to the [Done](#) button, and then press [OK](#) to return to the [Troubleshooting](#) menu.

Common print stop test timing millisecond (ms) stops

- **600 ms:** The page has passed the registration area and the leading edge is just short of entering the fuser. The image can be seen on the paper but has not fused. If the defect is visible then the cause might be the drum, transfer roller, or a roller prior to, or in, the registration area.
- **1200 ms:** The leading edge is about 18mm (0.71 in) into the top output bin. The image has gone through the fuser. If the defect was not visible prior to the fuser, and is visible after the fuser, then the fuser is the likely cause of the print quality defect. Inspect the fuser for damage, debris, or labels stuck to the fuser. Replace the fuser. Discuss media specifications and proper care of the fuser with the customer.

Tools for troubleshooting: Component tests

Use the procedure below to test various printer mechanical and electromechanical assemblies.

Individual component diagnostics

This test activates individual parts independently to isolate problems.

Each component test can be performed once or repeatedly. If the [Repeat](#) option is enabled, the test cycles the component on and off. This process continues until the test automatically terminates.

NOTE: The cartridge door interlocks must be defeated to run the component tests. A control-panel display prompt appears to indicate removing the toner cartridge, during certain tests.

Access the individual component diagnostics from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) button.
2. Open the following menus:
 - [Troubleshooting](#)
 - [Diagnostic Tests](#)
 - [Component Test](#)

3. Select from the following:

- [Drum Motor >](#) (displays the components list)

NOTE: The list of components depending on the printer model.

- [Repeat](#) (select this item to continuously run the test)

NOTE: The test continues until the it stops automatically.

- [Done](#) (return to the [Troubleshooting](#) menu)
- [Start](#) (starts the component test)

Access the individual component diagnostics from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to and select the [Support Tools](#) menu, and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to and select the [Troubleshooting](#) menu, and then press the [OK](#) button.
4. Use the down arrow ▼ button to scroll to and select the [Diagnostic Test](#) menu, and then press the [OK](#) button.
5. Use the down arrow ▼ button to scroll to and select [Component Test](#), and then press the [OK](#) button.
6. Use the left arrow ◀ or right arrow ► buttons to select from the following:
 - [Drum Motor >](#) (displays the components list)

NOTE: The list of components depending on the printer model.

- [Repeat](#) (select this item to continuously run the test)

NOTE: The test continues until the it stops automatically.

- [Done](#) (return to the [Troubleshooting](#) menu)
- [Start](#) (starts the component test)

Tools for troubleshooting: Scanner tests (MFP)

Use these diagnostic tests to manually test the scanner optical carriage.

Continuous scan test (MFP)

This section lists describes accessing the [Continuous Scan](#) test.

Access the continuous scan test from a MFP touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) button.
2. Open the following menus:
 - [Troubleshooting](#)
 - [Diagnostic Tests](#)
 - [Continuous Scan](#)
3. Select from the following:
 - [2-sided](#) (duplex test)
 - [Done](#) (return to the [Troubleshooting](#) menu)
 - [Start](#) (starts the test)

Tools for troubleshooting: Scanner tests (MFP)

Use these diagnostic tests to manually test the fax module.

Run fax test (MFP)

This section lists describes accessing the [Run Fax Test](#) procedure.

Access the run fax test from a MFP touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) button.
2. Open the following menus:
 - [Troubleshooting](#)
 - [Diagnostic Tests](#)
 - [Run Fax Test](#)
3. Select from the following:
 - [Done](#) (return to the [Troubleshooting](#) menu)
 - [Start](#) (starts the test)

Diagrams

Use the diagrams in this section to identify printer components.

Internal test and information pages

Print a configuration page

NOTE: Depending on the model, up to six pages print when printing a configuration page.

- Configuration Page
- Wireless HP Jetdirect (2 pages)
- Embedded HP Jetdirect
- Fax Accessory Page (2 pages)

Print the configuration page from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Reports](#) button.
2. Touch the [Configuration/Status Pages](#) item
3. Touch [Configuration Page](#) to select it.

TIP: Multiple report pages can be selected, and then printed together.

4. Touch the [Print](#) button to print the pages.

Print the configuration page from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to [Reports](#), and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to [Configuration/Status Pages](#), and then press the [OK](#) button.
4. Use the down arrow ▼ or ▲ buttons to scroll to [Configuration Page](#), and then press the [OK](#) button to select it.
5. Use the down arrow ▼ and right arrow ► buttons to scroll to [Print](#), and then press the [OK](#) button to print the pages.

TIP: Multiple report pages can be selected, and then printed together.

Finding important information on the configuration pages

Certain information, such as the firmware date codes, the IP address, and the email gateways, is especially helpful while servicing the printer. This information is on the various configuration pages.

Table 2-52 Important information on the configuration pages

| Type of information | Specific information | Configuration page |
|---|---|--|
| Firmware date codes When performing a remote firmware upgrade procedure, all of these firmware components are upgraded. | DC controller | Look on the configuration page, under “Device Information.” |
| | Firmware datecode | Look on the configuration page, under “Device Information.” |
| | HP embedded Jetdirect firmware version. | Look on the Embedded HP Jetdirect page, under “General Information.” |

Table 2-52 Important information on the configuration pages (continued)

| Type of information | Specific information | Configuration page |
|--|--|---|
| Accessories and internal storage All optional devices that are installed on the printer should be listed on the main configuration page. In addition, separate pages print for the optional paper handling devices and the fax accessory. These pages list more-detailed information for those devices. | Embedded HP Jetdirect Total RAM | Look on the configuration page, under "Installed Personalities and Options." Shows model and ID. Look on the configuration page, under "Memory." |
| Additional sheet feeder and paper deck accessories. | Additional 550-sheet feeders | Look on the main configuration page, under "Paper Trays and Options". |
| Engine cycles and event logs Total page counts and maintenance kit counts are important for ongoing printer maintenance. The configuration page lists only the three most recent errors. To see a list of the 50 most recent errors, print an event log from the Diagnostics menu. | Engine cycles | Look on the configuration page, under "Device Information". |
| Event-log information | Event-log information | Look on the configuration page, under "Event Log." |
| IP address | Wireless connectivity information | Look on the wireless page, under "IPv4". |

Print a fuser test page

Use the fuser test page to evaluate problems with fuser print quality.

Print a fuser test page from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) button.
2. Open the following menus:
 - [Troubleshooting](#)
 - [Print Quality Pages](#)
3. Touch the [Fuser Test Page](#) checkbox, and then touch the [Print](#) button.

Print a fuser test page from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to and select the [Support Tools](#) menu, and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to and select the [Troubleshooting](#) menu, and then press the [OK](#) button.
4. Use the down arrow ▼ button to scroll to and select the [Print Quality Pages](#) menu, and then press the [OK](#) button.
5. Use the down arrow ▼ button to scroll to [Fuser Test Page](#), and then press the [OK](#) button.
6. Use the down arrow ▼ and the right arrow ► buttons to select the [Print](#) item, and then press the [OK](#) button.

Figure 2-109 Fuser test page

Copy menu (MFP models only)

Touchscreen printers: At the printer control panel, touch the [Copy](#) button.

LCD printers: Use the arrow buttons to scroll to the [Copy](#) button, and then press the [OK](#) button.

Table 2-53 [Copy](#) menu (MFP models only)

| First level | Second level | Third level | Fourth-level | Description |
|--|--|--|--------------|---|
| Sides | Original Sides | | | Use this item to indicate whether the original document is printed on one or both sides, and whether the copies should be printed on one or both sides. |
| | 1-sided | | | |
| | 2-sided | | | |
| | NOTE: For 2-sided, the Pages flip up option is available. | | | |
| | Output Sides | | | Use this item top select the source tray for the copy job. NOTE: The A3 Tray 2 or the A3 Tray 3 is the default tray. |
| | 1-sided | | | |
| 2-sided | | | | |
| NOTE: For 2-sided, the Pages flip up option is available. | | | | |
| Quick Sets and Defaults | Load | | | Use this item to determine create or load copy quick sets. |
| | Save | | | |
| Options | Sides | Original Sides | | Use this item to indicate whether the original document is printed on one or both sides, and whether the copies should be printed on one or both sides. |
| | | 1-sided | | |
| | | 2-sided | | |
| | | NOTE: For 2-sided, the Pages flip up option is available. | | |
| | | Output Sides | | |
| | | 1-sided | | |
| | | 2-sided | | |
| | | NOTE: For 2-sided, the Pages flip up option is available. | | |
| | Staple | None | | Use to enable/disable stapling and position the staple on the page. |
| | | Top left angled | | |
| | | Top right angled | | |

Table 2-53 Copy menu (MFP models only) (continued)

| First level | Second level | Third level | Fourth-level | Description |
|-------------|---------------------|--|--------------|--|
| | Scan Mode | Standard Document Book Mode 2-sided ID | | Use to describe the type of original. NOTE: Use the 2-sided ID option to automatically place the images from a two sided identification card (like a drivers licence for example) on a single page. |
| | Reduce/Enlarge | Automatic NOTE: When Automatic is selected, the Include Margins option is available. Manual NOTE: When Manual is selected, use the % dialog box to enter the percentage for document scaling (25 to 400 percent). | | Use this to automatically or manually scale the original to fit on the output page. |
| | Original Size | Choose from a list of sizes. | | Use this to describe the size or sizes of the originals. |
| | Paper Selection | Paper Size Paper Type Paper Tray | | Select from a list of paper sizes, types, and available trays for the copy job. NOTE: The list of trays depends on the printer configuration. |
| | Booklet | Booklet Format (check box) NOTE: When Booklet Format is selected, the Borders on each page option is available. | | Use this item to set the copy job to a booklet format. |
| | Content Orientation | Automatically detect Portrait Landscape | | Use this to automatically detect, or manually describe the original content orientation.. |
| | Pages per Sheet | One Two Four (right, then down) Four (down, then right Add page borders | | Use this to print the original to a single page or to print multiple originals to a single page. NOTE: Add page borders is only available when printing multiple originals on a single page. |

Table 2-53 Copy menu (MFP models only) (continued)

| First level | Second level | Third level | Fourth-level | Description |
|-------------|-----------------------|---|--------------|--|
| | Image Adjustment | Sharpness Darkness Contrast Background Cleanup | | Use the sliders to adjust the values for these items. |
| | Optimize Text/Picture | Text Mixed Printed picture Photograph | | Use this to improve print quality. |
| | Edge-to-Edge | Normal (recommended) Edge-to-Edge | | Use to avoid shadows that can appear along the edges of copies when the original document is printed close to the edges. Combine with the Reduce/Enlarge feature to ensure that the entire page is printed on the copies When the Edge-to-Edge feature is turned on, the product minimizes margins and prints as close to the edge of the paper as possible. |
| | Erase Edges | Apply same width to all edges (check box) Top Edge Bottom Edge Left Edge Right Edge | | Use this to remove blemishes, such as dark borders or staple marks, by cleaning the specified edges of the scanned image. In each of the text boxes enter the measurements, in inches, for how much of the top edge, bottom edge, left edge, and right edge to clean. |
| | Collate | Collate on Collate off | | If you are making more than one copy, select the Collate on option to assemble the pages in the correct order in each set of copies. |
| | Multi-feed Detection | On Off | | When enabled, scanning stops if HP EveryPage technology detects multiple pages being fed at one time. When disabled, this feature will not stop scanning when multi-feeds are detected. |

Scan menu (MFP models only)

To display: At the printer control panel, touch the [Scan](#) button.

NOTE: Some items below (for example, [Scan to Email](#)) require printer configuration of the feature. If not already configured, follow the prompts on the control-panel display.

Table 2-54 Scan menu (MFP models only)

| First level | Description |
|--|--|
| Scan to Email | Use this to scan the original and attach it to an email. |
| Scan to Fax | Use this to scan the original and send it as a fax. |
| Scan to Network Folder | Use this to scan the original and save it to a network folder. |
| Scan to USB Drive | Use this to scan the original and save it to a USB drive. |
| Scan to Job Storage | Use this to scan the original and save it to the printer memory. |
| Scan to SharePoint | Use this to scan the original and save it to a SharePoint site. |

Print menu

Touchscreen printers: At the printer control panel, touch the [Print](#) button.

LCD printers: Use the arrow buttons to scroll to the [Print](#) button, and then press the [OK](#) button.

Table 2-55 [Print](#) menu

| First level | Second level | Third level | Fourth-level | Description |
|--|----------------------------|-------------|--------------|--|
| Print from Job Storage | Choose | | | Use this to view and select jobs stored in the printer memory. |
| | Print List | | | Use this to print the list of jobs stored in the printer memory. |
| | Print | | | Use this to print the selected job. |
| Print from USB Drive | Choose | | | Use this to view and select jobs stored on a USB drive. |
| | Print | | | Use this to print the selected job. |

HP JetAdvantage menu (MFP models only)

To display: At the printer control panel, touch the [HP JetAdvantage](#) button.

NOTE: To use this feature, the printer must be connected to a network. Go to <http://www8.hp.com/us/en/solutions/business-solutions/printingsolutions/privateprint.html> for more information.

Table 2-56 [HP JetAdvantage](#) menu (MFP models only)

| First level | Description |
|--------------------------|--|
| E-mail | Enter the email address associated with a HP JetAdvantage account. |
| Password | Enter the password associated with a HP JetAdvantage account. |
| Log in | Use this to access a HP JetAdvantage account. |

Quick Sets menu (MFP models only)

Use the HP Embedded Web Server (EWS) to configure [Quick Sets](#) for the printer.

To display: At the printer control panel, touch the [Quick Sets](#) button.

Contacts menu (fax models only)

To display: At the printer control panel, touch the [Contacts](#) button.

 **NOTE:** [Contacts](#) is an application that can create contacts.

 **TIP:** Use the symbols located at the lower left corner of the screen to add contacts and groups to the [Contacts](#) display.

Table 2-57 [Contacts](#) menu (fax models only)

| First level | Second level | Description |
|-----------------------|---------------------------------|---|
| Local | Local | Choose from a list of contacts. |
| | Fax Speed Dials | Choose from a list of speed dial phone numbers. |

Supplies menu

Touchscreen printers: At the printer control panel, touch the [Supplies](#) button.

LCD printers: Use the arrow buttons to scroll to the [Supplies](#) button, and then press the [OK](#) button.

NOTE: The supplies listed in the [Supplies](#) menu depend on the printer configuration.

Table 2-58 [Supplies](#) menu (fax models only)

| First level | Second level | Third level | Fourth level | Description |
|---|---|--|--------------|---|
| Black Cartridge | | | | <p>This displays the following information about the supply:</p> <ul style="list-style-type: none"> • Status • HP part number • Pages printed • Approximate pages remaining |
| Maintenance Kit | | | | <p>This displays the following information about the supply:</p> <ul style="list-style-type: none"> • Status • HP part number |
| Document Feeder Kit (MFP models only) | | | | <p>This displays the following information about the supply:</p> <ul style="list-style-type: none"> • Status • HP part number |
| Staple Cartridge (SSMBM models only) | | | | <p>This displays the following information about the supply:</p> <ul style="list-style-type: none"> • Status • HP part number |
|  | Low Warning Thresholds | Black Cartridge Maintenance Kit (MFP models only) Document Feeder Kit (MFP models only) NOTE: The supplies listed depend on the printer configuration. | | Set the level at which the supply is considered low. |
| | Low Warning Threshold Message | On Off | | When this feature is enabled, a low supply message appears on the control-panel display when a supply is low. |

| First level | Second level | Third level | Fourth level | Description |
|---|----------------------|--|--|--|
| | Low Behavior | Stop Continue NOTE: Select the setting that is currently display to display all options. | | Specifies how the product reacts when a supply is low. Stop: The printer stops until the supply is replaced. Continue: A supply very low message appears on the control panel display, but printing continues. |
| | Very Low Behavior | Black Cartridge Maintenance Kit (MFP models only) Document Feeder Kit (MFP models only) NOTE: The supplies listed depend on the printer configuration. | Stop Continue Prompt to continue | Specifies how the product reacts when a supply is low. Stop: The printer stops until the supply is replaced. Continue: A supply very low message appears on the control panel display, but printing continues. Prompt to continue: A supply very low message appears on the control panel display, printing continues after acknowledging the low condition. |
| | Store Usage Data | On Supplies Not on Supplies | | Use this to determine where data about supply usage is stored. |
| | Cartridge Protection | Off Protect cartridges | | Select Protect cartridges to permanently protect cartridges so that they can be used only in this printer or fleet of printers. |
| | Cartridge Policy | Off Authorized HP | | Select Authorized HP to allow only genuine HP cartridges to be used in this printer. |
| | Reset Supplies | Black Cartridge Maintenance Kit (MFP models only) Document Feeder Kit (MFP models only) NOTE: The supplies listed depend on the printer configuration. | Cancel Reset | After replacing a supply kit, select it from the list and then select Reset . |
|  | | | | Select this to print a supplies status page. |

Trays menu

Touchscreen printers: At the printer control panel, touch the [Trays](#) button.

LCD printers: Use the arrow buttons to scroll to the [Trays](#) button, and then press the [OK](#) button.

NOTE: The trays listed in the this menu depend on the printer configuration.

Table 2-59 Trays menu

| First level | Second level | Third level | Fourth level | Description |
|---|--------------------|-------------------------------------|--------------|---|
| Tray <X> | Size | | | Choose from a list of paper sizes. |
| | Type | | | Choose from a list of paper types. |
| | Status | | | This shows the tray status (for example, "Empty" might display). |
| | Capacity | | | This shows the tray capacity. |
|  | Use Requested Tray | Exclusively When available | | Controls how the printer handles jobs that have specified a specific input tray. Two options are available: Exclusively: The printer never selects a different tray when the user has indicated that a specific tray should be used, even if that tray is empty. When available: The printer uses the selected tray unless it is empty or unavailable. |
| | Manual Feed Prompt | Always prompt Prompt on mismatch | | Indicate whether a prompt should appear when the type or size for a job does not match the specified tray and the product pulls from the multipurpose tray instead. Two options are available: Always prompt: A prompt always displays before using the multipurpose tray. Prompt on mismatch: A prompt only displays if the job size/type does not match the tray configuration. |

Table 2-59 Trays menu (continued)

| First level | Second level | Third level | Fourth level | Description |
|-------------|-----------------------------|-------------------------------|--------------|---|
| | Size/Type Prompt | Display Do not display | | <p>Controls whether the tray configuration message displays whenever a tray is closed. Two options are available:</p> <p>Display: Shows the tray configuration message when a tray is closed. The user is able to configure the tray settings directly from this message.</p> <p>Do not display: Prevents the tray configuration message from automatically appearing.</p> |
| | Use Another Tray | Allow Do not allow | | <p>Use to turn on or off the control-panel prompt to select another tray when the specified tray is empty. Two options are available:</p> <p>Allow: When this option is selected, the user is prompted either to add paper to the selected tray or to choose a different tray.</p> <p>Do not allow: When this option is selected, the user is not given the option of selecting a different tray. The product prompts the user to add paper to the tray that was initially selected.</p> |
| | Alternative Letterhead Mode | Off On | | <p>Use to load letterhead or preprinted paper into the tray the same way for all print jobs, whether you are printing to one side of the sheet or to both sides of the sheet.</p> <p>When this option is selected, load the paper as you would for printing on both sides. See the user documentation that came with the product for instructions about loading letterhead for printing on both sides.</p> <p>When this option is selected, the product speed slows to the speed required for printing on both sides.</p> |

Table 2-59 Trays menu (continued)

| First level | Second level | Third level | Fourth level | Description |
|-------------|--------------------|--|--------------|--|
| | Duplex Blank Pages | Automatic Always NOTE: Automatic is not available for the M607n and M608n printers. | | Control how the product handles two-sided jobs (duplexing). Automatic: Enables Smart Duplexing, which instructs the printer not to process blank pages. Always: Disables Smart Duplexing and forces the duplexer to flip the sheet of paper even if it is printed on only one side. This might be preferable for certain jobs that use paper types such as letterhead or prepunched paper. |
| | Override A4/Letter | No Yes | | Prints on letter-size paper when an A4 job is sent but no A4-size paper is loaded in the printer (or to print on A4 paper when a letter-size job is sent but no letter-size paper is loaded). This option also overrides A3 with ledger-size paper and ledger with A3-size paper. |

Reports menu

Touchscreen printers: At the printer control panel, touch the [Reports](#) button.

LCD printers: Use the arrow buttons to scroll to the [Reports](#) button, and then press the [OK](#) button.

Table 2-60 Reports menu (fax models only)

| First level | Second level | Third level | Description |
|---|--|---|---|
| Configuration/Status Pages NOTE: It is possible to select and print multiple reports. TIP: Large touchscreen printers have a View feature for the report pages. | Settings Menu Map (check box) | Cancel Print | A map of the available printer configuration settings. |
| | Current Setting Page (check box) | Cancel Print | Print a summary of the current printer settings. TIP: This is helpful if settings need to be changed to service the printer. Use this report to record the present printer configuration. |
| | Configuration Page (check box) | Cancel Print | Shows the printer settings and installed accessories. |
| | How to Connect Page (check box) | Cancel Print | Show information required to connect to the printer by using a network. |
| | Supplies Status Page (check box) | Cancel Print | Shows the approximate remaining life for the supplies; reports statistics on total number of pages and jobs processed, serial number, page counts, and maintenance information. IMPORTANT: HP provides approximations of the remaining life for the supplies as a customer convenience. The actual remaining supply levels might be different than the approximations provided. |
| | Usage Page (check box) | Cancel Print | Shows a page count for jobs processed by the printer (for example, total page count for pages printed). |
| | File Directory Page (check box) | Cancel Print | Shows the file name and folder name for files that are stored in the printer memory. |
| | Web Services Status Page (check box) | Cancel Print | Shows the detected Web Services for the printer. |
| | Fax Reports (fax models only) | | |
| | Fax Activity Log (check box) | Cancel Print | Contains a list of the faxes that have been sent from or received by this printer. |
| | Billing Codes Report (check box) | Cancel Print | Provides a list of billing codes used for outgoing faxes. This report shows how many sent faxes were billed to each code. |

Table 2-60 Reports menu (fax models only) (continued)

| First level | Second level | Third level | Description |
|-------------|--------------------------------|-------------|--|
| | Blocked Fax List (check box) | Cancel | A list of phone numbers that are blocked from sending faxes to this printer. |
| | | Print | |
| | Fax Call Report (check box) | Cancel | A detailed report of the last fax operation, either sent or received. |
| | | Print | |
| Other pages | Demonstration Page (check box) | Cancel | Print a demonstration page. |
| | | Print | |
| | PCL Font List (check box) | Cancel | Print the available PCL fonts. |
| | | Print | |
| | PS Font List (check box) | Cancel | Print the available PS fonts. |

Control panel message document (CPMD)

Control-panel messages and event log entries

The CPMD is not provided in this service manual. The CPMD for this printer is available on the HP Service Access Workbench (SAW) Web site. Go to <http://h41302.www4.hp.com/km/saw/home.do>.

Resolve print-quality problems

Introduction

Use the information below to troubleshoot print-quality problems, including issues with image quality.

The troubleshooting steps can help resolve the following defects:

- Blank pages
- Black pages
- Curled paper
- Dark or light bands
- Dark or light streaks
- Fuzzy print
- Gray background or dark print
- Light print
- Loose toner
- Missing toner
- Scattered dots of toner
- Skewed images
- Smears
- Streaks

Troubleshoot print quality

To resolve print-quality issues, try these steps in the order presented.

Update the printer firmware

Try updating the printer firmware. For more information, go to www.hp.com/support and select the option to **Get software and drivers**. Then follow the prompts to navigate to the firmware download for the printer.

Print from a different software program

Try printing from a different software program. If the page prints correctly, the problem is with the software program from which you were printing.

Check the paper type setting for the print job

Check the paper type setting when printing from a software program and the printed pages have smears, fuzzy or dark print, curled paper, scattered dots of toner, loose toner, or small areas of missing toner.

Check the paper type setting on the printer

1. Open the tray.
2. Verify that the tray is loaded with the correct type of paper.
3. Close the tray.
4. Follow the control panel instructions to confirm or modify the paper type settings for the tray.

Check the paper type setting (Windows)

1. From the software program, select the **Print** option.
2. Select the printer, and then click the **Properties** or **Preferences** button.
3. Click the **Paper/Quality** tab.
4. From the **Paper Type** drop-down list, click the **More...** option.
5. Expand the list of **Type is:** options.
6. Expand the category of paper types that best describes your paper.
7. Select the option for the type of paper you are using, and click the **OK** button.
8. Click the **OK** button to close the **Document Properties** dialog box. In the **Print** dialog box, click the **OK** button to print the job.

Check the paper type setting (macOS)

1. Click the **File** menu, and then click the **Print** option.
2. In the **Printer** menu, select the printer.
3. By default, the print driver displays the **Copies & Pages** menu. Open the menus drop-down list, and then click the **Finishing** menu.
4. Select a type from the **Media Type** drop-down list.
5. Click the **Print** button.

Check toner-cartridge status

Follow these steps to check the estimated life remaining in the toner cartridge and if applicable, the status of other replaceable maintenance parts.

Step one: Print the supplies status page

1. From the Home screen on the printer control panel, navigate to the **Reports** application, and then select the **Reports** icon.
2. Select the **Configuration/Status Pages** menu.
3. Select **Supplies Status Page**, and then select **Print** to print the page.

Step two: Check supplies status

1. Look at the supplies status report to check the percent of life remaining for the toner cartridge and, if applicable, the status of other replaceable maintenance parts.

Print quality problems can occur when using a toner cartridge that is at its estimated end of life. The supplies status page indicates when a supply level is very low. After an HP supply has reached the very low threshold, HP's premium protection warranty on that supply has ended.

The toner cartridge does not need to be replaced now unless the print quality is no longer acceptable. Consider having a replacement available to install when print quality is no longer acceptable.

If you determine that you need to replace a toner cartridge or other replaceable maintenance parts, the supplies status page lists the genuine HP part numbers.

2. Check to see if you are using a genuine HP cartridge.

A genuine HP toner cartridge has the word "HP" on it, or has the HP logo on it. For more information on identifying HP cartridges go to www.hp.com/go/learnaboutsupplies.

Print a cleaning page

During the printing process paper, toner, and dust particles can accumulate inside the printer and can cause print-quality issues such as toner specks or spatter, smears, streaks, lines, or repeating marks.

Follow these steps to clean the printer's paper path.

1. From the Home screen on the printer control panel, navigate to the [Support Tools](#) application, and then select the [Support Tools](#) icon.
2. Select the following menus:
 - a. [Maintenance](#)
 - b. [Calibration/Cleaning](#)
 - c. [Cleaning Page](#)
3. Select [Print](#) to print the page.

A **Cleaning...** message displays on the printer control panel. The cleaning process takes a few minutes to complete. Do not turn the printer off until the cleaning process has finished. When it is finished, discard the printed page.

Visually inspect the toner cartridge

 **NOTE:** If the access door to the cartridge area is locked, contact your managed service provider for assistance with unlocking the door.

Follow these steps to inspect the toner cartridge.

1. Remove the toner cartridge from the printer, and verify that the sealing tape has been removed.
2. Check the memory chip for damage.
3. Examine the surface of the green imaging drum.

 **CAUTION:** Do not touch the imaging drum. Fingerprints on the imaging drum can cause print-quality problems.

4. If you see any scratches, fingerprints, or other damage on the imaging drum, replace the toner cartridge.
5. Reinstall the toner cartridge, and print a few pages to see if the problem has resolved.

Check paper and the printing environment

Step one: Use paper that meets HP specifications

Some print-quality problems arise from using paper that does not meet HP specifications.

- Always use a paper type and weight that this printer supports.
- Use paper that is of good quality and free of cuts, nicks, tears, spots, loose particles, dust, wrinkles, voids, staples, and curled or bent edges.
- Use paper that has not been previously printed on.
- Use paper that does not contain metallic material, such as glitter.
- Use paper that is designed for use in laser printers. Do not use paper that is designed only for use in Inkjet printers.
- Use paper that is not too rough. Using smoother paper generally results in better print quality.

Step two: Check the environment

The environment can directly affect print quality and is a common cause for print-quality or paper-feeding issues. Try the following solutions:

- Move the printer away from drafty locations, such as open windows or doors, or air-conditioning vents.
- Make sure the printer is not exposed to temperatures or humidity outside of printer specifications.
- Do not place the printer in a confined space, such as a cabinet.
- Place the printer on a sturdy, level surface.
- Remove anything that is blocking the vents on the printer. The printer requires good air flow on all sides, including the top.
- Protect the printer from airborne debris, dust, steam, grease, or other elements that can leave residue inside the printer.

Step three: Set the individual tray alignment

Follow these steps when text or images are not centered or aligned correctly on the printed page when printing from specific trays.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Select the following menus:
 - a. [Copy/Print](#) or [Print](#)
 - b. [Print Quality](#)
 - c. [Image Registration](#)
3. Select [Tray](#), and then select the tray to adjust.

4. Select [Print Test Page](#), and then follow the instructions on the printed pages.
5. Select [Print Test Page](#) again to verify the results, and then make further adjustments if necessary.
6. Select [Done](#) to save the new settings.

Try a different print driver

Try a different print driver when printing from a software program and the printed pages have unexpected lines in graphics, missing text, missing graphics, incorrect formatting, or substituted fonts.

Download any of the following drivers from the HP Web site: www.hp.com/support/ljM607, www.hp.com/support/ljM608, www.hp.com/support/ljM609, www.hp.com/support/ljM610, www.hp.com/support/ljM611, www.hp.com/support/ljM612, www.hp.com/support/ljE60055, www.hp.com/support/ljE60065, www.hp.com/support/ljE60075, www.hp.com/support/ljE60155, www.hp.com/support/ljE60165, www.hp.com/support/ljE60175, www.hp.com/support/ljM631MFP, www.hp.com/support/ljM632MFP, www.hp.com/support/ljM633MFP, www.hp.com/support/ljM634MFP, www.hp.com/support/ljM635MFP, www.hp.com/support/ljM636MFP, www.hp.com/support/ljE62555MFP, www.hp.com/support/ljE62565MFP, www.hp.com/support/ljE62575MFP, www.hp.com/support/ljE62655MFP, www.hp.com/support/ljE62665MFP, www.hp.com/support/ljE62675MFP.

| | |
|---------------------------|--|
| HP PCL 6 V3 driver | This printer-specific print driver supports Windows 7 and newer operating systems that support version 3 drivers. For a list of supported operating systems, go to www.hp.com/go/support . |
| HP PCL-6 V4 driver | This product-specific print driver supports Windows 8 and newer operating systems that support version 4 drivers. For a list of supported operating systems, go to www.hp.com/go/support . |

| HP UPD PCL 6 | <ul style="list-style-type: none"> • Recommended for printing in all Windows environments • Provides the overall best speed, print quality, and printer feature support for most users • Developed to align with Windows Graphic Device Interface (GDI) for best speed in Windows environments • Might not be fully compatible with third-party and custom software programs that are based on PCL 5 |

Print quality troubleshooting guide

NOTE: Use the procedures in this section to resolve most print-quality issues (for example, streaks or fading, missing black or other colors, blurred or fuzzy text, and ink streaks or smears). Try the following solutions in the order presented. When one of the solutions resolves the issue, there is no need to continue with the other procedures.

- [Introduction](#)
- [Product specific image defects](#)

Introduction

- [Toner cartridges](#)
- [Check the paper-type setting for the print job](#)
- [Check paper and the printing environment](#)
- [Information to collect](#)

Toner cartridges

Check toner-cartridge status

Print the supplies status page from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Reports](#) button.
2. Touch the [Configuration/Status Pages](#) item
3. Touch [Supplies Status Page](#) to select it.

 **TIP:** Multiple report pages can be selected, and then printed together.

4. Touch the [Print](#) button to print the pages.

Print the supplies status page from an LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#)  menu.
2. Use the right arrow ► button to scroll to [Reports](#), and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to [Configuration/Status Pages](#), and then press the [OK](#) button.
4. Use the down arrow ▼ or ▲ buttons to scroll to [Supplies Status page](#), and then press the [OK](#) button to select it.
5. Use the down arrow ▼ and right arrow ► buttons to scroll to [Print](#), and then press the [OK](#) button to print the pages.

 **TIP:** Multiple report pages can be selected, and then printed together.

Check the supplies status page for the following information:

- Estimated percentage of cartridge or cartridges life remaining
- Approximate pages remaining
- Part number or numbers for HP toner cartridge or cartridges
- Number of pages printed

Visually inspect the toner cartridge or cartridges

1. Remove the toner cartridge or cartridges from the printer, and verify that the sealing tape has been removed.
2. Check the memory chip for damage.
3. Examine the surface of the imaging drum on the cartridge.

 **CAUTION:** Do not touch the roller (imaging drum). Fingerprints on the imaging drum can cause print-quality problems.

4. If you see any scratches, fingerprints, or other damage on an imaging drum, replace the toner cartridge or cartridges.
5. If the imaging drum does not appear to be damaged, rock the toner cartridge or cartridges gently several times and reinstall it. Print a few pages to see if the problem has resolved.

Check the paper-type setting for the print job

Check the paper type setting when printing from a software program and the printed pages have smears, fuzzy or dark print, curled paper, scattered dots of toner, loose toner, or small areas of missing toner.

Check the paper type setting (Windows)

1. From the software program, select the **Print** option.
2. Select the printer, and then click the **Properties** or **Preferences** button.
3. Click the **Paper/Quality** tab.
4. From the **Paper Type** drop-down list, click the **More...** option.
5. Expand the list of **Type is:** options.
6. Expand the category of paper types that best describes your paper.
7. Select the option for the type of paper you are using, and click the **OK** button.
8. Click the **OK** button to close the **Document Properties** dialog box. In the **Print** dialog box, click the **OK** button to print the job.

Check the paper type setting (Mac OS X)

1. Click the **File** menu, and then click the **Print** option.
2. In the **Printer** menu, select the printer.
3. By default, the print driver displays the **Copies & Pages** menu. Open the menus drop-down list, and then click the **Finishing** menu.
4. Select a type from the **Media Type** drop-down list.
5. Click the **Print** button.

Check paper and the printing environment

Step one: Use paper that meets HP specifications

- Always use a paper type and weight that this printer supports.
- Use paper that is of good quality and free of cuts, nicks, tears, spots, loose particles, dust, wrinkles, voids, staples, and curled or bent edges.
- Use paper that has not been previously printed on.
- Use paper that does not contain metallic material, such as glitter.

- Use paper that is designed for use in laser printers. Do not use paper that is designed only for use in Inkjet printers.
- Use paper that is not too rough. Using smoother paper generally results in better print quality

Step two: Check the environment

The environment can directly affect print quality and is a common cause for print-quality or paper-feeding issues. Try the following solutions:

- Move the printer away from drafty locations, such as open windows or doors, or air-conditioning vents.
- Make sure the printer is not exposed to temperatures or humidity outside of printer specifications.
- Do not place the printer in a confined space, such as a cabinet.
- Place the printer on a sturdy, level surface.
- Remove anything that is blocking the vents on the printer. The printer requires good air flow on all sides, including the top.
- Protect the printer from airborne debris, dust, steam, grease, or other elements that can leave residue inside the printer.

Resolving print quality problems

- [Introduction](#)
- [Troubleshoot print quality problems](#)

For more information on resolving print quality problems, go to WISE and type "c06450141" in the search box. In the list of results, find and open the article "Image Quality Troubleshooting Guide".

Introduction

The following information provides troubleshooting steps for solving image defect issues, including the following defects:

- Light print
- Gray background or dark print
- Blank pages
- Black pages
- Dark or light bands
- Dark or light streaks
- Missing toner
- Skewed images
- Colors that do not align
- Curled paper

Troubleshoot print quality problems

Table 2-63 Image defects table quick reference

[Table 2-64 Light print on page 265](#)

[Table 2-65 Gray background or dark print on page 266](#)

[Table 2-66 Blank page — No print on page 266](#)

Table 2-63 Image defects table quick reference (continued)

Table 2-67 Black page on page 267

Table 2-68 Banding defects on page 267

Table 2-69 Streak defects on page 268

Table 2-70 Fixing/fuser defects on page 269

Table 2-71 Image placement defects on page 269

Table 2-72 Output defects on page 270

Image defects, no matter the cause, can often be resolved using the same steps. Use the following steps as a starting point for solving image defect issues.

1. Reprint the document. Print quality defects can be intermittent in nature or can go away completely with continued printing.
2. Check the condition of the cartridge or cartridges. If a cartridge is in a **Very Low** state (it has passed the rated life), replace the cartridge.
3. Make sure that the driver and tray print mode settings match the media that is loaded in the tray. Try using a different ream of media or a different tray. Try using a different print mode.
4. Make sure that the printer is within the supported operating temperature/humidity range.
5. Make sure that the paper type, size, and weight are supported by the printer. See the printer support page at support.hp.com for a list of the supported paper sizes and types for the printer.

 **NOTE:** The term “fusing” refers to the part of the printing process where toner is affixed to paper.

The following examples depict letter-size paper that has passed through the printer short-edge first.

Table 2-64 Light print

| Description | Sample | Possible solutions |
|---|---|--|
| <p>Light print:</p> <p>The printed content on the entire page is light or faded.</p> |  | <ol style="list-style-type: none"> 1. Reprint the document. 2. Remove the cartridge, and then shake it to redistribute the toner. 3. Mono models only: Make sure that the Economode setting is disabled both at the printer control panel and in the print driver. 4. Make sure that the cartridge is installed correctly. 5. Print a Supply status page and check for life and usage of the cartridge. 6. Replace the cartridge. 7. If the problem persists, go to support.hp.com. If the problem persists, access the HP Web-based Interactive Search Engine (WISE), and search for document c05493714, the HP LaserJet Enterprise, Managed printers - Print quality troubleshooting guide. NOTE: To access WISE, you will be required to log in with your HP or Partner credentials. 8. Check the transfer roller for correct seating and for dust or dirt buildup. Clean or replace the transfer roller as needed. 9. Perform a high-voltage power supply test. If the HVPS test page comes out lighter than expected, try another toner cartridge to see if the issue happens with multiple cartridges. Check if the high-voltage contacts are dirty, bent or damaged. This might cause the drum not to charge fully. NOTE: The HVPS contacts cannot be replaced. 10. If the HVPS test is not successful or if the issue persists, replace the high-voltage power supply. |

Table 2-65 Gray background or dark print

| Description | Sample | Possible solutions |
|--|---|---|
| <p>Gray background or dark print:</p> <p>The image or text is darker than expected.</p> |  | <ol style="list-style-type: none"> 1. Make sure that the paper in the trays has not already been run through the printer. 2. Use a different paper type. 3. Reprint the document. 4. Mono models only: From the Home screen on the printer control panel, go to the Adjust Toner Density menu, and then adjust the toner density to a lower level. 5. Make sure that the printer is within the supported operating temperature and humidity range. 6. Replace the cartridge. 7. If the problem persists, go to support.hp.com. <p>If the problem persists, access the HP Web-based Interactive Search Engine (WISE), and search for document c05493714, the HP LaserJet Enterprise, Managed printers - Print quality troubleshooting guide.</p> <p>NOTE: To access WISE, you will be required to log in with your HP or Partner credentials.</p> |

Table 2-66 Blank page — No print

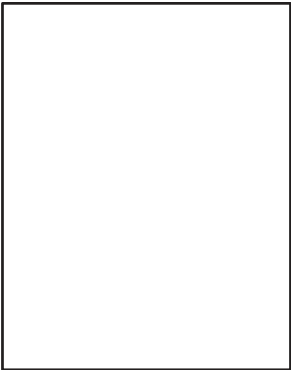

| Description | Sample | Possible solutions |
|---|---|---|
| <p>Blank page — No print:</p> <p>The page is completely blank and contains no printed content.</p> |  | <ol style="list-style-type: none"> 1. Make sure that the cartridge is genuine HP cartridges. 2. Make sure that the cartridge is installed correctly. 3. Print with a different cartridge. 4. Check the paper type in the paper tray and adjust the printer settings to match. If necessary, select a lighter paper type. 5. If the problem persists, go to support.hp.com. |

Table 2-67 Black page

| Description | Sample | Possible solutions |
|---|---|--|
| Black page: The entire printed page is black. |  | <ol style="list-style-type: none"> 1. Visually inspect the cartridge to check for damage. 2. Make sure that the cartridge is installed correctly. 3. Replace the cartridge 4. If the problem persists, go to support.hp.com. |

Table 2-68 Banding defects

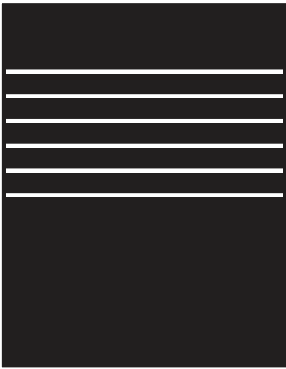

| Description | Sample | Possible solutions |
|---|--|---|
| Repetitive wide-pitch banding and Impulse bands: Dark or light lines which repeat down the length of the page. They might be sharp or soft in nature. The defect displays only in areas of fill, not in text or sections with no printed content. |  | <ol style="list-style-type: none"> 1. Reprint the document. 2. Try printing from another tray. 3. Replace the cartridge. 4. Use a different paper type. 5. Enterprise models only: From the Home screen on the printer control panel, go to the Adjust Paper Types menu, and then choose a print mode that is designed for a slightly heavier media than what you are using. This slows the print speed and might improve the print quality. 6. If the problem persists, go to support.hp.com. |

Table 2-69 Streak defects

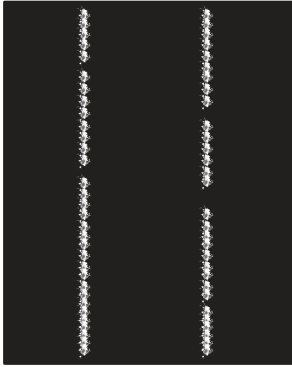

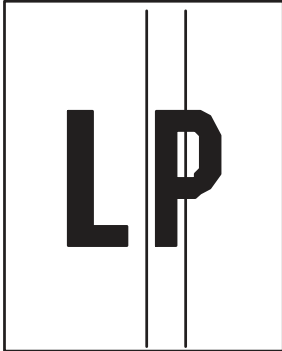

| Description | Sample | Possible solutions |
|--|--|---|
| <p>Light vertical streaks:</p> <p>Light streaks that usually span the length of the page. The defect displays only in areas of fill, not in text or sections with no printed content.</p> |  | <ol style="list-style-type: none">1. Reprint the document.2. Remove the cartridge, and then shake it to redistribute the toner.3. If the problem persists, go to support.hp.com. <p>NOTE: Both light and dark vertical streaks can occur when the printing environment is outside the specified range for temperature or humidity. Refer to your printer's environmental specifications for allowable temperature and humidity levels.</p> |
| <p>Dark vertical streaks and ITB cleaning streaks (color models only):</p> <p>Dark lines which occur down the length of the page. The defect might occur anywhere on the page, in areas of fill or in sections with no printed content.</p> |  | <ol style="list-style-type: none">1. Reprint the document.2. Remove the cartridge, and then shake it to redistribute the toner.3. Print a cleaning page.4. Check the toner level in the cartridge.5. If the problem persists, go to support.hp.com. |

Table 2-70 Fixing/fuser defects

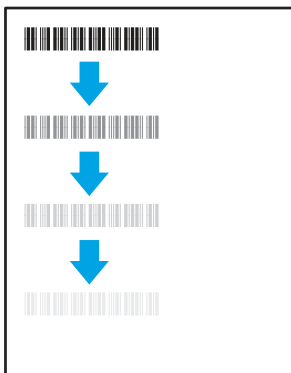

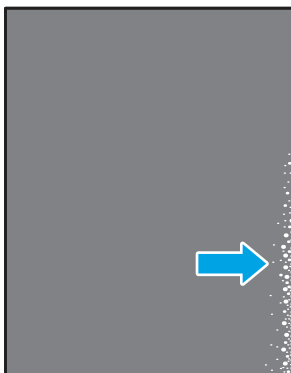

| Description | Fixing/fuser | Possible solutions |
|--|--|--|
| <p>Hot fuser offset (shadow):</p> <p>Slight shadows, or offsets, of the image repeated down the page. The repeated image might fade with each recurrence.</p> |  | <ol style="list-style-type: none"> 1. Reprint the document. 2. Check the paper type in the paper tray and adjust the printer settings to match. If necessary, select a lighter paper type. 3. If the problem persists, go to support.hp.com. |
| <p>Poor fusing:</p> <p>Toner rubs off along either edge of page. This defect is more common at the edges of high-coverage jobs and on light media types but can occur anywhere on the page.</p> |  | <ol style="list-style-type: none"> 1. Reprint the document. 2. Check the paper type in the paper tray and adjust the printer settings to match. If necessary, select a heavier paper type. 3. Enterprise models only: From the printer control panel, go to the Edge-to-Edge menu and then select Normal. Reprint the document. 4. Enterprise models only: From the printer control panel, select Auto Include Margins and then reprint the document. 5. If the problem persists, go to support.hp.com. |

Table 2-71 Image placement defects

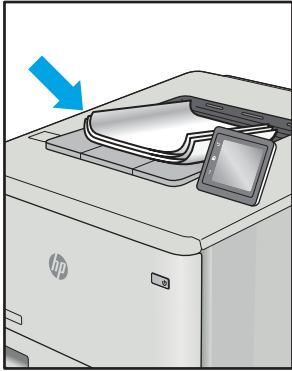

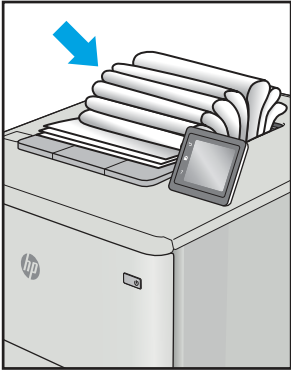

| Description | Sample | Possible solutions |
|---|---|---|
| <p>Margins and skew:</p> <p>The image is not centered, or is skewed on the page. The defect occurs when the paper is not positioned properly as it is pulled from the tray and moves through the paper path.</p> |  | <ol style="list-style-type: none"> 1. Reprint the document. 2. Remove the paper and then reload the tray. Make sure that all the paper edges are even on all sides. 3. Make sure that the top of the paper stack is below the tray full indicator. Do not overfill the tray. 4. Make sure that the paper guides are adjusted to the correct size for the paper. Do not adjust the paper guides tightly against the paper stack. Adjust them to the indentations or markings in the tray. 5. If the problem persists, go to support.hp.com. |

Table 2-72 Output defects

| Description | Sample | Possible solutions |
|---|--|--|
| <p>Output curl:</p> <p>Printed paper has curled edges. The curled edge can be along the short or long side of the paper. Two types of curl are possible:</p> <ul style="list-style-type: none">• Positive curl: The paper curls toward the printed side. The defect occurs in dry environments or when printing high coverage pages.• Negative curl: The paper curls away from the printed side. The defect occurs in high-humidity environments or when printing low coverage pages. |  | <ol style="list-style-type: none">1. Reprint the document.2. Positive curl: From the printer control panel, select a heavier paper type. The heavier paper type creates a higher temperature for printing. Negative curl: From the printer control panel, select a lighter paper type. The lighter paper type creates a lower temperature for printing. Try storing the paper in a dry environment prior or use freshly opened paper.3. Print in duplex mode.4. If the problem persists, go to support.hp.com. |
| <p>Output stacking:</p> <p>The paper does not stack well in the output tray. The stack might be uneven, skewed, or the pages might be pushed out of the tray and onto the floor. Any of the following conditions can cause this defect:</p> <ul style="list-style-type: none">• Extreme paper curl• The paper in the tray is wrinkled or deformed• The paper is a non-standard paper type, such as envelopes• The output tray is too full |  | <ol style="list-style-type: none">1. Reprint the document.2. Extend the output bin extension.3. If the defect is caused by extreme paper curl, complete the troubleshooting steps for Output curl.4. Use a different paper type.5. Use freshly opened paper.6. Remove the paper from the output tray before the tray gets too full.7. If the problem persists, go to support.hp.com. |

Repetitive image defect ruler

When troubleshooting the source of some print image defects, one solution is to identify if it is a repetitive defect (does the print quality defect appear multiple times on the printed page?). If this is the case, use a ruler to measure occurrences of repetitive image defects to help solve image-quality problems. For more information, see [Use a ruler to measure between repetitive defects on page 272](#).

Place the ruler next to the first occurrence of the defect on the page. Find the distance between identical defects and use the table below to identify the component that is causing the defect.

 **IMPORTANT:** Do not use solvents or oils to clean rollers. Instead, rub the roller with lint-free paper. If dirt is difficult to remove, rub the roller with lint-free paper that has been dampened with water.

 **NOTE:** Defects on the tray pickup rollers or the Tray 1 pickup roller do not cause a repetitive defect. Defects on these rollers cause a defect to appear only on the leading edge of the image.

 **TIP:** To make a printer specific repetitive defect ruler, use a metric ruler to transfer the measurements in [Table 2-73 Repetitive defects on page 271](#) to a transparency or the edge of a piece of paper—clearly label each ruler mark with the associated defective assembly.

Table 2-73 Repetitive defects

| Assembly | Distance between defects |
|--------------------------------------|--------------------------|
| Primary charging roller ¹ | 26.7 mm (1.1 in) |
| Face down roller ¹ | 28.3 mm (1.1 in) |
| Fuser output roller | 34.6 mm (1.4 in) |
| Developer roller ¹ | 44.1 mm (1.7 in) |
| Transfer roller | 44.6 mm (1.8 in) |
| Registration roller | 48 mm (1.9 in) |
| Tray 2 pickup roller | 50 mm (2.0 in) |
| Tray 2 retard roller | |
| Tray 2 feed roller | |
| Fuser sleeve | 75.4 mm (3.0 in) |
| Pressure roller | 78.5 mm (3.1 in) |
| Photosensitive drum ¹ | 92.4 mm (3.6 in) |

¹ The primary charging roller, photosensitive drum and developer roller cannot be cleaned. If any of these rollers are indicated, replace the toner cartridge.

Use a ruler to measure between repetitive defects

The figures in this section show color repetitive defect pages. However, the process for measuring repetitive defects is valid for mono pages.

1. Identify a repetitive defect on the page.

 **TIP:** Print a cleaning page to see if that resolves the defect.

The example pages below show the following types of repetitive defects.

 **NOTE:** These are examples only, other types of repetitive defects might appear on a page.

- Lines (callout 1)
- Smudges (callout 2)
- Dots or spots (callout 3)

Figure 2-110 Examples of repetitive defects

2. Position a metric ruler on the page with the “zero” ruler mark at one occurrence of the defect (callout 1).

Figure 2-111 Place the ruler on the page

3. Locate the next occurrence of the defect (callout 1).

Figure 2-112 Locate the next repetitive defect

4. Measure the distance (in millimeters) between the two occurrences (callout 1), and then use [Table 2-73 Repetitive defects on page 271](#) to determine the defective assembly.

 **TIP:** Always measure from and to the same point on the defects. For example, if the ruler is “zeroed” at the top edge of a defect, measure to the top edge of the next occurrence of that defect.

Figure 2-113 Determine the defective assembly

Printer specific image defects

Image defect events

NOTE: The image defects described in this section are defects that occurred during development and that could not be fully eliminated. Customers might observe these defects.

- [44 mm \(44.1 mm\) wide pitch banding](#)
- [18 mm leading edge blur](#)
- [46 mm leading edge blur](#)
- [25 mm leading edge blur](#)
- [50 mm trailing edge blur](#)
- [75 mm trailing edge blur](#)
- [104 mm trailing edge blur](#)
- [111 mm trailing edge blur](#)
- [120 mm trailing edge blue duplex side](#)
- [Hot offset](#)
- [Mottle/graininess](#)
- [Mottle/graininess](#)

44 mm (44.1 mm) wide pitch banding

Figure 2-114 44 mm (44.1 mm) wide pitch banding

Description of the defect

Soft, gradual bands can be seen over a constant density area. It appears as slight gradients which repeat at approximately 44.1 mm pitch. This phenomenon is a density variation which appears on the PQ due to the gap variation between OPC and developer sleeve. This gap varies due to the part's accuracy of the OPC, developer sleeve, and the spacer placed between the OPC and the developer sleeve.

Conditions that can cause the defect

This defect occurs in fill areas. This does not occur in text regions.

Solutions for the defect

- Resend the job.
- If the defect is persistent and more severe than acceptable limit sample, then replace the cartridge.

Parts related to the defect

NOTE: The following item(s) might need to be repaired or replaced to prevent this defect from occurring.

- Toner cartridge

18 mm leading edge blur

Figure 2-115 18 mm leading edge blur

Description of the defect

A dark and usually sharp band occurring 18 mm from the leading edge. This impulse band is caused by the leading edge of the media impacting the OPC and causing a disturbance on the developer.

Conditions that can cause the defect

This defect occurs in fill areas where the leading edge of the media does not follow the correct path into the transfer nip. This does not occur in text regions

Solutions for the defect

- Resend the job.
- If the defect is persistent, try printing in Quiet Mode (1/2 speed) which, because of the slower process speed, allows the media to enter the transfer nip more reliably and with less impact force.

At the printer control panel open the following menus: Settings > General > Quiet Mode > On.

Parts related to the defect

NOTE: The following item(s) might need to be repaired or replaced to prevent this defect from occurring.

- Media
- Paper path

46 mm leading edge blur

Figure 2-116 46 mm leading edge blur

Description of the defect

A dark and usually sharp band occurring 46 mm from the leading edge. This impulse band is a latent image caused by the leading edge of the media entering the transfer nip.

Conditions that can cause the defect

This defect occurs in fill areas. This does not occur in text regions.

Solutions for the defect

- Resend the job.
- If the defect is persistent, try printing in Quiet Mode (1/2 speed) which, because of the slower process speed, allows the media to enter the transfer nip more reliably and with less impact force.

At the printer control panel open the following menus: Settings > General > Quiet Mode > On.

Parts related to the defect

 **NOTE:** The following item(s) might need to be repaired or replaced to prevent this defect from occurring.

- Media
- Paper path

25 mm leading edge blur

Figure 2-117 25 mm leading edge blur

Description of the defect

A dark and usually sharp band occurring 25 mm from the trailing edge. This impulse band is a developer blur caused by the trailing edge of the media exiting the registration rollers.

Conditions that can cause the defect

This defect occurs in fill areas. This does not occur in text regions.

Solutions for the defect

- Resend the job.
- If the defect is persistent, try printing in Quiet Mode (1/2 speed) which, because of the slower process speed, allows the media to enter the transfer nip more reliably and with less impact force.

At the printer control panel open the following menus: Settings > General > Quiet Mode > On.

Parts related to the defect

NOTE: The following item(s) might need to be repaired or replaced to prevent this defect form occurring.

- Media
- Paper path

50 mm trailing edge blur

Figure 2-118 50 mm trailing edge blur

Description of the defect

A dark and usually sharp band occurring 50 mm from the trailing edge. This impulse band is a transfer blur caused by the trailing edge of the media exiting the registration rollers.

Conditions that can cause the defect

This defect occurs in fill areas. This does not occur in text regions.

Solutions for the defect

- Resend the job.
- If the defect is persistent, try printing in Quiet Mode (1/2 speed) which, because of the slower process speed, allows the media to enter the transfer nip more reliably and with less impact force.

At the printer control panel open the following menus: Settings > General > Quiet Mode > On.

Parts related to the defect

NOTE: The following item(s) might need to be repaired or replaced to prevent this defect from occurring.

- Media
- Paper path

75 mm trailing edge blur

Figure 2-119 75 mm trailing edge blur

Description of the defect

A dark and usually sharp band occurring 75 mm from the trailing edge. This impulse band is a latent image blur caused by the trailing edge of the media exiting the feed/re-feed roller nip.

Conditions that can cause the defect

This defect occurs in fill areas. This does not occur in text regions.

Solutions for the defect

- Resend the job.
- If the defect is persistent, try printing in Quiet Mode (1/2 speed) which, because of the slower process speed, allows the media to enter the transfer nip more reliably and with less impact force.

At the printer control panel open the following menus: Settings > General > Quiet Mode > On.

Parts related to the defect

NOTE: The following item(s) might need to be repaired or replaced to prevent this defect form occurring.

- Media
- Paper path

104 mm trailing edge blur

Figure 2-120 104 mm trailing edge blur

Description of the defect

A dark and usually sharp band occurring 104 mm from the trailing edge. This impulse band is a developer blur caused by the input clutch (pick motor clutch) being turned off.

Conditions that can cause the defect

This defect occurs in fill areas. This does not occur in text regions.

Solutions for the defect

- Resend the job.
- If the defect is persistent, try printing in Quiet Mode (1/2 speed) which, because of the slower process speed, allows the media to enter the transfer nip more reliably and with less impact force.

At the printer control panel open the following menus: Settings > General > Quiet Mode > On.

Parts related to the defect

NOTE: The following item(s) might need to be repaired or replaced to prevent this defect from occurring.

- Media
- Paper path

111 mm trailing edge blur

Figure 2-121 111 mm trailing edge blur

Description of the defect

A dark and usually sharp band occurring 111 mm from the leading edge. This impulse band is a latent image blur caused by the leading edge of the media entering the fuser nip.

Conditions that can cause the defect

This defect occurs in fill areas. This does not occur in text regions.

Solutions for the defect

- Resend the job.
- If the defect is persistent, try printing in Quiet Mode (1/2 speed) which, because of the slower process speed, allows the media to enter the transfer nip more reliably and with less impact force.

At the printer control panel open the following menus: Settings > General > Quiet Mode > On.

Parts related to the defect

NOTE: The following item(s) might need to be repaired or replaced to prevent this defect form occurring.

- Media
- Paper path

120 mm trailing edge blue duplex side

Figure 2-122 120 mm trailing edge blue duplex side

Description of the defect

A dark and usually sharp band occurring 120 mm from the trailing leading edge of a duplex page. This impulse band is a developer blur caused by the trailing edge of the media exiting the re-feed roller nip.

Conditions that can cause the defect

This defect occurs in fill areas. This does not occur in text regions.

Solutions for the defect

- Resend the job.
- If the defect is persistent, try printing in Quiet Mode (1/2 speed) which, because of the slower process speed, allows the media to enter the transfer nip more reliably and with less impact force.

At the printer control panel open the following menus: Settings > General > Quiet Mode > On.

Parts related to the defect

NOTE: The following item(s) might need to be repaired or replaced to prevent this defect form occurring.

- Media
- Paper path

Description of the defect

Slight offset of the image repeated approximately 75 mm down the page. The fuser is too hot. This issue occurs when the fuser thermistor detection temperature did not follow the target temperature. This issue also occurs when printing large duplex jobs (> 500 duplex pages) where the internal printer and fuser build up excessive heat.

Conditions that can cause the defect

Additionally, hot offset might occur if the wrong media type is selected and might occur more commonly if the fuser is late in life.

Solutions for the defect

- Resend the job after letting the fuser cool.
- Resend the job using a lighter fuser mode.
- Update the printer firmware to the latest Futuresmart version found on HP.com.
- If the error persists, replace the fuser.

Parts related to the defect

NOTE: The following item(s) might need to be repaired or replaced to prevent this defect from occurring.

- Fuser

Mottle/graininess

Figure 2-124 Mottle/graininess

Description of the defect

Large areas of fill look blotchy, grainy, non-uniform, or mottled. Graininess/fixing mottle is a phenomenon that occurs by how the toner (dot) is pressed or melted depending on the media roughness. This leads to the density variance or uneven gloss. This defect is caused by inconsistently melted toner. This defect tends to become worse as the printer becomes hot.

Conditions that can cause the defect

- The defect appears in large areas of fill and is more severe in low temperature and humidity environments.
- The defect appears in large areas of fill and becomes worse as the printer temperature become hot.

Solutions for the defect

- Resend the job after letting the printer cool.
- Change the print mode from Full Speed to Quiet Mode (1/2 speed) to improve the issue. At the printer control panel open the following menus: Settings > General > Quiet Mode > On.
- If the error persists, replace the fuser.

Parts related to the defect

NOTE: The following item(s) might need to be repaired or replaced to prevent this defect from occurring.

- Media
- Toner
- Fuser

Mottle/graininess

Figure 2-125 Mottle/graininess

Description of the defect

Large areas of fill look blotchy, grainy, non-uniform, or mottled. Graininess/fixing mottle is a phenomenon that occurs by how the toner (dot) is pressed or melted depending on the media roughness. This leads to the density variance or uneven gloss. This defect is caused by inconsistently melted toner. This defect tends to become worse as the printer becomes hot.

Conditions that can cause the defect

- The defect appears in large areas of fill and is more severe in low temperature and humidity environments.
- The defect appears in large areas of fill and becomes worse as the printer temperature become hot.

Solutions for the defect

- Resend the job after letting the printer cool.
- Change the print mode from Full Speed to Quiet Mode (1/2 speed) to improve the issue. At the printer control panel open the following menus: Settings > General > Quiet Mode > On.
- If the error persists, replace the fuser.

Parts related to the defect

NOTE: The following item(s) might need to be repaired or replaced to prevent this defect from occurring.

- Media
- Toner
- Fuser

Clean the printer

NOTE: To clean the printer exterior, use a soft, water-moistened cloth.

- [Clean the paper path](#)
- [Print a cleaning page](#)
- [Check the scanner glass for dirt and smudges \(MFP\)](#)
- [Clean the pickup rollers and separation pad in the document feeder \(MFP\)](#)
- [Clean the Tray 1 roller and separation pad](#)
- [Clean the Tray 2-X rollers](#)

Clean the paper path

Over time, particles of toner and paper accumulate inside the printer. This can cause print-quality problems during printing. Cleaning the paper path eliminates or reduces these problems.

Clean the paper path and toner-cartridge areas every time that the toner cartridge is changed or whenever print-quality problems occur. As much as possible, keep the printer free from dust and debris.

Print a cleaning page

Print the cleaning from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) button.
2. Open the following menus:
 - [Maintenance](#)
 - [Calibration/Cleaning](#)
 - [Cleaning Page](#)
3. Touch the [Print](#) button.

NOTE: Use the [Cleaning Page](#) screen to setup an [Automatic Cleaning Interval](#). Touch the desired page interval, and then touch the [Done](#) button.

Print the cleaning page from an LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to and select the [Support Tools](#) menu, and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to and select the [Maintenance](#) menu, and then press the [OK](#) button.
4. Use the down arrow ▼ button to scroll to and select the [Calibration/Cleaning](#) menu, and then press the [OK](#) button.
5. Use the down arrow ▼ button to scroll to [Cleaning Page](#), and then press the [OK](#) button.
6. Use the down arrow ▼ and the right arrow ► buttons to select the [Print](#) item, and then press the [OK](#) button.

 **NOTE:** Use the [Cleaning Page](#) screen to setup an [Automatic Cleaning Interval](#). Use the arrow buttons to scroll to the desired page interval, and then press the [OK](#) button.

Check the scanner glass for dirt and smudges (MFP)

Over time, specks of debris might collect on the scanner glass and white plastic backing, which can affect performance. Use the following procedure to clean the scanner if the printed pages have streaks, unwanted lines, black dots, poor print quality, or unclear text.

1. Press the power button to turn the printer off, and then disconnect the power cable from the electrical outlet.

2. Open the scanner lid.

3. Clean the scanner glass, the document feeder strips, and the white plastic backing with a soft cloth or sponge that has been moistened with nonabrasive glass cleaner.

CAUTION: Do not use abrasives, acetone, benzene, ammonia, ethyl alcohol, or carbon tetrachloride on any part of the printer; these can damage the printer. Do not place liquids directly on the glass or platen. They might seep and damage the printer.

NOTE: If you are having trouble with streaks on copies when you are using the document feeder, be sure to clean the small strip of glass on the left side of the scanner.

4. Dry the glass and white plastic parts with a chamois or a cellulose sponge to prevent spotting.
5. Connect the power cable to an outlet, and then press the power button to turn the printer on.

Clean the pickup rollers and separation pad in the document feeder (MFP)

1. Lift the document-feeder latch.

2. Open the document-feeder cover.

3. Remove any visible lint or dust from each of the feed rollers and the separation pad using compressed air or a clean lint-free cloth moistened with warm water.

NOTE: Lift up the roller assembly to access and clean the second roller.

4. Close the document-feeder cover.

If the error persists, install a document feeder maintenance kit (5851-7202).

Clean the Tray 1 roller and separation pad

 **NOTE:** The MFP printer is shown in the following figures. However, the procedure is correct for all printer models.

Step 1: Clean the Tray 1 roller

1. Release two tabs (callout 1), and then remove the roller cover (callout 2).

Figure 2-126 Remove the cover

2. Release two tabs (callout 1), and then remove the roller (callout 2).

 **IMPORTANT:** Use a damp, lint-free cloth to gently clean the rollers.

 **NOTE:** When handling the rollers or pads, avoid touching the spongy surfaces. Skin oils and fingerprints on a roller surface can cause print-quality problems.

 **Reinstallation tip:** Reverse the removal steps to install the assembly.

Figure 2-127 Remove the roller

Step 2: Clean the separation pad assembly

1. Open Tray 1, careful release two retainer arms (callout 1), and then move the lift plate (callout 2) up and out of the way.

Figure 2-128 Move the lift plate out of the way

2. Release one tab (callout 1), and then rotate the top of the cover (callout 2) down to release it.

Figure 2-129 Release the cover

3. Release one tab (callout 1), and then remove the roller (callout 2).

 **IMPORTANT:** Use a damp, lint-free cloth to gently clean the rollers.

 **NOTE:** When handling the rollers or pads, avoid touching the spongy surfaces. Skin oils and fingerprints on a roller surface can cause print-quality problems.

 **Reinstallation tip:** Reverse the removal steps to install the assembly.

Figure 2-130 Remove the roller

Clean the Tray 2-X rollers

⚠ CAUTION: Removing and reinstalling the separation roller, and reinstalling the pick and feed roller assembly requires specialized tools. These tools are provided in a replacement roller kit. If these tools are not available, the rollers should not be removed and cleaned.

Step 1: Clean the Tray 2-X rollers

1. Open the paper tray for which the rollers will be replaced.

Figure 2-131 Open the tray (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)

Figure 2-132 Open the tray (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

2. **M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175 Tray 2 rollers only:** At the rear of the printer, do the following:

M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675 Tray 2 rollers only: At the right side of the printer, do the following:

NOTE: When this step is complete, go to step [5](#).

- a. Open the rear cover.
- b. Raise the transfer assembly.

- c. Lower the access cover.

 **NOTE:** The M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675 printer is shown below. However the instructions are valid for the M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175 printer.

Figure 2-133 Lower the access cover (Tray 2 rollers)

3. **Tray 3 rollers only:** Open the lower door, and then lower the access cover.

 **NOTE:** When this step is complete, go to step 5.

Figure 2-134 Lower the access cover (Tray 3 rollers)

4. **M631z/M632fht/Flow M632z/Flow M633z only:** Open the right door of the paper feeder. Locate the green tab on the feed assembly cover. Release the tab to lower the access cover.

 **NOTE:** When this step is complete, go to step [5](#).

Figure 2-135 Lower the access cover (M631z/M632fht/Flow M632z/Flow M633z)

5. Locate the separation roller.

Figure 2-136 Locate the separation roller

6. Install the orange tool on the separation roller until it snaps into place.

Figure 2-137 Install the separation roller tool

7. Slide the roller to the left.

Figure 2-138 Slide the roller to the left

8. Tilt the end of the tool down (callout 1) and then pull straight out of the printer (callout 2) to remove the separation roller.

 **IMPORTANT:** Use a damp, lint-free cloth to gently clean the rollers.

 **NOTE:** When handling rollers or pads, avoid touching the spongy surfaces. Skin oils and fingerprints on a roller surface can cause print-quality problems.

 **Reinstallation tip:** Leave the roller tool attached to the roller assembly. The tool is necessary to reinstall the separation roller.

Figure 2-139 Remove the roller

9. Locate the pickup and feed roller.

Figure 2-140 Locate the pickup and feed roller

10. Locate and pull down the blue tab to unlock the pickup and feed rollers.

Figure 2-141 Unlock the pickup and feed rollers

11. Use the tab as a handle to slide the rollers to the left to compress the left blue post until it clicks into place.

Figure 2-142 Slide the rollers to the left

12. Slightly move the rollers to the right to free them from the blue post. Make sure that the roller is clear of the black post on the right.

Slightly lift up the front of the roller assembly (callout 1), and then pull the assembly away from the printer (callout 2) to remove it.

 **IMPORTANT:** Use a damp, lint-free cloth to gently clean the rollers.

 **NOTE:** When handling rollers or pads, avoid touching the spongy surfaces. Skin oils and fingerprints on a roller surface can cause print-quality problems.

Figure 2-143 Remove the rollers

Solve paper handling problems

- [Printer feeds incorrect page size](#)
- [Printer pulls from incorrect tray](#)
- [Printer will not duplex or duplexes incorrectly](#)
- [Paper does not feed from Tray 2-X](#)
- [Output is curled or wrinkled](#)
- [Printer does not pick up paper or misfeeds](#)
- [Clear paper jams](#)

Printer feeds incorrect page size

Table 2-74 Printer feeds incorrect page size

| Cause | Solution |
|---|--|
| The correct size paper is not loaded in the tray. | Load the correct size paper in the tray. |
| The correct size paper is not selected in the software program or printer driver. | Confirm that the settings in the software program and printer driver are correct, because the software program settings override the printer driver and control panel settings, and the printer driver settings override the control panel settings. |
| The correct size paper for the tray is not selected in the printer control panel. | From the control panel, select the correct size paper for the tray. |
| The paper size is not configured correctly for the tray. | Print a configuration page to determine the paper size for which the tray is configured. |
| The guides in the tray are not against the paper. | Make sure that the tray guides are set to the correct size paper that is loaded in the tray. |

Printer pulls from incorrect tray

Table 2-75 Printer pulls from incorrect tray

| Cause | Solution |
|--|---|
| A driver for a different printer is in use. | Use a driver for this printer. |
| The specified tray is empty. | Load paper in the specified tray. |
| The paper size is not configured correctly for the input tray. | Print a configuration page or use the control panel to determine the paper size for which the tray is configured. |
| The guides in the tray are not against the paper. | Verify that the guides are touching the paper. |

Printer will not duplex or duplexes incorrectly

Table 2-76 Printer will not duplex (print 2-sided jobs) or duplexes incorrectly

| Cause | Solution |
|---|--|
| The duplex job is trying to use unsupported paper. | Verify that the paper is supported for duplex printing. |
| The printer driver is not set up for duplex printing. | Set up the printer driver to enable duplex printing. |
| The first page is printing on the back of preprinted forms or letterhead. | Load preprinted forms and letterhead in Tray 1 with the letterhead or printed side down, with the top of the page leading into the printer. For Tray 2-X, load the paper printed side up with the top of the page toward the right of the printer. |
| The printer model does not support automatic 2-sided printing. | The printer model does not support automatic 2-sided printing. |

Paper does not feed from Tray 2-X

Table 2-77 Paper does not feed from Tray 2-X

| Cause | Solution |
|---|--|
| The correct size paper is not loaded. | Load the correct size paper. |
| The input tray is empty. | Load paper in the input tray. |
| The correct paper type for the input tray is not selected in the printer control panel. | From the printer control panel, select the correct paper type for the input tray. Trays configured for a paper type with a specific weight range will not match a print job that specifies an exact weight, even if the specified weight is within the weight range. |
| Paper from a previous jam has not been completely removed. | Open the printer and remove any paper in the paper path. Closely inspect the fuser area for jams. |
| None of the optional trays appear as input tray options. | The optional trays only display as available if they are installed. Verify that any optional trays are correctly installed. Verify that the printer driver has been configured to recognize the optional trays. |
| An optional tray is incorrectly installed. | Print a configuration page to confirm that the optional tray is installed. If not, verify that the tray is correctly attached to the printer. |
| The paper size is not configured correctly for the input tray. | Print a configuration page or use the control panel to determine the paper size for which the tray is configured. |
| The guides in the tray are not against the paper. | Make sure that the tray guides are set to the correct size paper that is loaded in the tray. |

Output is curled or wrinkled

Table 2-78 Output is curled or wrinkled

| Cause | Solution |
|---|--|
| Paper does not meet the specifications for this printer. | Use only paper that meets the HP paper specifications for this printer. |
| The correct paper type for the input tray is not selected in the printer control panel. | From the printer control panel, select the correct paper type for the input tray. Trays configured for a paper type with a specific weight range will not match a print job that specifies an exact weight, even if the specified weight is within the weight range. |

Table 2-78 Output is curled or wrinkled (continued)

| Cause | Solution |
|--|---|
| Paper is damaged or in poor condition. | Remove paper from the input tray and load paper that is in good condition. |
| The printer is operating in an excessively humid environment. | Verify that the printing environment is within humidity specifications. |
| The print job consist of large, solid-filled areas. | Large, solid-filled areas can cause excessive curl. Try using a different pattern. |
| Paper used was not stored correctly and might have absorbed moisture. | Remove paper and replace it with paper from a fresh, unopened package. |
| Paper has poorly cut edges. | Remove paper, flex it, rotate it 180 degrees or turn it over, and then reload it into the input tray. Do not fan paper. If the problem persists, replace the paper. |
| The specific paper type was not configured for the tray or selected in the software. | Configure the software for the paper (see the software documentation). Configure the tray for the paper. |
| The paper has previously been used for a print job. | Do not re-use paper. |

Printer does not pick up paper or misfeeds

Use the following procedures if the printer will not pick or misfeeds paper.

The printer does not pick up paper

If the printer does not pick up paper from the tray, try these solutions.

 **NOTE:** Tray 1 and Tray 2 are optimal for paper pickup when using special paper or media other than 20lb plain paper. For Tray 1 and Tray 2 the printer increases the number of attempts to pick up a page, which increases the reliability of successfully picking the page from the tray and decreases the possibility of a mispick jam.

HP recommends using Tray 1 or Tray 2 if the printer is experiencing excessive or reoccurring jams from trays other than Tray 1 and Tray 2, or for print jobs that require media other than 20lb plain paper.

1. Open the printer and remove any jammed sheets of paper.
2. Load the tray with the correct size of paper for the job.
3. Make sure the paper size and type are set correctly on the printer control panel.
4. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides to the appropriate indentation in the tray.
5. Check the printer control panel to see if the printer is waiting for an acknowledgment to the feed the paper manually prompt. Load paper, and continue.
6. The rollers above the tray might be contaminated. Clean the rollers with a lint-free cloth dampened with warm water.

The printer picks up multiple sheets of paper

If the printer picks up multiple sheets of paper from the tray, try these solutions.

1. Remove the stack of paper from the tray and flex it, rotate it 180 degrees, and flip it over. *Do not fan the paper.* Return the stack of paper to the tray.
2. Use only paper that meets HP specifications for this printer.
3. Use paper that is not wrinkled, folded, or damaged. If necessary, use paper from a different package.
4. Make sure the tray is not overfilled. If it is, remove the entire stack of paper from the tray, straighten the stack, and then return some of the paper to the tray.
5. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides to the appropriate indentation in the tray.
6. Make sure the printing environment is within recommended specifications.

The document feeder jams, skews, or picks up multiple sheets of paper (MFP)

- Check to see if there are areas on the page that might have had staples removed. This can cause jams and/or mispicks.
- The original might have something on it, such as staples or self-adhesive notes that must be removed.
- Check that all rollers are in place and correctly installed.
- Make sure that the top document-feeder cover is closed.
- The pages might not be placed correctly. Straighten the pages and adjust the paper guides to center the stack.
- The paper guides must be touching the sides of the paper stack to work correctly. Make sure that the paper stack is straight and the guides are against the paper stack.
- The document feeder input tray or output bin might contain more than the maximum number of pages. Make sure the paper stack fits below the guides in the input tray, and remove pages from the output bin.
- Verify that there are no pieces of paper, staples, paper clips, or other debris in the paper path.
- Clean the document-feeder rollers and the separation pad. Use compressed air or a clean, lint-free cloth moistened with warm water. If misfeeds still occur, replace the rollers.

Paper does not feed automatically

Table 2-79 Paper does not feed automatically

| Cause | Solution |
|--|---|
| Manual feed is selected in the software program. | Load Tray 1 with paper, or, if the paper is loaded, press the OK button. |
| The correct size paper is not loaded. | Load the correct size paper. |
| The input tray is empty. | Load paper into the input tray. |
| Paper from a previous jam has not been completely removed. | Open the printer and remove any paper in the paper path. |

Table 2-79 Paper does not feed automatically (continued)

| Cause | Solution |
|--|---|
| The paper size is not configured correctly for the input tray. | Print a configuration page or use the control panel to determine the paper size for which the tray is configured. |
| The guides in the tray are not against the paper. | Verify that the rear and width paper guides are touching the paper. |

Clear paper jams

Auto-navigation for clearing jams

The auto-navigation feature assists you in clearing jams by providing step-by-step instructions on the control panel. When you complete a step, the product displays instructions for the next step until you have completed all steps in the procedure.

Experiencing frequent or recurring paper jams?

To reduce the number of paper jams, try these solutions.

1. Use only paper that meets HP specifications for this product.
2. Use paper that is not wrinkled, folded, or damaged. If necessary, use paper from a different package.
3. Use paper that has not previously been printed or copied on.
4. Make sure the tray is not overfilled. If it is, remove the entire stack of paper from the tray, straighten the stack, and then return some of the paper to the tray.

5. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides so they are touching the paper stack without bending it.
6. Make sure that the tray is fully inserted in the product.
7. If you are printing on heavy, embossed, or perforated paper, use the manual feed feature and feed sheets one at a time.
8. Open the [Trays](#) menu on the product control panel. Verify that the tray is configured correctly for the paper type and size.
9. Make sure the printing environment is within recommended specifications.

Clear paper jams in the document feeder

The following information describes how to clear paper jams in the document feeder. When a jam occurs, the control panel displays the following message and an animation that assists in clearing the jam.

- **31.13.XX Jam in Document Feeder**

1. Lift the latch to release the document-feeder cover.

2. Open the document-feeder cover.

3. Remove any jammed paper.

4. Close the document-feeder cover.

 **NOTE:** To avoid jams, make sure the guides in the document-feeder input tray are adjusted tightly against the document. Remove all staples and paper clips from original documents.

 **NOTE:** Original documents that are printed on heavy, glossy paper can jam more frequently than originals that are printed on plain paper.

Clear paper jams in Tray 1 (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

The following information describes how to clear a paper jam in Tray 1. When a jam occurs, the control panel displays the following message and an animation that assists in clearing the jam.

- **13.A1.XX Jam in Tray 1**

1. If jammed paper is visible in Tray 1, clear the jam by gently pulling the paper straight out.

2. If you cannot remove the paper, or if no jammed paper is visible in Tray 1, close Tray 1 and open the right door.

3. Gently pull out any jammed paper.

4. Close the right door.

Clear paper jams in Tray 1 (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)

The following information describes how to clear a paper jam in Tray 1. When a jam occurs, the control panel displays the following message and an animation that assists in clearing the jam.

- **13.A1.XX Jam in Tray 1**

1. If jammed paper is visible in Tray 1, clear the jam by gently pulling the paper straight out.

2. Close Tray 1.

3. Pull Tray 2 out of the printer.

4. Lower the jam plate in the Tray 2 opening.

5. Pull any jammed paper straight out.

6. Raise the jam plate back into position.

7. Install Tray 2 in the printer.

Clear paper jams in Trays 2, 3, 4, or 5 (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

The following information describes how to clear a paper jam in Trays 2, 3, 4, or 5. When a jam occurs, the control panel displays one of the following messages and an animation that assists in clearing the jam.

- 13.A2.XX Jam in Tray 2
- 13.A3.XX Jam in Tray 3
- 13.A4.XX Jam in Tray 4
- 13.A5.XX Jam in Tray 5

 **NOTE:** The following procedure shows Tray 2. The method to clear jams in Trays 3, 4, and 5 is the same.

1. Pull the tray completely out of the printer by pulling and lifting it up slightly.

2. Remove any jammed or damaged sheets of paper from the tray.

3. Remove any paper from the feed rollers inside the printer.

4. Reinsert and close the tray.

5. Open the right door.

6. Remove any jammed paper.

7. Remove the fuser by grabbing the two side latches and pulling the fuser straight out of the printer.

CAUTION: The fuser can be hot while the printer is in use. Wait for the fuser to cool before handling it.

8. Remove any jammed paper from the fuser opening.

9. Reinstall the fuser.

10. Close the right door.

Clear paper jams in Trays 2, 3, or 4 (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)

The following information describes how to clear a paper jam in Trays 2, 3, 4, or 5. When a jam occurs, the control panel displays one of the following messages and an animation that assists in clearing the jam.

- 13.A2.XX Jam in Tray 2
- 13.A3.XX Jam in Tray 3
- 13.A4.XX Jam in Tray 4
- 13.A5.XX Jam in Tray 5

 **NOTE:** The following procedure shows Tray 2. The method to clear jams in Trays 3, 4, and 5 is the same.

1. Pull the tray completely out of the printer by pulling and lifting it up slightly.

2. Remove any jammed or damaged sheets of paper.

3. Reinsert and close the tray.

4. Open the rear door.

5. Remove any jammed paper.

6. Remove the fuser by grabbing the two side latches and pulling the fuser straight out of the printer.

CAUTION: The fuser can be hot while the printer is in use. Wait for the fuser to cool before handling it.

7. Remove any jammed paper from the fuser opening.

8. Reinstall the fuser.

9. Close the rear door

Clear paper jams in the 2,550-sheet high-capacity input tray (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

The following information describes how to clear a paper jam in the 2,100-sheet high-capacity tray. When a jam occurs, the control panel displays one of the following messages and an animation that assists in clearing the jam.

- **13.AY.XX Jam in Tray Y**, where Y equals the tray number assigned to the HCI
- **13.FFEE Door Open Jam**

1. Open the 2,100-sheet high-capacity input tray.

2. Remove and discard any damaged sheets.

3. Remove the paper from the tray.

4. Lift the tray up and then pull it straight out to remove it.

5. If jammed paper is in the feed area, pull it down to remove it.

6. Reinstall the tray, and then load full reams of paper into the tray. The tray holds 2,100 sheets of paper.

NOTE: For best results, load full reams of paper. Avoid dividing reams into smaller sections.

7. Close the tray.

Clear paper jams in the 2,100-sheet high-capacity input tray (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)

The following information describes how to clear a paper jam in the 2,100-sheet high-capacity tray. When a jam occurs, the control panel displays one of the following messages and an animation that assists in clearing the jam.

- **13.AY.XX Jam in Tray Y**, where Y equals the tray number assigned to the HCI
- **13.FF.EE Door Open Jam**

1. Open the 2,100-sheet high-capacity input tray.

2. Remove and discard any damaged sheets.

3. Remove the paper from the tray.

4. If jammed paper is in the feed area, pull it down to remove it.

5. Load full reams of paper into the HCI. The tray holds 2,100 sheets of paper.

NOTE: For best results, load full reams of paper. Avoid dividing reams into smaller sections.

6. Close the HCI door.

Clear paper jams in the right door and fuser area (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

Use the following procedure to clear paper jams in the right door, duplexer, and fuser area. When a jam occurs, the control panel displays one of the following messages and an animation that assists in clearing the jams.

- 13.B2.XX Jam in <cover or door>
- 13.B9.XX Jam in Fuser
- 13.FF.EE Door Open Jam

CAUTION: The fuser is hot while the printer is in use. Wait for the fuser to cool before clearing jams.

1. Open the right door.

2. Remove any jammed paper.

3. Remove the fuser by grabbing the two side latches and pulling the fuser straight out of the printer.

CAUTION: The fuser can be hot while the printer is in use. Wait for the fuser to cool before handling it.

4. Remove any jammed paper from the fuser opening.

5. Reinstall the fuser.

6. Close the right door.

Clear paper jams in the rear door and fuser area (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)

Use the following procedure to clear paper jams in the rear door and fuser area. When a jam occurs, the control panel displays one of the following messages and an animation that assists in clearing the jam.

- 13.B2.XX Jam in <cover or door>
- 13.B9.XX Jam in Fuser

CAUTION: The fuser is hot while the printer is in use. Wait for the fuser to cool before clearing jams.

1. Open the rear door.

2. Remove any jammed paper.

3. Remove the fuser by grabbing the two side latches and pulling the fuser straight out of the printer.

CAUTION: The fuser can be hot while the printer is in use. Wait for the fuser to cool before handling it.

4. Remove any jammed paper from the fuser opening.

5. Reinstall the fuser.

6. Close the rear door

Clear paper jams in the output bin (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

The following information describes how to clear a paper jam in the output bin. When a jam occurs, the control panel displays the following message and an animation that assists in clearing the jam.

- **13.E1.XX Jam at Standard Output Bin**

1. If paper is visible in the output bin, grasp the leading edge and remove it.

Clear paper jams in the output bin (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)

The following information describes how to clear a paper jam in the output bin. When a jam occurs, the control panel displays the following message and an animation that assists in clearing the jam.

- **13.E1.XX Jam at Standard Output Bin**

1. If paper is visible in the output bin, grasp the leading edge and remove it.

Clear paper jams in the duplexer (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

Use the following procedure to check for paper in all possible jam locations in the automatic duplexer. When a jam occurs, the control panel displays one of the following error messages and an animation that assists in clearing the jam.

- 13.B2.XX Jam in <cover or door>
- 13.CX.XX Jam in Duplexer
- 13.DX.XX Jam in Duplexer

1. Open the right door.

2. Remove any jammed paper.

3. Close the right door

Clear paper jams in the duplexer (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)

Use the following procedure to check for paper in all possible jam locations in the automatic duplexer. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

- 13.CX.XX Jam in Duplexer
- 13.DX.XX Jam in Duplexer
- 13.B2.XX Jam in <cover or door>

1. Open the rear door.

2. Remove any jammed paper.

3. Close the rear door

Clear paper jams in the envelope feeder (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

Use the following procedure to clear jams in the envelope feeder. When a jam occurs, the control panel displays one of the following messages and an animation that assists in clearing the jam.

- 13.A3.XX Jam in Tray 3
- 13.A4.XX Jam in Tray 4

1. Pull the tray completely out of the printer by pulling and lifting it up slightly.

2. Remove any jammed or damaged envelopes from the tray.

3. Remove any envelopes from the feed rollers inside the printer.

4. Reinsert and close the tray.

Clear paper jams in the envelope feeder (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)

Use the following procedure to clear jams in the envelope feeder. When a jam occurs, the control panel displays one of the following messages and an animation that assists in clearing the jam.

- 13.A3.XX Jam in Tray 3
- 13.A4.XX Jam in Tray 4

1. Pull the tray completely out of the printer by pulling and lifting it up slightly.

2. Remove any jammed or damaged envelopes from the tray.

3. Remove any envelopes from the feed rollers inside the printer.

4. Reinsert and close the tray.

Clear paper jams in the HP Stapling Mailbox (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

The following information describes how to clear a paper jam in the HP Stapling Mailbox. When a jam occurs, the control panel displays one of the following error messages and an animation that assists in clearing the jam.

- 13.E1.XX Jam at Standard Output Bin
- 13.70.XX MBM Jam
- 13.8X Stapler/Stacker Jam

1. Remove any jammed paper from the HP Stapling Mailbox bins.

2. Open the jam-access door on the back side of the HP Stapling Mailbox. If jammed paper is visible inside the jam-access door, pull it straight out to remove it.

3. Close the HP Stapling Mailbox jam access door.

Clear paper jams in the HP Stapling Mailbox accessory (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)

The following information describes how to clear a paper jam in the HP Stapling Mailbox. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

- 13.E1.XX Jam at Standard Output Bin

13.70.XX MBM Jam

1. Remove any jammed paper from the HP Stapling Mailbox output bins.

2. Open the jam-access door on the back side of the stapler/stacker. If jammed paper is visible inside the jam-access door, pull it straight up to remove it.

3. Close the HP Stapling Mailbox jam access door.

Clear staple jams (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

The following information describes how to clear a staple jam in the HP Stapling Mailbox. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

- **13.8X.XX – Stapler/Stacker Jam**

1. Open the stapler door.

2. Pull the colored handle on the staple cartridge, and then pull the staple cartridge straight out.

3. Lift up on the small lever at the back of the staple cartridge.

4. Remove the jammed staples.
5. Close the lever at the back of the staple cartridge. Be sure that it snaps into place.

6. Insert the staple cartridge into the stapler and push on the colored handle until it snaps into place.

7. Close the stapler door.

Clear staple jams (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)

The following information describes how to clear a staple jam in the HP Stapling Mailbox. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

- **13.8X.XX – Stapler/Stacker Jam**

1. Open the stapler door.

2. Pull the colored handle on the staple cartridge, and then pull the staple cartridge straight out.

3. Lift up on the small lever at the back of the staple cartridge.

4. Remove the jammed staples.
5. Close the lever at the back of the staple cartridge. Be sure that it snaps into place.

6. Insert the staple cartridge into the stapler and push the colored handle until it snaps into place.

7. Close the stapler door.

Change jam recovery

This printer provides a jam recovery feature that reprints jammed pages.

Change jam recovery from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Settings](#) button.
 2. Open the following menus:
 - [General](#)
 - [Jam Recovery](#)
 3. Select one of the following options:
 - [Automatic](#) — The printer attempts to reprint jammed pages when sufficient memory is available. This is the default setting.
 - [Off](#) — The printer does not attempt to reprint jammed pages. Because no memory is used to store the most recent pages, performance is optimal.
-
-  **NOTE:** Some pages can be lost if the printer runs out of paper while printing a duplex job with Jam Recovery set to [Off](#).
-
- [On](#) — The printer always reprints jammed pages. Additional memory is allocated to store the last few pages printed.

Change jam recovery from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
 2. Use the right arrow ► button to scroll to and select the [Settings](#) menu, and then press the [OK](#) button.
 3. Use the down arrow ▼ button to scroll to and select the [General](#) menu, and then press the [OK](#) button.
 4. Use the down arrow ▼ button to scroll to and select the [Jam Recovery](#) menu, and then press the [OK](#) button.
 5. Use the down arrow ▼ button to scroll to an option, and then press the [OK](#) button to select it.
 - [Automatic](#) — The printer attempts to reprint jammed pages when sufficient memory is available. This is the default setting.
 - [Off](#) — The printer does not attempt to reprint jammed pages. Because no memory is used to store the most recent pages, performance is optimal.
-
-  **NOTE:** Some pages can be lost if the printer runs out of paper while printing a duplex job with Jam Recovery set to [Off](#).
-
- [On](#) — The printer always reprints jammed pages. Additional memory is allocated to store the last few pages printed.

Solve performance problems

 **NOTE:** Tray 1 and Tray 2 are optimal for paper pickup when using special paper or media other than 20lb plain paper. For Tray 1 and Tray 2 the printer increases the number of attempts to pickup a page, which increases the reliability of successfully picking the page from the tray and decreases the possibility of a mis-pick jam.

HP recommends using Tray 1 or Tray 2 if the printer is experiencing excessive or reoccurring jams from trays other than Tray 1 and Tray 2, or for print jobs that require media other than 20lb plain paper.

- [Print speeds](#)
- [The printer does not print or it prints slowly](#)
- [The printer prints slowly](#)

Factors affecting print performance

Table 2-86 Solve performance problems

| Problem | Cause | Solution |
|--|---|--|
| Pages print but are totally blank. | The document might contain blank pages. | Check the original document to see if content is present on all of the pages. |
| | The printer might be malfunctioning. | To check the printer, print a Configuration page. |
| | Make sure that the printer is not feeding multiple pages (especially if very thin paper is used). | Make sure that the paper meets HP specifications for this printer. For a complete list of specific HP-brand paper that this printer supports, go to www.hp.com/support/ljM607 , www.hp.com/support/ljM608 , www.hp.com/support/ljM609 , www.hp.com/support/ljM610 , www.hp.com/support/ljM611 , www.hp.com/support/ljM612 , www.hp.com/support/ljE60055 , www.hp.com/support/ljE60065 , www.hp.com/support/ljE60075 , www.hp.com/support/ljE60155 , www.hp.com/support/ljE60165 , www.hp.com/support/ljE60175 , www.hp.com/support/ljM631MFP , www.hp.com/support/ljM632MFP , www.hp.com/support/ljM633MFP , www.hp.com/support/ljM634MFP , www.hp.com/support/ljM635MFP , www.hp.com/support/ljM636MFP , www.hp.com/support/ljE62555MFP , www.hp.com/support/ljE62565MFP , www.hp.com/support/ljE62575MFP , www.hp.com/support/ljE62655MFP , www.hp.com/support/ljE62665MFP , www.hp.com/support/ljE62675MFP . |
| Pages print very slowly. | Heavier paper types can slow the print job. | Print on a different type of paper. |
| NOTE: Some software programs process print jobs slowly. | Complex pages can print slowly. | Proper fusing might require a slower print speed to ensure the best print quality. |

Table 2-86 Solve performance problems (continued)

| Problem | Cause | Solution |
|----------------------|---|---|
| Pages did not print. | Large batches, narrow paper, and special paper such as gloss, transparency, cardstock, and HP Tough Paper can slow the print job. | Print in smaller batches, on a different type of paper, or on a different size of paper. |
| | The printer might not be pulling paper correctly. | Make sure paper is loaded in the tray correctly. |
| | The paper is jamming in the printer. | Clear the jam. |
| | The USB cable might be defective or incorrectly connected. | <ul style="list-style-type: none"> • Disconnect the USB cable at both ends and reconnect it. • Try printing a job that has printed in the past. • Try using a different USB cable. |
| | Other devices are running on the host computer. | The printer might not share a USB port. If an external hard drive or network switchbox is connected to the same port as the printer, the other device might be interfering with the printer. To connect and use the printer, disconnect the other device or use two USB ports on the host computer. |
| | The print job might not have arrived at the printer. | Check the printer status queue. Also, the Printing message should appear on the control panel display. |

Print speeds

Print speed is the number of pages that print in one minute. Print speed depends on different engine-process speeds or operational pauses between printed pages during normal printer operation. Factors that determine the print speed of the printer include the following:

- Page formatting time

The printer must pause for each page to be formatted before it prints. Complex pages take more time to format, resulting in reduced print speed. However, most jobs print at full engine speed.

- Media size

Legal-size media reduces print speed because it is longer than the standard Letter- or A4-size media. A reduce print speed is used when printing on narrow media to prevent the edges of the fuser from overheating.

- Media mode

Some media types require a reduced print speed to achieve maximum print quality on that media. For example, glossy, heavy, and specialty media (for example, envelopes or photos) require a reduced print speed. To maximize the print speed for special media types, make sure that the correct media type in the print driver is selected.

- Printer temperature

To prevent printer damage, print speed is reduced if the printer reaches a specific internal temperature (thermal slow down). The starting temperature of the printer, ambient environment temperature, and the

print job size effect the number of pages that can be printed before the printer reduces the print speed. Thermal slow down reduces print speed by printing four pages and then pausing for an amount of time before printing continues.

- Other print speed reduction factors

Other factors (especially during large print jobs) that can cause reduced print speeds include:

- Density control sequence; occurs every 150 pages and takes about 120 seconds

The printer does not print or it prints slowly

The printer does not print

If the printer does not print at all, try the following solutions.

1. Make sure the printer is turned on and that the control panel indicates it is ready.
 - If the control panel does not indicate the printer is ready, turn the printer off and then on again.
 - If the control panel indicates the printer is ready, try sending the job again.
2. If the control panel indicates the printer has an error, resolve the error and then try sending the job again.
3. Make sure the cables are all connected correctly. If the printer is connected to a network, check the following items:
 - Check the bottom LED next to the network connection on the printer. If the network is active, the light is green.
 - Make sure that a network cable and not a phone cord is used to connect to the network.
 - Make sure the network router, hub, or switch is turned on and that it is working correctly.
4. Install the HP software for the printer. Using generic printer drivers can cause delays clearing jobs from the print queue.
5. From the list of printers on your computer, right-click the name of this product, click **Properties**, and open the **Ports** tab.
 - If a network cable is used to connect to the network, make sure the printer name listed on the **Ports** tab matches the one on the printer configuration page.
 - If a USB cable is used, and the printer is connected to a wireless network, make sure the box is checked next to **Virtual printer port for USB**.
6. If a personal firewall system on the computer is used, it might be blocking communication with the printer. Try temporarily disabling the firewall to see if it is the source of the problem.
7. If the host computer or the printer is connected to a wireless network, low signal quality or interference might be delaying print jobs.

The printer prints slowly

The printer prints slowly

If the printer prints, but it seems slow, try the following solutions.

1. Make sure the computer meets the minimum specifications for this printer. For a list of specifications, go to this Web site: www.hp.com/support/ljM607, www.hp.com/support/ljM608, www.hp.com/support/ljM609, www.hp.com/support/ljM610, www.hp.com/support/ljM611, www.hp.com/support/ljM612, www.hp.com/support/ljE60055, www.hp.com/support/ljE60065, www.hp.com/support/ljE60075, www.hp.com/support/ljE60155, www.hp.com/support/ljE60165, www.hp.com/support/ljE60175, www.hp.com/support/ljM631MFP, www.hp.com/support/ljM632MFP, www.hp.com/support/ljM633MFP, www.hp.com/support/ljM634MFP, www.hp.com/support/ljM635MFP, www.hp.com/support/ljM636MFP, www.hp.com/support/ljE62555MFP, www.hp.com/support/ljE62565MFP, www.hp.com/support/ljE62575MFP, www.hp.com/support/ljE62655MFP, www.hp.com/support/ljE62665MFP, www.hp.com/support/ljE62675MFP.
2. When the printer is configured to print on some paper types, such as heavy paper, the printer prints more slowly so it can correctly fuse the toner to the paper. If the paper type setting is not correct for the type of paper you are using, change the setting to the correct paper type.
3. If the host computer or the printer is connected to a wireless network, low signal quality or interference might be delaying print jobs.

Solve connectivity problems

- [Solve wired network problems](#)
- [Solve wireless network problems](#)

Solve wired network problems

Introduction

Certain types of problems can indicate there is a network communication problem. These problems include the following issues:

- The periodic loss of ability to communicate with the printer
- The printer cannot be found during driver installation
- A periodic failure to print

NOTE: If you have been experiencing intermittent loss of network productivity, first update the printer firmware. For instructions on how to update the printer firmware, go to <http://support.hp.com>, search for your printer, and then search on “update the firmware.”

Check the following items to verify that the printer is communicating with the network. Before beginning, print a configuration page from the printer control panel and locate the printer IP address that is listed on this page.

- [Poor physical connection](#)
- [The computer is unable to communicate with the printer](#)
- [The printer is using incorrect link and duplex settings for the network](#)
- [New software programs might be causing compatibility problems](#)
- [The computer or workstation might be set up incorrectly](#)
- [The printer is disabled, or other network settings are incorrect](#)

NOTE: HP does not support peer-to-peer networking, as the feature is a function of Microsoft operating systems and not of the HP print drivers. For more information, go to Microsoft at www.microsoft.com.

Poor physical connection

1. Verify that the printer is attached to the correct network port using a cable of the correct length.
2. Verify that cable connections are secure.
3. Look at the network port connection on the back of the printer, and verify that the amber activity light flashes indicating network traffic, and the green link-status light is continuously lit indicating a network link.
4. If the problem continues, try a different cable or port on the hub.

The computer is unable to communicate with the printer

1. Test network communication by pinging the network.
 - a. Open a command-line prompt on your computer.

- For Windows, click **Start**, click **Run**, type `cmd`, and then press [Enter](#).
 - For OS X, go to **Applications**, then **Utilities**, and open **Terminal**.
- b. Type `ping` followed by the IP address for your printer.
 - c. If the window displays round-trip times, the network is working.
2. If the ping command failed, verify that the network hubs are on, and then verify that the network settings, the printer, and the computer are all configured for the same network (also known as subnet).
 3. Open the printer properties and click the **Ports** tab. Verify that the current IP address for the printer is selected. The printer IP address is listed on the printer configuration page.
 4. If you installed the printer using the HP standard TCP/IP port, select the box labeled **Always print to this printer, even if its IP address changes**.
 5. If you installed the printer using a Microsoft standard TCP/IP port, use the printer's hostname instead of the IP address.
 6. If the IP address is correct, delete the printer and then add it again.

The printer is using incorrect link and duplex settings for the network

HP recommends leaving these settings in automatic mode (the default setting). If you change these settings, you must also change them for your network.

New software programs might be causing compatibility problems

Verify that any new software programs are correctly installed and that they use the correct print driver.

The computer or workstation might be set up incorrectly

1. Check the network drivers, print drivers, and the network redirection settings.
2. Verify that the operating system is configured correctly.

The printer is disabled, or other network settings are incorrect

1. Review the printer's configuration/networking pages to check the status of the network settings and protocols.
2. Reconfigure the network settings if necessary.

Solve wireless network problems

- [The wireless printer loses communication when connected to a VPN](#)

- [The network does not appear in the wireless networks list](#)
- [The wireless network is not functioning](#)
- [Reduce interference on a wireless network](#)

Introduction

Use the troubleshooting information to help resolve issues.

 **NOTE:** To determine whether HP NFC and Wi-Fi Direct printing are enabled on your printer, print a configuration page from the printer control panel.

 **NOTE:** If you have been experiencing intermittent loss of network connectivity, first update the printer firmware. For instructions on how to update the printer firmware, go to <http://support.hp.com>, search for your printer, and then search on “update the firmware.”

Wireless connectivity checklist

- For printers that do not support simultaneous wired and wireless connections, verify that the network cable is not connected.
- Verify that the printer and the wireless router are turned on and have power. Also make sure that the wireless radio in the printer is turned on. (The wireless network indicator is solid when the printer is connected to a wireless network, and blinking when it is searching for a wireless network.)
- Verify that the service set identifier (SSID) is correct:
 - For a wireless connection to your network, confirm that your mobile device is connecting to the correct router/access point.
 - For a Wi-Fi Direct connection, print a configuration page to determine the printer's SSID.

If you are not sure that the SSID is correct, run the wireless setup again.
- With secured networks, verify that the security information is correct. If the security information is incorrect, run the wireless setup again.
- If the wireless network is working correctly, try accessing other computers on the wireless network. If the network has Internet access, try connecting to the Internet over a wireless connection.
- Verify that the encryption method (AES or TKIP) is the same for the printer as it is for the wireless access point (on networks using WPA security).
- Verify that the printer is within the range of the wireless network. For most networks, the printer must be within 30 m (100 ft) of the wireless access point (wireless router).
- Verify that obstacles do not block the wireless signal. Remove any large metal objects between the access point and the printer. Make sure poles, walls, or support columns containing metal or concrete do not separate the printer and wireless access point.
- Verify that the printer is located away from electronic devices that might interfere with the wireless signal. Many devices can interfere with the wireless signal including motors, cordless phones, security system cameras, other wireless networks, and some Bluetooth devices.
- Verify that the print driver is installed on the computer.
- Verify that you have selected the correct printer port.

- Verify that the computer and printer connect to the same wireless network.
- If your environment has multiple wireless signals and you need the printer to support dual band networks on both 2.4 GHz and 5 GHz, install the HP Jetdirect 2900nw print server accessory.
- For OS X, verify that the wireless router supports Bonjour.

The printer does not print after the wireless configuration completes

1. Make sure that the printer is turned on and in the ready state.
2. Turn off any third-party firewalls on your computer.
3. Make sure that the wireless network is working correctly.
4. Make sure that your computer is working correctly. If necessary, restart the computer.
5. Verify that you can open the printer HP Embedded Web Server from a computer on the network.

The printer does not print, and the computer has a third-party firewall installed

1. Update the firewall with the most recent update available from the manufacturer.
2. If programs request firewall access when you install the printer or try to print, make sure that you allow the programs to run.
3. Temporarily turn off the firewall, and then install the wireless printer on the computer. Enable the firewall when you have completed the wireless installation.

The wireless connection does not work after moving the wireless router or printer

1. Make sure that the router or printer connects to the same network that your computer connects to.
2. Print a configuration page.
3. Compare the service set identifier (SSID) on the configuration page to the SSID in the printer configuration for the computer.
4. If the numbers are not the same, the devices are not connecting to the same network. Reconfigure the wireless setup for the printer.

Cannot connect more computers to the wireless printer

1. Make sure that the other computers are within the wireless range and that no obstacles block the signal. For most networks, the wireless range is within 30 m (100 ft) of the wireless access point.
2. Make sure that the printer is turned on and in the ready state.
3. Make sure there are not more than 5 concurrent Wireless Print Direct users.
4. Turn off any third-party firewalls on your computer.
5. Make sure that the wireless network is working correctly.
6. Make sure that your computer is working correctly. If necessary, restart the computer.

The wireless printer loses communication when connected to a VPN

- Typically, you cannot connect to a VPN and other networks at the same time.

The network does not appear in the wireless networks list

- Make sure the wireless router is turned on and has power.
- The network might be hidden. However, you can still connect to a hidden network. Make sure the router/access point is advertising the SSID by checking for its SSID in the available networks seen by your mobile device.

The wireless network is not functioning

1. For printers that do not support simultaneous wired and wireless connections, make sure that the network cable is disconnected.
2. To verify if the network has lost communication, try connecting other devices to the network.
3. Test network communication by pinging the network.
 - a. Open a command-line prompt on your computer.
 - For Windows, click **Start**, click **Run**, type `cmd`, and then press [Enter](#).
 - For OS X, go to **Applications**, then **Utilities**, and open **Terminal**.
 - b. Type `ping` followed by the router IP address.
 - c. If the window displays round-trip times, the network is working.
4. Make sure that the router or printer connects to the same network that the computer connects to.
 - a. Print a configuration page.
 - b. Compare the service set identifier (SSID) on the configuration report to the SSID in the printer configuration for the computer.
 - c. If the numbers are not the same, the devices are not connecting to the same network. Reconfigure the wireless setup for the printer.

Reduce interference on a wireless network

The following tips can reduce interference in a wireless network:

- Keep the wireless devices away from large metal objects, such as filing cabinets, and other electromagnetic devices, such as microwaves and cordless telephones. These objects can disrupt radio signals.
- Keep the wireless devices away from large masonry structures and other building structures. These objects can absorb radio waves and lower signal strength.
- Position the wireless router in a central location in line of sight with the wireless printers on the network.

Service mode functions

- [Service menu](#)
- [Printer resets](#)
- [Format Disk and Partial Clean functions](#)

Service menu

The [Service](#) menu is PIN-protected for added security. Only authorized service people have access to the [Service](#) menu. When selecting [Service](#) from the list of menus, the printer prompts the user to enter an eight-digit personal identification number (PIN).

NOTE: The printer automatically exits the [Service](#) menu after about one minute if no items are selected or changed.

Open the service menu from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) item.
2. Touch the [Service](#) menu item.
3. Enter the service personal identification number (PIN) for this printer:

NOTE: Make sure that [Service Access Code](#) displays in the access type area.

TIP: For a small touchscreen printer, touch the [Access Code](#) dialog box to display a virtual 10-key keypad.

- 05060717 (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)
- 05063117 (M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675)

4. Touch the [Sign In](#) button.

Open the service menu from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to and select the [Support Tools](#) menu, and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to and select the [Service](#) menu, and then press the [OK](#) button.
4. Use the down arrow ▼ button to scroll to [Service](#), and then press the [OK](#) button.
5. Use the 10-key keypad to enter the following service access code for the printer:

NOTE: After entering the PIN, press the [OK](#) button.

- 05060717 (M607/M608/M609/E60055/E60065/E60075/E60155/E60165/E60175)

The following menu items appear in the [Service](#) menu:

NOTE: For touchscreen printers, touch an item to navigate to sub menus. For LCD printers, use the arrow buttons and the [OK](#) button to navigate to sub menus.

Table 2-87 Service menu

| First level | Second level | Third-level | Value | Description |
|---|---|-------------|-------|---|
| Event Log | Print | | | Print or view the event log. |
| | Clear | | | Use this item to clear the printer event log. |
| Cycle Counts NOTE: The cycle count range is 0 to 9999999. | Total Engine Cycles | | | Set the page count that was stored in NVRAM prior to installing a new formatter. |
| | Mono Cycle Count | | | Use this item to record the number of mono print jobs. |
| | Refurbish Cycle Count | | | Use this item to record the page count when the printer was refurbished. |
| | Document Feeder Kit Count (MFP only) | | | Total number of pages since the document feeder kit was replaced. |
| | Document Feeder Kit Interval (MFP only) | | | Use this item to set the interval that causes the printer to prompt the customer to replace document feeder maintenance kit. |
| | Clean Rollers Count (MFP only) | | | Total number of pages since the document feeder rollers were cleaned. |
| | Clean Rollers Interval (MFP only) | | | Use this item to set the interval that causes the printer to prompt the customer to clean the document feeder rollers and separation pad. |
| | ADF Count (MFP only) | | | Set the total pages fed through the document feeder. |
| | Flatbed Count (MFP only) | | | Set the total pages scanned from the flatbed. |
| | ADF Simplex Count (MFP only) | | | Set the total single-sided pages fed through the document feeder. |
| | ADF Duplex Count (MFP only) | | | Set the total two-sided pages fed through the document feeder. |
| | Copy Scan Count (MFP only) | | | Set the total copy pages that have been scanned. |
| | Send Scan Count (MFP only) | | | Set the number of scanned pages sent to email. |
| | Fax Scan Count (fax models only) | | | Set the number of scanned pages that have been faxed. |

Table 2-87 Service menu (continued)

| First level | Second level | Third-level | Value | Description |
|--|-----------------------------|--------------------------|------------|--|
| | Copy Pages Count (MFP only) | | | Set the number of scanned pages that have been printed. |
| Scanner Settings (MFP only) | Edge to Adjust | Glass: Rear Edge | Adjustment | Set the calibration values. NOTE: Adjustments are in millimeters (-20 to 20). |
| | | Glass: Left Edge | | |
| | | ADF: Leading front edge | | |
| | | ADF: Leading Back back | | |
| | | ADF: Trailing Front edge | | |
| | | ADF:Left Side Front | | |
| | | ADF:Left Side Back | | |
| | | Clear All | | Clear all adjustment values (set to zero). |
| | | Done | | Done exits the menu. |
| Serial Number | | Done | | Set the serial number. |
| | | | | Done exits the menu. |
| Service ID | | Done | | Use this item to show the date that the printer was first used on the control panel. This eliminates the need for users to keep paper receipts for proof of warranty. Done exits the menu. |
| Locked tray sizes (Managed printers only) | Lock Tray 2 size check box | | | Select the Lock Tray 2 size check box to enable the lock feature. Select a paper size from the drop-down menu, and then select Save . |
| Cold Reset Paper | | Letter | | When you perform a cold reset, the paper size that is stored in NVRAM is reset to the default factory setting. If you replace a formatter board in a country/region that uses A4 as the standard paper size, use this menu to reset the default paper size to A4. LETTER and A4 are the only available values. |
| | | A4 | | |
| MPS Settings | Low Alerts On | On | | Use this to configure managed services specific settings. |
| | | Off | | |

| | | | Start | |
| | Runtime Configuration | | | Choose from a list of available configurations. NOTE: The list is product specific. |
| Fax V.29 Speed (fax models only) | V.29 9600 | | | Set the fax module rate (for example, the V.29 9600 setting means that the fax module is capable of transferring a maximum of 9600 bits per second). |
| | V.29 7200 | | | |
| Reset Supplies | | | | Use this item after replacing a supply item (for example, the tray rollers) to reset the firmware counter (resets to zero) for that supply item. NOTE: The list of supply items is printer specific and also depends on the printer configuration. |

Printer resets

- [Restore factory-set defaults](#)
- [Printer cold reset](#)

Restore factory-set defaults

Restore factory-set defaults from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) item.
2. Open the following menus:
 - [Settings](#)
 - [General](#)
 - [Restore Factory Settings](#)
3. Touch [Reset](#) to reset current user specified default settings to the factory default settings, or touch [Cancel](#) to return to the [General](#) menu.

Restore factory-set defaults from from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
2. Use the right arrow ► button to scroll to and select the Settings menu, and then press the [OK](#) button.
3. Use the down arrow ▼ button to scroll to and select the [General](#) menu, and then press the [OK](#) button.
4. Use the down arrow ▼ button to scroll to and select the [Reset Factory Settings](#) item, and then press the [OK](#) button.
5. Use the left arrow ◀ or right arrow ► buttons to select the [Reset](#) item, and then press the [OK](#) button.

NOTE: Touch the [Cancel](#) button to return to the [General](#) menu.

Printer cold reset

Cold reset using the Pre-boot menu from a touchscreen control panel

CAUTION: This procedure resets all product configurations and settings to factory defaults (customer configurations and settings are lost).

1. Touch the middle of the control-panel display when you see the [1/8](#) under the logo.

Figure 2-150 Open the Pre-boot menu

2. Use the down arrow ▼ button to highlight the **+3:Administrator** item, and then touch the **OK** button.
3. Use the down arrow ▼ button to highlight the **+8:Startup Options** item, and then touch the **OK** button.
4. Use the down arrow ▼ button to highlight the **2 Cold Reset** item, and then touch the **OK** button.
5. Touch the Home button to return to the main Pre-boot menu and highlight the **1 Continue** item, and then touch the **OK** button.

 **NOTE:** The printer initializes.

Cold reset using the Pre-boot menu from a LCD control panel

1. Press the **Cancel** button when you see the 1/8 under the logo
2. Use the down arrow ▼ button to scroll to and select the **+3:Administrator** menu, and then press the **OK** button.
3. Use the down arrow ▼ button to scroll to and select the **+8:Startup Options** item, and then press the **OK** button.
4. Use the down arrow ▼ button to scroll to and select the **2 Cold Reset** item, and then press the **OK** button.
5. Touch the Home button to return to the main Pre-boot menu and highlight the **1:Continue** item, and then touch the **OK** button.

 **NOTE:** The printer initializes.

Format Disk and Partial Clean functions

NOTE: Only for printers with a hard-disk drive (HDD) installed).

Active and repository firmware locations

The firmware bundle consists of multiple parts. The main components are the Windows CE Operating System and the printer/peripheral firmware files.

There are two locations/partitions on the hard drive where the firmware components are stored:

- The Active, where the operating system and firmware currently are executing.
- The Repository, the recovery location.

If the Active location is damaged, or a [Partial Clean](#) was performed, the printer automatically copies over the OS and firmware files from the Repository location and the printer recovers.

If both the Active and Repository locations are damaged, or a [Format Disk](#) was performed, then both locations are gone and the error message **99.09.67** displays on the control-panel display. The user must upload the firmware to the printer in order for it to function again.

CAUTION: The [Format Disk](#) option performs a disk initialization for the entire disk. The operating system, firmware files, and third party files (among other files) will be completely lost. HP does not recommend this action.

Partial Clean

The [Partial Clean](#) option erases all partitions and data on the disk drive, except for the firmware repository where a backup copy of the firmware file is stored. This allows the disk drive to be reformatted without having to download a firmware upgrade file to return the printer to a bootable state.

Characteristics of a Partial Clean

- Customer-defined settings, third-party solutions, firmware files, and the operating system are deleted.
- Rebooting the printer restores the firmware files from the Repository location, but does not restore any customer-defined settings.
- For previous HP printers, a Hard Disk Initialization is similar to executing the [Partial Clean](#) function for this printer.

CAUTION: HP recommends backing-up printer configuration data before executing a [Partial Clean](#) to retain customer-defined settings (if needed). See the [Backup/Restore](#) item in the [Device Maintenance](#) menu.

Reasons for performing a Partial Clean

- The printer continually boots up in an error state.

NOTE: Try clearing the error prior to executing a [Partial Clean](#).

- The printer will not respond to commands from the control panel.
- Executing the [Partial Clean](#) function is helpful for troubleshooting hard disk problems.

- To reset the printer by deleting all solutions and customer-defined settings.
- The printer default settings are not properly working.

Execute a Partial Clean

Execute a Partial Clean from a touchscreen control panel

CAUTION: This procedure resets all printer configurations and settings to factory defaults (customer configurations and settings are lost).

1. Touch the middle of the control-panel display when you see the 1/8 under the logo.

Figure 2-151 Open the Pre-boot menu

2. Use the down arrow ▼ button to highlight the +3:Administrator item, and then touch the OK button.
3. Use the down arrow ▼ button to highlight Partial Clean and then touch the OK button.
4. Touch the OK button again.
5. Touch the Home button to highlight Continue, and then touch the OK button.

NOTE: The printer initializes.

Execute a Partial Clean from a LCD control panel

CAUTION: This procedure resets all printer configurations and settings to factory defaults (customer configurations and settings are lost).

1. Press the Cancel button when you see the 1/8 under the logo.
2. Use the down arrow ▼ button to highlight the +3:Administrator item, and then press the OK button.
3. Use the down arrow ▼ button to highlight Partial Clean and then press the OK button.
4. Press the OK button again.
5. Press the Home button to highlight Continue, and then press the OK button.

NOTE: The printer initializes.

Format Disk

The Format Disk option erases the entire disk drive.

CAUTION: After executing a Format Disk option, the printer is *not* bootable.

Characteristics of a Format Disk

- Customer-defined settings, third-party solutions, firmware files, and the operating system are deleted.

 **NOTE:** Rebooting the printer *does not* restore the firmware files.

- Rebooting the printer restores the firmware files from the Repository location, but does not restore any customer-defined settings.
- After executing the [Format Disk](#) function, the message **99.09.67** displays on the control panel.
- After executing the [Format Disk](#) function, the printer firmware must be reloaded.

 **CAUTION:** HP recommends not using the [Format Disk](#) option unless an error occurs and the solution in the printer service manual recommends this solution. After executing the [Format Disk](#) function, the printer is unusable.

HP recommends backing-up printer configuration data before executing a [Format Disk](#) to retain customer-defined settings (if needed). See the [Backup/Restore](#) item in the [Device Maintenance](#) menu.

Reasons for performing a Format Disk

- The printer continually boots up in an error state.

 **NOTE:** Try clearing the error prior to executing a [Format Disk](#).

- The printer will not respond to commands from the control panel.
- Executing the [Format Disk](#) function is helpful for troubleshooting hard disk problems.
- To reset the printer by deleting all solutions and customer-defined settings.

Execute a Format Disk

Execute a Format Disk from a touchscreen control panel

 **CAUTION:** This procedure resets all printer configurations and settings to factory defaults (customer configurations and settings are lost).

1. Touch the middle of the control-panel display when you see the **1/8** under the logo.

Figure 2-152 Open the Pre-boot menu

2. Use the down arrow ▼ button to highlight the **+3:Administrator** item, and then touch the **OK** button.
3. Use the down arrow ▼ button to highlight **Format Disk**, and then touch the **OK** button.
4. Touch the **OK** button again.

NOTE: When the [Format Disk](#) operation is complete, reload the printer firmware.

Execute a Format Disk from a LCD control panel

CAUTION: This procedure resets all printer configurations and settings to factory defaults (customer configurations and settings are lost).

1. Press the [Cancel](#) button when you see the [1/8](#) under the logo.
2. Use the down arrow ▼ button to highlight the [+3:Administrator](#) item, and then press the [OK](#) button.
3. Use the down arrow ▼ button to highlight [Format Disk](#), and then press the [OK](#) button.
4. Press the [OK](#) button again.

NOTE: When the [Format Disk](#) operation is complete, reload the printer firmware.

Firmware upgrades

To download the most recent firmware upgrade for the printer, go to:

- In the US, go to www.hp.com/support/ljM607, www.hp.com/support/ljM608, www.hp.com/support/ljM609, www.hp.com/support/ljM610, www.hp.com/support/ljM611, www.hp.com/support/ljM612, www.hp.com/support/ljE60055, www.hp.com/support/ljE60065, www.hp.com/support/ljE60075, www.hp.com/support/ljE60155, www.hp.com/support/ljE60165, www.hp.com/support/ljE60175, www.hp.com/support/ljM631MFP, www.hp.com/support/ljM632MFP, www.hp.com/support/ljM633MFP, www.hp.com/support/ljM634MFP, www.hp.com/support/ljM635MFP, www.hp.com/support/ljM636MFP, www.hp.com/support/ljE62555MFP, www.hp.com/support/ljE62565MFP, www.hp.com/support/ljE62575MFP, www.hp.com/support/ljE62655MFP, www.hp.com/support/ljE62665MFP, www.hp.com/support/ljE62675MFP.
 - a. Select **Get drivers, Software, and Firmware**, and then select the appropriate product by name.

 **NOTE:** More than one printer model might be listed. Make sure to select the correct model so that the upgraded firmware supports all of the printer functions.

 - b. Select the driver language and operating system.
 - c. Locate the firmware download, and then select **Download**.
- Outside the U.S., go to www.hp.com/support.
 - a. Select your country/region.
 - b. Select **Drivers & Downloads**.
 - c. Enter the product name in the **Find my product** dialogue box, and then select **Go**.

 **TIP:** Click on the **How do I find my product name/number?** link to see a short video on identifying the printer name and number.

- d. Select the appropriate product by name.

 **NOTE:** More than one printer model might be listed. Make sure to select the correct model so that the upgraded firmware supports all of the printer functions.

- e. Select the driver language and operating system.
- f. Locate the firmware download, and then select **Download**.
- [Determine the installed revision of firmware](#)
- [Perform a firmware upgrade](#)

Determine the installed revision of firmware

NOTE: Print a configuration page to determine the installed revision of firmware.

Print the configuration page from a touchscreen control panel

1. From the Home screen on the printer control panel, swipe (right), and then touch the **Reports** button.
2. Touch the **Configuration/Status Pages** item
3. Touch **Configuration Page** to select it.

TIP: Multiple report pages can be selected, and then printed together.

4. Touch the **Print** button to print the pages.

Print the configuration page from a LCD control panel

1. From the Home screen on the printer control panel, use the down arrow ▼ button to select the **Print** menu.
2. Use the right arrow ► button to scroll to **Reports**, and then press the **OK** button.
3. Use the down arrow ▼ button to scroll to **Configuration/Status Pages**, and then press the **OK** button.
4. Use the down arrow ▼ or ▲ buttons to scroll to **Configuration Page**, and then press the **OK** button to select it.
5. Use the down arrow ▼ and right arrow ► buttons to scroll to **Print**, and then press the **OK** button to print the pages.

TIP: Multiple report pages can be selected, and then printed together.

Figure 2-153 Configuration report

Perform a firmware upgrade

The firmware bundle is a .bdl file. This file requires an interactive upgrade method. The traditional FTP, LPR or Port 9100 methods of upgrading are not available. Use one of the following methods to upgrade the firmware for this printer.

HP Embedded Web Server

NOTE: The firmware update might take 10 minutes or longer based on the input/output (I/O) transfer rates and the time it takes for the printer to reinitialize.

1. Open an Internet browser window.
2. Enter the printer IP address in the URL line.
3. Select the **Firmware Upgrade** link from the **General** tab or from the **Troubleshooting** tab.
4. Browse to the location that the firmware upgrade file was downloaded to, and then select the firmware file—the file has a .bdl file extension. Select the [Install](#) button to perform the upgrade.

NOTE: Do not close the browser window OR interrupt communication until the HP Embedded Web Server (EWS) displays the confirmation page.

5. After the printer reinitializes, print a configuration page and verify that the latest firmware version has been installed.

USB flash drive (control-panel menu)

 **NOTE:** USB flash drives that are not using a FAT32 format, or do not have a CD formatted partition, might not be recognized by the printer. If the printer does not recognize a USB flash drive, try using a different USB flash drive.

 **TIP:** The USB port on the printer must be enabled. If it is disabled, use the [Enable Retrieve from USB](#) item in the [General Settings](#) menu to enable it.

USB flash drive firmware (control-panel menu) update from a touchscreen control panel

1. Copy the .bdl file to a portable USB flash drive.
2. Turn the printer on, and then wait until it initializes.
3. From the Home screen on the printer control panel, swipe (right), and then touch the [Support Tools](#) item.
4. Open the following menus:
 - [Maintenance](#)
 - [USB Firmware Upgrade](#)
5. Insert the USB flash drive with the .bdl file on it into the USB port on the printer.
6. Touch the .bdl file, and then touch the [Install](#) button.

 **NOTE:** If there is more than one .bdl file on the storage device, make sure to select the correct file for this printer.

7. When the upgrade is complete, the printer restarts.

 **TIP:** Print a configuration page and verify that the upgrade firmware version was installed.

USB flash drive firmware (control-panel menu) update from a LCD control panel

1. Copy the .bdl file to a portable USB flash drive.
2. From the Home screen on the printer control panel, use the down arrow ▼ button to select the [Print](#) menu.
3. Use the right arrow ► button to scroll to and select the [Support Tools](#) menu, and then press the [OK](#) button.
4. Use the down arrow ▼ button to scroll to and select the [Maintenance](#) menu, and then press the [OK](#) button.
5. Use the down arrow ▼ button to scroll to and select the [USB Firmware Upgrade](#) menu, and then press the [OK](#) button.
6. Insert the USB flash drive with the .bdl file on it into the USB port on the printer.
7. Use the down arrow ▼ button to scroll to the appropriate .bdl file, and then press the [OK](#) button to select.

 **NOTE:** If there is more than one .bdl file on the storage device, make sure to select the correct file for this printer.

8. Use the down arrow ▼ and right arrow ► buttons to scroll to [Install](#), and then press the [OK](#) button to start the firmware upgrade.

 **TIP:** Print a configuration page and verify that the upgrade firmware version was installed.

USB flash drive (Pre-boot menu)

 **IMPORTANT:** Only use this method of performing a firmware upgrade if the printer cannot initialize to the Ready state.

USB flash drive firmware (Pre-boot menu) update from a touchscreen control panel

1. Copy the .bdl file to a portable USB flash drive.
2. Touch the middle of the control-panel display when you see the 1/8 under the logo.

Figure 2-154 Open the Pre-boot menu

3. Touch the down arrow ▼ button to highlight +3 Administrator, and then touch the OK button.
4. If necessary, touch the down arrow ▼ button to highlight +1 Download, and then touch the OK button.
5. Insert the USB flash drive with the .bdl file on it into the USB port on the printer.

 **NOTE:** If the error message No USB Thumbdrive Files Found displays on the control-panel display, try using a different portable storage device.

6. Touch the down arrow ▼ button to highlight USB Thumbdrive, and then touch the OK button.
7. Touch the down arrow ▼ button to highlight the .bdl file, and then touch the OK button.

 **NOTE:** The upgrade process can take 10 minutes or longer to complete.

 **TIP:** If there is more than one .bdl file on the storage device, make sure to select the correct file for this printer.

8. When the message Complete displays on the control-panel display, turn the printer power off, and then on again.
9. Touch the OK button to begin the upgrade. When the upgrade is complete, the printer will initialize to the Ready state.
10. When the upgrade process is complete, print a configuration page and verify that the upgrade firmware version was installed.

USB flash drive firmware (Pre-boot menu) update from a LCD control panel

1. Copy the .bdl file to a portable USB flash drive.
2. Press the Cancel  button when you see the 1/8 under the logo.
3. Press the down arrow ▼ button to highlight +3 Administrator, and then press the OK button.

4. If necessary, press the down arrow ▼ button to highlight **+1 Download**, and then press the **OK** button.
5. Insert the USB flash drive with the .bdl file on it into the USB port on the printer.

NOTE: If the error message **No USB Thumbdrive Files Found** displays on the control-panel display, try using a different portable storage device.

6. Press the down arrow ▼ button to highlight **USB Thumbdrive**, and then press the **OK** button.
7. Press the down arrow ▼ button to highlight the .bdl file, and then press the **OK** button.

NOTE: The upgrade process can take 10 minutes or longer to complete.

TIP: If there is more than one .bdl file on the storage device, make sure to select the correct file for this printer.

8. When the message **Complete** displays on the control-panel display, turn the printer power off, and then on again.
9. When the upgrade process is complete, print a configuration page and verify that the upgrade firmware version was installed.

Solve fax problems or email

Fax or email troubleshooting information is not provided in this service manual. The most current information is available in WISE or HP Channel Services Network (CSN). Search using model number then use "fax troubleshooting" as the search term.

Printer space requirements

HP recommends that the following distances be added to the printer dimensions provided in this chapter to make sure there is sufficient space to open doors and covers, and to provide proper ventilation. See [Printer dimensions on page 400](#) or [Printer dimensions \(M631/M632/M633/E62555/E62565/E62575/E62655/E62665/E62675\) on page 403](#).

- From the left-side or right-side of the printer to an obstruction, add:
 - 430 mm (17 in)
- From the front-side of the printer to an obstruction, add:
 - 610 mm (24 in)
- From the back-side of the printer to an obstruction, add:
 - 460 mm (18 in)

Power consumption, electrical specifications, and acoustic emissions

See www.hp.com/support/ljM607, www.hp.com/support/ljM608, www.hp.com/support/ljM609, www.hp.com/support/ljE60055, www.hp.com/support/ljE60065, www.hp.com/support/ljE60075, www.hp.com/support/ljE60155, www.hp.com/support/ljE60165, www.hp.com/support/ljE60175, www.hp.com/support/ljM631MFP, www.hp.com/support/ljM632MFP, www.hp.com/support/ljM633MFP, www.hp.com/support/ljE62555MFP, www.hp.com/support/ljE62565MFP, www.hp.com/support/ljE62575MFP, www.hp.com/support/ljE62655MFP, www.hp.com/support/ljE62665MFP, www.hp.com/support/ljE62675MFP for current information.

CAUTION: Power requirements are based on the country/region where the printer is sold. Do not convert operating voltages. This will damage the printer and void the printer warranty.

Operating environment range

Table A-24 Operating environment range

| Environment | Recommended | Allowed |
|-------------------|-----------------------------------|-------------------------------|
| Temperature | 17° to 25°C (62.6° to 77°F) | 15° to 32.5°C (59° to 90.5°F) |
| Relative humidity | 30% to 70% relative humidity (RH) | 10% to 80% RH |

Certificate of Volatility

Figure A-1 Certificate of Volatility (1 of 2; M607/M608/M609)

| Hewlett-Packard Certificate of Volatility | | | | |
|---|--|---|---|---|
| Model: M607, M608, M609 | Part Number: K0Q14A, 15A, 17A, 18A, 19A | | Address: Hewlett Packard Company 11311 Chinden Blvd Boise, ID 83714 | |
| Volatile Memory | | | | |
| Does the device contain volatile memory (Memory whose contents are lost when power is removed)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe the type, size, function, and steps to clear the memory below | | | | |
| Type (SRAM, DRAM, etc): DDR3-DRAM | Size: 512 | User Modifiable: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No | Function: Used for temporary storage during the processing of jobs and for applications running on the OS. | Steps to clear memory: When the printer is powered OFF , the memory is erased. |
| Type (SRAM, DRAM, etc): | Size: | User Modifiable: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No | Function: | Steps to clear memory: |
| Type (SRAM, DRAM, etc): | Size: | User Modifiable: <input type="checkbox"/> Yes <input type="checkbox"/> No | Function: | Steps to clear memory: |
| Non-Volatile Memory | | | | |
| Does the device contain non-volatile memory (Memory whose contents are retained when power is removed)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe the type, size, function, and steps to clear the memory below | | | | |
| Type (Flash, EEPROM, etc): IOD EEPROM | Size: 32KB | User Modifiable: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No | Function: Store customer setting data for backup/restore | Steps to clear memory: There are no steps to clear this data. |
| Type (Flash, EEPROM, etc): | Size: | User Modifiable: | Function: Contains the boot code and factory product configuration data required for the device to function. User modifications are limited to downloading digitally signed HP firmware images. | Steps to clear memory: There are no steps to clear this data. |
| SPI Flash | 4MB | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No | | |
| Type (Flash, EEPROM, etc): | Size: | User Modifiable: <input type="checkbox"/> Yes <input type="checkbox"/> No | Function: | Steps to clear memory: |
| Mass Storage | | | | |
| Does the device contain mass storage memory (Hard Disk Drive, Tape Backup)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe the type, size, function, and steps to clear the memory below | | | | |
| Type (HDD, Tape, etc): EMMC | Size: 4GB All Skews | User Modifiable: <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No | Function: OS and User Data | Steps to clear memory: firmware update |
| Type (HDD, Tape, etc): HDD | Size: 320 GB Accessory Only | User Modifiable: <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No | Function: OS and User Data | Steps to clear memory: firmware update |
| USB | | | | |
| Does the item accept USB input and if so, for what purpose (i.e Print Jobs, device firmware updates, scan upload)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe below | | | | |
| Print jobs, HP digitally signed firmware upgrades, 3rd party application loading. USB ports can be disabled. | | | | |
| Can any data other than scan upload be sent to the USB device)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe below | | | | |
| Diagnostic service logs can be uploaded. Print files can be printed via a USB thumb drive. | | | | |

Figure A-2 Certificate of Volatility (2 of 2; M607/M608/M609)

| RF/RFID | |
|--|--------------------------------|
| Does the item use RF or RFID for receive or transmit of any data including remote diagnostics. (e.g. Cellular phone, Bluetooth) <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If Yes please describe below | |
| Purpose: Wireless Information string | |
| Frequency: | Bandwidth: |
| Modulation: | Effective Radiate Power (ERP): |
| Specifications: | |

| Other Transmission Capabilities | |
|---|---|
| Does the device employ any other methods of non-wired access to transmit or receive any data whatsoever (e.g. anything other than standard hard wired TCP/IP, direct USB, or parallel connections)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe below: | |
| Purpose: WiFi Direct Print | |
| Frequency: 2.4GHz, 5GHz | Bandwidth: 2401 - 2495 MHz; depending on selected channel in 2.4GHz band. 5180 - 5825 MHz; depending on selected channel in 5GHz band. |
| Modulation: | Effective Radiate Power (ERP): |
| Specifications: 802.11 b/g/n | |

| Other Transmission Capabilities | |
|---|--|
| Does the device employ any other methods of non-wired access to transmit or receive any data whatsoever (e.g. anything other than standard hard wired TCP/IP, direct USB, or parallel connections)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe below: | |
| Purpose: Device Beaconsing Secure Print Apps | |
| Frequency: 2.4GHz | Bandwidth: 2400-2483.5 MHz; depending on selected channel. |
| Modulation: | Effective Radiate Power (ERP): |
| Specifications: BTLE4.0 compliant | |

| Other Capabilities | |
|---|--|
| Does the device employ any other method of communications such as a Modem to transmit or receive any data whatsoever? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If Yes please describe below: | |
| Purpose: Device Beaconsing Secure Print Apps | |
| Specifications | |

|---------------------------------|--------------------------------------|---|--|---|
| Type (HDD, Tape, etc.): eMMC | Size: 16GB (E62655 dn Only) | User Modifiable: <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No | Function: Stores customer data, OS, applications, digitally signed firmware images, persistent data, and temporary data used for processing and system functions | Steps to clear memory: There are several ways to erase this: 1. Secure Storage Erase - Erases temporary files and job data by overwriting information one or three times 2. Secure Disk Erase - Industry standard ATA Secure Erase. Overwrites all data on the hard drive. 3. Secure File Erase - Erases files when jobs finish processing by overwriting them one or three times. |
|---------------------------------|--------------------------------------|---|--|---|

| USB |
|---|
| Does the item accept USB input and if so, for what purpose (i.e. Print Jobs, device firmware updates, scan upload)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe below |
| Print jobs, HP digitally signed firmware upgrades, 3rd party application loading. USB ports can be disabled. |
| Can any data other than scan upload be sent to the USB device? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe below |
| Diagnostic service logs can be uploaded. Print files can be printed via a USB thumb drive. |

| RF/Rfid | |
|---|--------------------------------|
| Does the item use RF or RFID for receive or transmit of any data including remote diagnostics? (e.g. Cellular phone, Bluetooth) <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If Yes please describe below | |
| Purpose: | |
| Frequency: | Bandwidth: |
| Modulation: | Effective Radiate Power (ERP): |
| Specifications: | |

| Other Transmission Capabilities | |
|---|--------------------------------|
| Does the device employ any other methods of non-wired access to transmit or receive any data whatsoever (e.g. anything other than standard hard wired TCP/IP, direct USB, or parallel connections)? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If Yes please describe below: | |
| Purpose: | |
| Frequency: | Bandwidth: |
| Modulation: | Effective Radiate Power (ERP): |
| Specifications: | |

| Other Capabilities |
|---|
| Does the device employ any other method of communications such as a Modem to transmit or receive any data whatsoever? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If Yes please describe below: |
| Purpose: Fax |
| Specifications: |

| Type (Flash, EEPROM, etc.): TPM | Size: 16Kb (8x 2048 bit keys) | User Modifiable: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No | Function: Industry standard secure crypto-processor used for secure access and securing sensitive data. | Steps to clear memory: To clear the customer storage root key, CSRK, disable the TPM in the pre-boot menu. |
| Mass Storage | | | | |
| Does the device contain mass storage memory (Hard Disk Drive, Tape Backup)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe the type, size, function, and steps to clear the memory below | | | | |
| Type (HDD, Tape, etc.): EMMC | Size: 8GB | User Modifiable: <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No | Function: Stores customer data, OS, applications digitally signed firmware images, persistent data, and temporary data used for processing and system functions | Steps to clear memory: There are several ways to erase this: 1. Secure Storage Erase - Erases temporary files and job data by overwriting information one or three times 2. Secure Disk Erase - Industry standard ATA Secure Erase. Overwrites all data on the hard drive. 3. Secure File Erase - Erases files when jobs finish processing by overwriting them one or three times. |

Figure A-18 Certificate of Volatility (2 of 2; M611x/M612x)

| USB | |
|---|--|
| Does the item accept USB input and if so, for what purpose (i.e. Print Jobs, device firmware updates, scan upload)? | |
| <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe below | |
| Print jobs, HP digitally signed firmware upgrades, 3rd party application loading. USB ports can be disabled. | |
| Can any data other than scan upload be sent to the USB device? | |
| <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe below | |
| Diagnostic service logs can be uploaded. Print files can be printed via a USB thumb drive. | |

| RF/RFID | |
|---|--------------------------------|
| Does the item use RF or RFID for receive or transmit of any data including remote diagnostics? (e.g. Cellular phone, Bluetooth) | |
| <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If Yes please describe below | |
| Purpose: | |
| Frequency: | Bandwidth: |
| Modulation: | Effective Radiate Power (ERP): |
| Specifications: | |

| Other Transmission Capabilities | |
|---|--|
| Does the device employ any other methods of non-wired access to transmit or receive any data whatsoever (e.g. anything other than standard hard-wired TCP/IP, direct USB, or parallel connections)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe below: | |
| Purpose: WiFi Direct Print | |
| Frequency: 2.4GHz, 5GHz | Bandwidth: 2401 - 2495 MHz; depending on selected channel in 2.4GHz band. 5180 - 5825 MHz; depending on selected channel in 5GHz band. |
| Modulation: | Effective Radiate Power (ERP): |
| Specifications: 802.11 b/g/n | |

| Other Transmission Capabilities | |
|---|--|
| Does the device employ any other methods of non-wired access to transmit or receive any data whatsoever (e.g. anything other than standard hard-wired TCP/IP, direct USB, or parallel connections)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If Yes please describe below: | |
| Purpose: Device Beaconsing Secure Print Apps | |
| Frequency: 2.4GHz | Bandwidth: 2400-2483.5 MHz; depending on selected channel. |
| Modulation: | Effective Radiate Power (ERP): |
| Specifications: BTLE4.0 compliant | |

| Other Capabilities | |
|---|--|
| Does the device employ any other method of communications such as a Modem to transmit or receive any data whatsoever? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If Yes please describe below: | |
| Purpose: | |
| Specifications: | |

| Other Capabilities | |
|---|--|
| Does the device employ any other method of communications such as a Modem to transmit or receive any data whatsoever? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If Yes please describe below: | |
| Purpose: | |
| Specifications: | |

Revision history

Table B-1 Revision history

| Revision number | Revision date | Revision notes |
|-----------------|---------------|---|
| 3.0 | March 2020 | Edits for ULT SP20. |
| 2.0 | April 2019 | Added managed models. Updated Engine-control system on page 6 . Updated DC controller connections on page 176 . Updated Diagrams: General circuit diagrams on page 202 . Added Manually unlock the left door (E62655/E62665/E62675 models) on page 83 . Added Manually unlock the front door (E60155/E60165/E60175 models) on page 82 . Added "Revision history" section. |
| 1.0 | May 2017 | Troubleshooting manual initial release |
